The October 1991 Long Beach Bullet Sale

Heritage Numismatic Auctions, Inc.
Heritage Plaza
100 Highland Park Village
Dallas, Texas 75205-2788
214-528-3500, WATS: 1-800-US COINS (872-6467)

Dear Fellow Numismatist,

Our October Long Beach Bullet Sale was by far our largest. Lot viewing was very busy and bidding activity was intense. Gem nickel and silver type coins were the most in demand with collector material close behind. Dated gold was noticeably softer than it has been in recent months.

Highlights included:

5077	1866	Rays 5c	64 PCGS	$ 1,210
5100	1883	N.C. 5c	PR66 PCGS	$ 1,760
5196	1908	10c	PR67 NGC	$ 6,380
5235	1858	25c	66 PCGS	$ 9,680
5240	1877	25c	66 PCGS	$ 3,410
5324	1795	Draped $	58 PCGS	$ 7,700
5666	1879	F.H. Stella	PR50 PCGS	$16,500
6062	1849	Norris, Gregg Norris	53 PCGS	$ 7,700
6076	1853	Arms of Cal, Cal Gold	63 PCGS	$ 3,960

Our next several Bullet Sales are:

Dallas	December 12
Atlanta	January 3
Long Beach	February 6-7

Sincerely,

Leo Frese
Consignment Coordinator

Bullet Auction

Held in conjunction with

The October 1991 Long Beach Coin & Stamp Expo

Wednesday & Thursday, October 9-10, 7:00 P.M. P.D.T.

Specially Prepared for
Charles D. Moore

Bullet Auction

Dear Charles D. Moore:

Phenomenal! No other word could describe the auction you are about to participate in.

As the consignments started coming in for our Long Beach Bullet Sale, we knew it was going to be special. As they continued to pour in we knew it was going to be phenomenal. We received so many coins that the sale must now be conducted over two evenings instead of one.

These bullet sales have become known for the quantity of dated gold they contain. This Long Beach Bullet has even more gold - over 600 lots!

Some gold highlights include:

1849 No I	$1	MS 65	1845-D	$5	AU 58
1861-D	$1	AU 50	1855-C	$5	MS 60
1839-D	$2-1/2	MS 61	1875-S	$5	XF 45
1855	$2-1/2	MS 62	1844	$10	XF 45
1856-S	$2-1/2	MS 62	1846/5-O	$10	VF 35
1854-D	$3	VF 30	1861-S	$10	XF 45
1879 Flowing Hair Stella		XF 40	1860-O	$20	XF 40
1795	$5	XF 40	1861-S Paquet	$20	XF 40
1838-D	$5	AU 53	1871-CC	$20	AU 50

The gold alone in this sale is outstanding! However, there are also hundreds of type coins, dollars, commemoratives and foreign material including:

1909 VDB		1c	PR 64
1795	1/2	10c	MS 65 Possible Specimen
1830	1/2	10c	MS 66
1908		10c	PR 67
1858		25c	MS 66
1916 Standing		25c	MS 63
1916 Standing		25c	MS 64
1857		50c	MS 65
1884-S Morgan		$1	MS 62

This auction offers you the rare opportunity of selecting from over $1,000,000 worth of quality collector and investor material at today's levels; levels which have not been seen in years.

When the next market upswing is in full gear, don't be like the majority who will say, "Remember that October, 1991 Long Beach Bullet Sale? I could've bought so many coins. If only I'd known . . . ."

Thank you,

Leo Frese
Consignment Coordinator
Heritage Numismatic Auctions, Inc.

P.S. As a special reminder, please note the change in terms with regards to phone bidding. A lot must be worth at least $500 in order to bid by phone.

Pick One of Four Easy Ways to Bid in the Bullet Sale

Now, it's easier than ever to get the coins you want at the Heritage Bullet Sale. You can attend the sale in person at the October 1991 Long Beach Convention (Wednesday & Thursday, October 9 th & 10th at 7:00 P.M. P.D.T.) Or, you can place your bid by mail, FAX, or phone. It's easy...

#1 Bid In Person!

#2 Bid By Mail! Prior to the sale, you can bid on the coins you want by mail. Simply complete the enclosed Bid Sheet with your bids on the coins you want and send it in. If yours is the high bid on any lot, we act as your representative at the sale. Also, don't forget to use CompuBid to help you manage your coin buying budget. For more information, please refer to the following pages on "Mail Bidding" and "CompuBid.

#3 Bid By FAX! You can also submit your bids by FAX. Just follow the instructions for completing your mail bid, but this time FAX it! To FAX your Bid Sheet, call the Heritage FAX Hotline: (214)520-6968! FAX bids will be accepted until 1:00 p.m. on Tuesday, October 8, 1991, before the sale begins! Please see the section "Heritage FAX Hotline" for more information.

#4 Bid By Phone! Call 1-800-US-COINS! For even faster service, you can place your bids directly by phone. Call 1-800-US-COINS and tell us your bids on the coins you want. Phone bids before the sale will be accepted until 1:00p.m., Tuesday, October 8, 1991.

NEW SERVICE: Bid By Phone During The Sale ON COINS $500 OR MORE! You can actually participate in the auction itself by phone! Your Heritage agent bids for you LIVE on the bidding floor, according to your telephone instructions! It's just as if you were there in person! See the column at right for details.

You Can Receive Your Coins In Less Than A Week!

As soon as we receive your payment, your coins will be shipped OVER-NIGHT FEDERAL EXPRESS, so they'll be in your hands the very next day! If you act promptly, you can get your coins within the week

Wednesday, October 9 & Thursday 10 You're the successful bidder on the coins you want.

Saturday, October 12. You recieve a Priority Letter itemizing your purchases, your winning bids, and the total amount due. If you respond with your payment immediately via overnight express, your coins can be in your hands by Tuesday!

Monday, October 14. Your payment MUST be postmarked on or before this date. As soon as we receive your check, your coins will be shipped over-night Federal Express, so they'll be in your hands the very next day!

How to Bid By Phone. It's Fast! It's Fun! In Five Easy Steps!

No travel. No hassle. You can sit at home and bid on the coins you want valued over $500 just as if you're in the heat of the auction action! Your Heritage representative calls you and acts as your agent on the bidding floor. It's just as if you were there in person! Here's how...

Step One: Choose Your Coins. Look through the catalog and pick out the coins you want to bid on in the sale with a value over $500.

Step Two: Let Us Know. Use the Mail/FAX Bid Sheet enclosed to write down the lot numbers of the coins you've selected to bid on. Then, send it to us by mail or FAX (214-520-6968). OR YOU CAN GIVE US THIS INFORMATION OVER THE TELEPHONE BY CALLING 1-800-US-COINS. For you to participate by telephone in this sale, WE MUST HEAR FROM YOU NO LATER THAN Tuesday, October 8

Step Three: Be Prepared. Make a list of the lot numbers you want to bid and the top bid you want to place on each lot. Be ready by the phone to ta the call from your Heritage representative. He or she will call you just befo the lots you want are up for bidding. The auction will begin promptly at 7: p.m., Wednesday, October 9, & Thursday, October 10. Lots are sold in as cending numerical order at the rate of about 200 lots per hour, so you can estimate when your representative will be calling. REMEMBER: A LIVE AUCTION CAN MOVE VERY QUICKLY. A LOT CAN SELL IN L THAN 5 SECONDS, SO IT IS VERY IMPORTANT FOR YOU TO1 READY BY THE PHONE TO TAKE THE CALL WHEN IT COME

Step Four: We Call You. When your Heritage agent calls, he or she will for your bid on the lot you wish to buy and keep you informed as the bidd progresses. You are in control. Your Heritage agent will bid only accordi to your instructions.

Step Five: We Have A Winner! You will know immediately if yours is the l winning bid. As soon as the auctioneer declares the lot sold, your Heritag agent will relay the news to you. It's that easy!

Mail Bidding At Auction

Mail bidding at auction is both fun and easy and only requires few simple steps.

1. Look through the catalog, and determine the lots in which you have interest.
2. Research the market value of these lots by checking price ists and other price guidlines.
3. Fill out your bid sheet, entering your maximum bid on each lot using your pric research and your desire to own the lot (most coins auctioned are one-of-a-kind, or re of special quality not formally found).

WHEN BIDDING BY MAIL, YOU FREQUENTLY PURCHASE AT LESS THAN YOUR MAXIMUM BID. Here is how a mail bid is recorded by our auctioneer:

Bids are recorded as they are received. Preference is given to the first bid receiv in case of a tie.

On the floor of the auction, bidding is opened at 5 to 10% above the second highes mail bid. This bid is submitted by our company acting on your behalf as the highes mail bidder. If the auctioneer recognizes no other bids from the floor, you are awarded the lot at the opening bid. If bidding proceeds from the floor, the compan acting as your agent, registers bids in 5 to 10% increments over the previous bid. This process is continued until you are awarded the lot, or until the next bid is high or equal to your maximum bid.

An example of this procedure is set forth under these conditions:

On lot 25, you submit a bid of $1,000, and the second highest mail bid is at $500. In this case, bidding on the floor starts at $550, and is bid by our company on your be half. If no other bids do come from the floor, we bid for you in 5-20% increments, set by the auctioneer, until we reach your maximum bid of $1,000. If bidding has passed or equaled your maximum, we take no other action, and the bidding continu on the floor until the final bidder has been recognized by the auct ioneer.

CompuBid™ gives you more "on-the-scene" bidding clout than you ever had before.

CompuBid™ is a people-to-people innovation that is, by far, the most advanced and helpful method of mail bidding available in the rare coin marketplace. No other auction company has anything that even compares with its simple sophistication and direct benefits to you.

It increases your chances of success.

CompuBid™ increases your chances of success over our standard mail bidding system and other conventional mail bidding systems two ways: it increases your chances of bidding on more coins; it increases your chances of buying more of the coins you want.

It puts you where the action is.

The action is at the auction. And CompuBid™ puts you there. It gives you almost all the advantages of the people attending the auction. In fact, CompuBid™ gives you so much flexibility, it's as if you were attending the auction in person.

It maximizes your bidding dollars.

CompuBid™ enables you to bid on as many coins as you like, yet limit your total purchases to a specific amount. For example, you could bid on $25,000 worth of coins, yet limit your total purchases to $5,000. In this example, although you have the opportunity to bid on several coins that interest you, it is still possible to stay within your buying limits. This way, knowing that you have limited your bidding dollars to a specific amount, you can bid with more confidence and flexibility than ever before.

It evens the odds for you.

CompuBid™ equalizes your chances of bidding successfully against the bidders at the auction on the coins you want to buy. For example, assume you want to buy either a Seated dime for $500 or a Seated quarter for $950. You would bid on both coins in those amounts and place your bidding limit at $950. If you bought the Seated dime for $500, your bidding limit would be reduced to $450 ($950-$500 = $450), which would be your new bid on the Seated quarter. However, if you did not buy the dime, then your bid of $950 on the quarter would be accepted.

In another example, suppose you wanted to buy one gem proof Mercury dime $500. Assume there are three similar quality proof dimes in the sale, all with the same date and grade. You would bid $500 on all three and limit your purchase to $500. You would buy the first one to sell for $500 (or less) and the other bids would be canceled.

It's a tested and proven success.

CompuBid™ has proven to be the most effective and useful auction mail bidding technique available. No other auction company has the advancements in mail bidding technology and documentation necessary to offer a service as important and historically significant as CompuBid™. In fact, CompuBid™ is so precise that Heritage Numismatic Auctions, Inc., unconditionally guarantees that you, the bidder, will not be liable for any purchase over your specified limit.

Terms and Conditions of Sale

1. This is a public auction and mail-bid sale held by Heritage Numismatic Auctions, Inc., a licensed and bonded auctioneer (the "Auctioneer"). **Although the Auctioneer may not withdraw any lot after a call for bids has been made with respect to that lot, the consignor of the property included in the lot may bid on and purchase the lot at the auction sale for his own account.** Notice of the consignor's liberty to bid is hereby made in accordance with Article 2 of the Texas Uniform Commercial Code. The purchase of a lot by consignor's bid shall obligate such consignor to pay a fee to the Auctioneer.

2. The highest bidder acknowledged by the Auctioneer shall be the buyer. In the event of any dispute between bidders, the Auctioneer may at his sole discretion immediately put the lot up for sale again. The Auctioneer's decision shall be final and binding upon all bidders.

3. A buyer's premium equal to 10% of the successful bid price will be added to each invoice, unless the purchase is made by a consignor's bid on the consignor's property in which case a different fee is charged as a Consignor than as a Buyer. The premium and/or the fee are payable by the buyer as part of the total purchase price.

4. All bids are to be per lot as numbered in this catalog, and no lots will be broken. The Auctioneer reserves the right to group two or more lots together and to withdraw, prior to a call for bids, any lot or lots from the sale. Bids will be accepted in whole dollar amounts only.

5. All sales are strictly for cash in United States dollars (no credit cards accepted) and are due and payable immediately upon receipt of the auction invoice or notice, or if payment is to be made at the auction sale, simultaneously with receipt of the coins. For mail/FAX/phone bidders, payment for your lots must be postmarked or sent Federal Express on or before Monday, October 14. The Auctioneer reserves the right to void a sale if payment in full of the invoice or notice is not properly mailed or sent as above, or is not received by the Auctioneer within 13 days after the date of the sale.

   Successful floor bidders must pay for lots by 12:00 noon P.D.T., October 11, 1991. Lots delivered in the State of Texas and California are subject to all applicable state and local taxes, unless appropriate permits are on file with us. Shipping, handling, and insurance charges will be added to invoices for lots delivered by mail. Overseas buyers must furnish their own insurance during shipment.

6. All successful mail/FAX/phone bidders will be notified by telephone or Priority Letter on Saturday, October 12. If the auction invoice(s) or notice of successful bids submitted by the Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law until paid, and if the Auctioneer refers the invoice(s) to an attorney for collection, the buyer agrees to pay attorneys' fees, court costs, and other collection costs incurred by the Auctioneer. The courts of Dallas County, Texas, shall have exclusive jurisdiction and venue over any suit initiated by the Auctioneer to collect delinquent invoice(s), and all bidders consent to in personam jurisdiction of the State of Texas.

7. Mail bidders who have not previously established credit must furnish satisfactory references well in advance of the sale date, or send a deposit of 25% of their bids which is applicable to purchases. Any portion of such deposit not used will be promptly refunded after the sale.

8. All bidders who have mailing addresses outside the United States of America, the Territories of the USA, Canada or Mexico, or have addresses through the U.S. Military, must deposit with the Auctioneer 25% of the total amount bid in United States dollars. Any portion of such deposit not used will be promptly refunded after the sale. Also, persons who have APO or FPO box numbers must deposit 25%.

9. The Auctioneer reserves the right to require payment in full before delivery of the merchandise to the buyer. **Bidder personally guarantees payment of all successful bids, and if a corporation, an officer or principal in the corporation agrees to personally guarantee such payment.** Title shall not pass to the successful bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the coins once they are in his possession. Risk of loss shall be borne by the buyer following shipment of the coins.

10. The Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid which, in his opinion, is not submitted in "Good Faith," or as the case dictates, is not supported by satisfactory credit references, as the Auctioneer in its sole discretion shall determine. A bid is not considered made in "Good Faith" when it is made by an insolvent or irresponsible person or a person under the age of eighteen, as the Auctioneer, in its sole discretion, shall determine. In the event a successful bidder fails to pay all amounts due, the Auctioneer reserves the right to resell the merchandise and the buyer agrees to pay for the reasonable cost of such a sale, including a 10% seller's commission, and also to pay any difference between the resale price and the price of his previously successful bid.

11. **The Auctioneer shall have a lien against the merchandise purchased by the buyer, and any other property of the buyer then held by the Auctioneer to secure payment of the auction invoice(s) and any other amounts due the Auctioneer from the buyer, with respect to which the Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code.** In addition, with respect to payment of the auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice.

12. **The Auctioneer shall have the right to offset the unpaid amount of any auction invoice(s) against any amount then due to the buyer by the Auctioneer or affiliates of the Auctioneer.**

13. No buy or unlimited bids will be accepted. Mail bidders will be awarded lots at a 5-10% advance over the second highest bid. No additional commission (except for the buyer's premium) is charged for executing mail, phone, or FAX bids.

14. The Auctioneer cannot be responsible for your errors in bidding, so check your bids carefully. When identical mail or FAX bids are submitted, preference is given to the first received. If a mail bidder and a floor bidder have called identical bids, the decision of the Auctioneer and declaration of the winning bidder is final. The Auctioneer is not responsible for executing mail bids received on or after the day the first lot is sold. To insure the greatest accuracy, your bids should be entered on the standard bid sheet form and be received at the Auctioneer's place of business at least two business days in advance of the sale date.

15. Estimates will be given upon written request. It is recommended that bidders approach or exceed the estimates in order to increase the chances of bidding successfully.

16. By bidding at this sale the bidder warrants that he is of legal age, has the capacity to make the bid presented, and that the transaction is not for commercial purposes.

17. **Notice as to Warranties.** Auctioneer is selling only such right or title to the coins being sold as Auctioneer may have by virtue of consignment agreements on the date of sale and disclaims any warranty of title to the coins. Any description of the coins contained in this catalog is for the sole purpose of identifying the coins, and no description of coins has been made part of the basis of the bargain or has created an express warranty that the goods would conform to any description made by the Auctioneer. Auctioneer disclaims any warranty of merchantability or fitness for any particular purpose; the coins are sold "As Is" without any express or implied warranty.

   Coins sold referencing a third-party grading service may have various warranties and the bidder is referred to those services for details. American Numismatic Association Certification Service (ANACS), 818 N. Cascade Ave., Colorado Springs, CO 80903-3279; Hallmark Grading Service, Inc., P.O. Box 2879, Woburn MA 01888;

Numismatic Certification Institute, Inc., Heritage Plaza, Highland Park Village, Dallas, Texas 75205-2788; Numismatic Guaranty Corporation (NGC), P. O. Box 1776, Parsippany, NJ 07054; Professional Coin Grading Service (PCGS), 4533 MacArthur, Suite D, Newport Beach, CA 92660.

AS THE COINS ARE SOLD BY REFERENCE TO THIRD PARTY SERVICES CRITERIA AND DETERMINATION, ALL SALES ARE FINAL AND THERE IS NOT A RIGHT OF RETURN FOR ANY REASON EXCEPT AUTHENTICITY. ALL COINS ARE GUARANTEED AS GENUINE BUT ARE NOT GUARANTEED AS TO GRADE.

Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any property by Auctioneer to bidder.

No third-party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the bidder and may not be assigned.

Any statement made by the Auctioneer is a statement of opinion and does not constitute a warranty or representation.

An employee of Auctioneer may not alter the Terms of Sale, and, unless signed by a principal of Auctioneer, any alteration is null and void.

This sale is not on approval.

18. **Important Notice About Grading.** Grading is an art, not a science, and therefore the opinion of others (including trained experts), and the same expert may not grade the same coin with the same grade at two different times. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of ANACS, Hallmark, INS, NCI, NGC, PCGS, or any other grading service at any time in the future. Due to changing grading standards over time and to possible mishandling of coins by subsequent owners, the Auctioneer reserves the right to grade coins differently than shown on certificates from any grading service that accompany the coins. For the same reason as stated above, the Auctioneer reserves the right to grade coins differently than the grades shown in the catalog should such coins be reconsigned to any future auction.

Although consensus grading is employed by grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a coin was broken out of a plastic holder and was resubmitted to another grading service or even the same service, the coin could come back a different grade.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.

The degree of liquidity for certified coins will vary according to general market conditions and the particular coin involved. For some coins there may be no active market at all at certain points in time.

19. Some of the coins in this sale may have been graded by the Numismatic Certification Institute (NCI, an affiliate of the Auctioneer).

Important Note -- The grading standards used by NCI generally result in a coin receiving a higher grade than the "consensus" grade that would be assigned by most dealers. The grading standards reflected in the Coin Dealer Newsletter (CDN) are stricter than NCI's and, accordingly, CDN prices in general significantly overstate the wholesale value of NCI graded coins. The Certified Coin Dealer Newsletter (CCDn), P.O. Box 11099, Torrance, CA 90510 is a better wholesale reference for NCI certified coins than the CDN.

20. Any dispute after the settlement date, October 24, 1991, is strictly between the bidder and consignor without involvement or responsibility of the Auctioneer.

The Auctioneer or affiliates of the Auctioneer, may consign items to be sold in this auction sale and may bid on those items or any others in the sale. The Auctioneer or affiliates expressly reserve the right on its lots to modify its bids at any time based upon data made known to the Auctioneer or its affiliates. In the event of a typographical error or attribution error, the Auction may, at the Auctioneer's sole discretion, correct the error orally at the sale, or, if discovered at a later date, to refund the buyer's money without further obligation. Under no circumstances shall the obligation of the Auctioneer to any bidder be in excess of the buyer's premium for any lot in dispute. If any disputes arise regarding payment, authenticity, or grading between the bidder and Auctioneer, the Auctioneer, at its sole discretion, may submit the disputed matter to binding arbitration in accordance with the rules of the Professional Numismatists Guild, to which the bidder, by placing a bid and thereby accepting these Terms and Conditions of Sale, agrees to be bound.

21. In consideration of participation in the auction and the placing of a bid, a bidder expressly releases Auctioneer, its affiliates, the Consignor, or Owner of the Lot from any and all claim, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned grade or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Sale or otherwise, except as specifically declared herein; e.g., authenticity, typographical error, etc., and as to those matters, the rights and privileges conferred therein are strictly construed and exclusive remedy and shall be waived by Purchasers by noncompliance to its express terms.

The October 1991 Long Beach Bullet Auction

A 10% Buyer's Premium is added to the Hammer Price on each lot.

There are Special Payment requirements for this Bullet Sale. Before you bid, please read Terms and Conditions of Sale, Section 5.

All certified coins are designated by the initials of the certification company listed before the grade.

HALF-CENTS

5001 PCGS 1804 MS 62 Brown. B-11, R.2. Well struck throughout with glossy brown surfaces. Breen notes that prior to 1965 this variety was rare in mint condition. Since then a number of mint state pieces have surfaced, most of which have soft, uneven strikes. This piece may be from the hoard released some 25 years ago, but it looks as though it is one of the better survivors, especially with regard to the strike. One of 13 pieces to have been so graded by PCGS.

5002 PCGS 1805 AU 58. B-1, R.1. Lustrous, glossy surfaces with brown color over most of both sides with slight variations in hue, especially noticeable on the reverse. This coin appears to be considerably undergraded.

5003 PCGS 1855 MS 63 Brown. A pleasing original specimen, weak in portions of the denticles, but otherwise sharp.

5004 PCGS 1855 MS 63 Red and Brown. The obverse displays a pale rose-violet tint while the reverse is more uniform golden-tan color.

LARGE CENTS

5005 PCGS 1794 VF 30 S-57. R.1. The Button Variety, so named because of a diminutive slip that left a small crater in the neck, the bottom of the wig that resembles a button. Good details for the grade with even-toned, light reddish-brown and gray color.

5006 PCGS 1804 AU 55 S-256. R.2. Large Date, Large Fraction. A pleasing coin with attractive light color in the fields, being slightly darker in the protected areas and showing no considerable marks. Choice for the grade.

5007 PCGS **1846 MS 64 Red.** Small Date. Well struck with complete original red color and attractive. Large cent and very scarce as such. In fact, this is the only 1846 cent that has been certified in any grade by either of the major grading services with the red luster intact.

5008 NGC **1848 MS 66 Brown.** Deeply struck with tinges of coppery-red in the protected areas. Although minted in substantial numbers, the 1848 is actually much scarcer in full uncirculated condition than most of the Braided Hair issues which follow it. As an MS-66, this is currently the highest graded 1848 cent by either service and, as such, should stir considerable interest among large cent specialists.

5009 NGC 1851 MS 65 Brown. Sharply struck with glossy brown surfaces and tiny portions of original red seen in and around the devices.

5010 NGC 1853 MS 65 Red and Brown. Glossy surfaces which exhibit tinges of reddish-gold about the devices. Well struck and virtually unblemished.

5011 ANACS 1855 AU 55. Upright 5s. Brown with minimally marked surfaces.

FLYING EAGLE CENTS

5012 NGC 1858 MS 64. Small Letters. Fully struck with light pinkish-tan color over most of the surfaces and slightly darker brown on the devices. Excellent luster.

INDIAN CENTS

5013 NGC 1864 Copper-Nickel MS 64. Bright surfaces with a reddish-pink color over both sides.

5014 PCGS 1864 Copper-Nickel MS 65. Fully struck with light, bright golden-tan color. A lovely gem example of this short-lived type. Only 20 gems have been graded by PCGS, only 3 are finer.

5015 PCGS 1885 MS 64 Red and Brown. Deep cherry-red color with just a touch of brown.

5016 PCGS 1886 MS 62 Red and Brown.

5017 PCGS 1905 MS 65 Red. Fully struck with even, glowing mint luster. Nice looking coin.

5018 PCGS 1906 MS 65 Red. Bright orange-red luster. A nice coin with lots of flash.

5019 NGC 1907 MS 64 Red. Sharply struck with even red color.

5020 PCGS 1862 PR 64. Bright tan and honey-golden color with good reflectivity in the fields, especially on the obverse. This is a very pleasing, upper-end example of this scarce five year type that is only held back from grading higher by the presence of a shallow planchet flaw in the lower left obverse field.

5021 PCGS 1880 PR 64 Red and Brown. Fine depth of mirrors, with only a tiny carbon spot to the right of D in UNITED.

5022 PCGS 1884 PR 63 Red. Bright colors.

5023 PCGS 1894 PR 64 Red and Brown. Good mirrors with more red on the obverse than the reverse.

5024 PCGS 1907 PR 64 Red. Bright color with good reflectivity in the fields.

LINCOLN CENTS

5025 PCGS 1909 V.D.B. MS 66 Red. Blazing luster.

5026 PCGS 1909-S MS 64 Red. A lovely example of this scarce, semi-key issue. Even, light color with carbonless features. A coin with claims to a higher grade.

5027 PCGS 1910-S MS 64 Red and Brown. The obverse has faded a bit more than the reverse, exhibiting a speckled, matte-like appearance.

5028 PCGS 1910-S MS 64 Red and Brown. Identical in grade and probably from the same original source as the previous example.

5029 PCGS 1912 MS 65 Red. Fully struck.

5030 PCGS 1912-S MS 63 Red and Brown. Well struck with attractive colors.

5031 PCGS 1913-D MS 64 Red. Fully struck with even color.

5032 NGC 1913-S MS 64 Red. Attractive red luster and well struck.

5033 NGC 1916-S MS 63 Red and Brown. Subdued reddish-brown color with a few small marks.

The October 1991 Long Beach Bullet Auction

5034 NGC 1917-D MS 64 Red and Brown. Glossy surfaces, sharply struck.

5035 NGC 1917-S MS 64 Red and Brown. Fully struck and lustrous with much original luster remaining.

5036 PCGS 1918 MS 64 Red. Fiery orange-red color and fully struck in every detail.

5037 PCGS 1918-D MS 64 Red. Full pinpoint detailing with rich red color.

5038 PCGS 1919 MS 65 Red. Glowing orange-red luster.

5039 NGC 1919-D MS 63 Brown. Although labeled as Brown, there is still a significant amount of underlying red remaining.

5040 PCGS 1919-D MS 64 Red. An attractive, upper-end coin.

5041 NGC 1919-S MS 64 Red and Brown. A clean, upper-end example of this scarce issue. Superb, glittering luster with orange, red, and light brown iridescence. One of only 4 pieces to have been so graded by NGC.

5042 PCGS 1920-S MS 64 Red and Brown. Slightly mellowed color. Only 21 have been so graded by PCGS.

5043 NGC 1921 MS 64 Brown.

5044 NGC 1922-D MS 63 Red and Brown. Softly struck but showing very little browning on either side.

5045 PCGS 1924-D MS 63 Red and Brown. Glossy brown surfaces with significant portions of original red remaining around the more protected areas of the devices and in the fields.

5046 NGC 1925-D MS 63 Red and Brown. Bright mint luster around the devices on the obverse, more so on the reverse.

5047 PCGS 1925-S MS 64 Red and Brown. Bright orange, red, and olive color. A nice coin that would easily fit into a gem set.

5048 PCGS 1928 MS 65 Red. A blazer.

5049 PCGS 1928-S MS 64 Red. Full strike.

5050 PCGS 1928-S MS 64 Red. Even red color, just a couple of small reverse marks.

5051 NGC 1928-S MS 64 Red. Full strike.

5052 PCGS 1928-S MS 65 Red. Well struck with superb, bright orange-red color.

5053 NGC 1928-S MS 65 Red. Bright, flashy mint luster.

5054 ANACS 1928-S MS 65 Red. Glowing red luster and fully struck. Quite scarce.

5055 PCGS 1972 72 Doubled Die MS 65. Red. Blazing red color.

5056 PCGS 1972 72 Doubled Die MS 65. Red. Sharply struck with superb color.

5057 PCGS 1972 72 Doubled Die MS 65 Red. Deep cherry-red color with orange on the central device of Lincoln.

5058 PCGS Ten (10) 1972 72 Doubled Dies MS 65 Red. Even red color on each side, a uniform group of coins and a lot sure to be of interest to dealers and investors alike. (Total: 10 coins)

5059 PCGS **1909 V.D.B. PR 64 Brown.** This is an excellent value in this rare, key date issue. The surfaces have been labeled as Brown by PCGS but we see considerable underlying mint red on both sides. The surfaces are exceptionally clean and seem to be spot-free. This coin is one of only 3 pieces that have been so graded by PCGS.

5060 NGC 1937 PR 65 Red. Even red color, deeply mirrored.

5061 PCGS 1938 PR 66 Red. A sparkling, spot-free example, very much in the upper echelon of Proof 1938 Lincolns. PCGS population of 25, just one higher.

5062 PCGS 1939 PR 64 Red, 1940 PR 64 Red, and a 1941 PR 64 Red. This is an interesting group of proof cents in that the color is so uniform from one coin to the next, all having the same "look." (Total: 3 coins)

5063 PCGS 1939 PR 66 Red. A fresh, unfaded example showing a hint of milky patina on the reverse. Quite scarce in this lofty condition, with a PCGS population of 29, none higher.

5064 PCGS 1940 PR 66 Red. Even scarcer at this grade level than the 1938 and 1939 which preceded it. One of only 12 graded as such by PCGS, along with a lone PR 67 Red.

5065 NGC 1950 PR 65 Red. Virtually no reflectiveness on the obverse, more resembling a Satin Finish of 1936, moderately mirrored on the reverse. Bright, original color.

TWO-CENT PIECES

5066 PCGS 1871 MS 63 Brown. Fully struck with even brown color.

5067 PCGS 1870 PR 64 Red and Brown. Both sides are naturally toned in a pale lilac hue and are highlighted on the obverse in splash of yellow-gold.

5068 PCGS 1872 PR 64 Red and Brown. Mottled violet toning is deepest on the left portions of either side.

5069 PCGS **1873 Closed 3 PR 65 Red and Brown.** The Closed 3 coins are all originals, struck in 1873. Unlike many coins of this issue this piece does not have dull surfaces. Rather, it is bright and vibrant with good depth of reflectivity in the fields and much orange-red color. One of only 43 pieces to have been so graded by PCGS, only 3 others have been graded any finer.

THREE-CENT SILVER

5070 PCGS 1851 MS 64. Very sharply struck with bright aqua and deep russet toning. A popular first year of issue.

5071 NGC 1851-O MS 63. Original gray toning, with deeper russet shades outside of the central devices. A scarcer date and very popular as the only O-mint of this denomination.

5072 PCGS **1864 MS 65.** Gorgeous iridescent toning frames both sides of this elusive business strike issue. One of just 12,000 pieces struck, this splendid prooflike specimen is one of a mere five pieces graded as such by PCGS, with an additional 12 pieces coming in at a higher grade.

THREE-CENT NICKELS

5073 PCGS 1878 PR 66. A near flawless, untoned example of this proof-only date.

5074 NGC 1882 PR 66. Superb surfaces that are virtually perfect and show only the slightest color. A real bargain at today's prices.

5075 PCGS 1883 PR 66. Dazzling, deeply reflective proof mirrors and so light in color that the coin almost seems untoned.

5076 PCGS 1885 PR 65. Deeply mirrored fields. A choice example of this popular, low-mintage issue.

The October 1991 Long Beach Bullet Auction

SHIELD NICKELS

5077 PCGS 1866 Rays MS 64. Sharply struck with lustrous gray-brilliant surfaces. An attractive and affordable example of this popular, short-lived type.

5078 PCGS 1868 MS 64. Light golden-rose patina with strong underlying luster.

5079 NGC 1874 MS 64. A lustrous coin that is light in color and that shows a couple of die cracks and a shallow planchet flake.

5080 NGC 1872 PR 65. Carbonless surfaces that display a subtle pastel iridescence, evenly matched on each side. Only 25 pieces have been so graded by NGC.

5081 NGC 1873 PR 63. Untoned with deep mirrors in the fields.

5082 NGC 1876 PR 63. Deep mirrors in the fields with light reddish-golden toning.

5083 PCGS 1876 PR 65. A popular centennial year issue which, in PR-65 condition, is at least twice as scarce as the later proof issues.

5084 PCGS 1878 PR 65. A spot-free, untoned example. Popular proof-only date.

5085 PCGS 1878 PR 65. More deeply mirrored than the previous specimen, with a touch of milky patina on either side. Proof-only issue.

5086 NGC 1879 PR 64. Reflective fields with pinkish toning over both sides.

5087 PCGS 1880 PR 64. Light, attractive toning. This is a sharp upper-end example of this scarce date.

5088 PCGS 1882 PR 65. Tweaked obverse with hints of gold about the reverse letters.

5089 PCGS 1883 PR 65. A lovely example of this popular date. The fields are deeply mirrored, but the center of the obverse is light in color with deeper golden-russet around the edge. The reverse is pale silver.

LIBERTY NICKELS

5090 NGC 1884 No Cents MS 64. Frosty-struck, lustrous, and lightly toned.

5091 NGC 1891 MS 63. Sharply struck with superb luster. Toned.

5092 NGC 1892 MS 63. Lustrous, and lightly toned.

5093 NGC 1896 MS 64. Light, even toning with good underlying luster.

5094 NGC 1905 MS 64. Clean and sharp beneath milky pastel toning.

5095 NGC 1908 MS 63. Light in color with one facial mark that prevents a higher grade.

5096 PCGS 1910 MS 63. Blue-purple centers with golden edges.

5097 ANACS 1910 MS 64. Sharply defined with a hint of steel-gray toning across the obverse.

5098 NGC 1912 MS 63. Lovely iridescent toning with superb mint luster.

5099 NGC 1912-D MS 64. A very bold striking with rich golden-steel toning blanketing the lustrous surfaces.

5100 PCGS **1883 No Cents PR 66.** A breathtaking Proof specimen, displaying excellent contrast beneath soft blue and gold pastel toning. One of just 16 pieces of this one-year type coin graded by PCGS, with only 4 higher.

5101 PCGS **1883 With Cents PR 66.** Immaculate surfaces overlaid in splashes of pale lavender color and a streak of yellow-gold down the reverse. Despite its rather hefty Proof mintage, a scarce coin in superb condition, as evidenced by its meager PR-66 population of just 17 pieces, none higher.

5102 PCGS 1884 PR 65. Deep, watery pools of reflectivity in the fields with golden-reddish color on the obverse, brilliant on the reverse.

5103 NGC 1885 PR 64. The surfaces on this key-date issue are razor sharp and draped in olive-gold patina.

5104 PCGS 1888 PR 65. Even, deep golden toning over both sides with bright underlying reflectivity.

5105 PCGS 1889 PR 65. Pink, blue, and golden-rose iridescent toning. A very attractive coin.

5106 NGC 1895 PR 63. Flashy proof mirrors with light toning.

5107 NGC 1905 PR 63. Virtually untoned with very deep mirrors in the fields.

5108 NGC 1909 PR 65. Traces of green and rose iridescence in the fields.

5109 NGC 1910 PR 65. A blend of gray and apricot toning covers both sides, masking some Mint-caused scratches beneath Liberty's ear.

5110 NGC 1910 PR 65. Lovely pinkish-gray toning, shading to milky iridescent shades in an area on and before Liberty's face.

BUFFALO NICKELS

5111 NGC 1913 Type One MS 65. Highly lustrous with light blue-rose and olive patina.

5112 NGC 1915 MS 65. Golden-toned with glossy mint luster.

5113 PCGS 1915-D MS 63. Olive-gold surfaces which, like most 1915-D Buffaloes, are a trifle weak in highpoint detail.

5114 PCGS 1915-S MS 64. Light in color with an incredibly detailed strike. Showing evidence of die clashing on the obverse--most unusual for a 20th century mint product.

5115 NGC 1919-D MS 64. A very select example of this tough early Buffalo, featuring thick, satiny luster and strong definition.

5116 NGC 1921 MS 66. A colorful, high grade example outlined in yellow-gold and iridescent shades. One of just nine pieces currently graded as such by NGC, with only a single example (by PCGS) graded higher by either service.

5117 PCGS 1924-D MS 63. Golden peripheral toning on the obverse, along with violet and antique-gold shades highlighting the reverse. Typical weak reverse.

5118 NGC 1928-D MS 64. Pink and lilac toning, softly struck on the obverse.

5119 PCGS 1928-S MS 64. Brightly lustrous with speckled golden toning more evident on the reverse. A very difficult date to locate any nicer.

5120 PCGS 1929-S MS 64. Attractive golden-brown toning. Well struck on the reverse, a bit soft on the obverse.

5121 NGC 1935-S MS 66. A pristine, uncommonly well struck

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)●Texas WATS: 1-800-448-6470●Texas Phone: 214-528-3500

specimen overlaid in blushes of lovely champagne-gold toning.

5122 PCGS 1936-S MS 65.

5123 PCGS 1937 MS 66. Highly lustrous.

5124 PCGS 1938-D MS 66. Golden toning.

5125 PCGS 1938-D MS 66. A superb example, draped in a light golden toning.

5126 NGC 1936 Type One PR 66. A spectacular satin-finished Buffalo, majestically toned on both sides in streaks of apricot color. The surfaces are vibrant and free of imperfections.

JEFFERSON NICKELS

5127 PCGS 1942 Type Two PR 67. Concentric rings of iridescent color on the obverse and showing considerable depth of reflectivity in the fields. A one-of-a-kind coin.

EARLY HALF DIMES

5128 PCGS 1795 Fine 15. V-6, R.5. Even, monochromatic gray patina over both sides; the surfaces are free from out-of-the-Mint abrasions but there are several adjustment marks on the lower half of the reverse. An original example of this scarce and popular two-year type.

5129 PCGS 1795 VF 35. V-4, R.4. Toned a deep blue and gray with rose tinted accents; the toning subdues the numerous scratches seen on both sides. Very sharply struck, especially on the obverse with strong hair detail on Liberty.

5130 NGC **1795 MS 65.** V-8, R.7. Possible Specimen Striking. The V-8 variety is exceptionally rare with only an estimated five pieces known. Presentation pieces are also known to have been struck from these dies (see Breen Encyclopedia, page 277), and we believe that this coin is one of those. The coin is very sharply struck in most areas, showing only localized weakness on the stars on the left side (it is inevitable that some weakness be apparent on coins struck on a screw press). The surfaces are unusually clean and show none of the usual evidence of coin to coin contact. But perhaps the most telling feature of the special nature of this coin are the reflective fields. The sheen from the polish in the fields is so strong that the deep blue and gray toning cannot subdue their flash. This is an extraordinary coin. Only one other gem has been graded by NGC and none are finer.

5131 PCGS 1830 AU 50. Original deep toning, the reverse is especially lustrous for a 50 coin.

5132 PCGS **1830 MS 65.** Spectacular golden and blue-green toning covers the obverse. This boldly struck, frosty example is one of just seven 1830 half dimes to grade MS-65 at PCGS, with only three finer.

5133 PCGS **1830 MS 66.** A fully struck jewel that is almost completely brilliant, only showing a faint crescent of golden-brown color at the bottom of the obverse. The most dominant feature of this coin, though, is its bright coruscating luster that rolls around each side as it is slowly tilted beneath a light. Only 1 other piece has been so graded by PCGS with 1 coin being finer.

5134 PCGS 1831 MS 63. This is a very attractive Bust half dime with bright, flashy fields that cannot be subdued by the deep blue and golden-rose toning seen on both sides. Fully struck.

5135 NGC 1831 MS 64. Generously toned on both sides in steel-violet, deep golden and blue-green hues. The strike is quite sharp overall and only the slightest hairlines are noticed in the left obverse field.

5136 NGC 1832 MS 62. Well struck and lustrous beneath dusky golden-gray toning.

5137 PCGS 1832 MS 63. Well struck and toned a uniform olive-gray.

5138 NGC 1833 MS 64. Satiny and very bold, with light russet toning about the stars and date.

5139 PCGS **1836 MS 66.** A pristine, original Bust half dime draped in eye appealing blends of rose-violet, yellow-gold and silvery-blue toning which truly captivate the viewer. The strike, while less than full, is certainly quite adequate for a coin of this remarkable condition. One of just three pieces graded as such by PCGS, with none awarded a higher grade.

SEATED HALF DIMES

5140 PCGS 1837 No Stars MS 62. Multi-colored rings of color on the obverse with a tamer reverse. Quite clean for the grade and overall an attractive example of this popular and scarce type coin.

5141 PCGS 1838 No Drapery MS 64. Fully struck in all areas, even the stars, with brilliant surfaces. An attractive example of this popular type coin.

5142 NGC 1839 No Drapery MS 63. Deeply toned. The least common of the three Philadelphia No Drapery issues in mint state condition.

5143 NGC **1841-O MS 65.** A condition census example of this rare (in mint state) New Orleans half dime. The surfaces are extremely sharp, free of visible marks and toned in rich steel-gray and autumn shades. Both services have graded a paltry eight coins in all uncirculated grades. As of September, 1991, this is tied with one other coin as the finest graded by NGC, with PCGS grading nothing higher than MS-64!

5144 PCGS 1844-O XF 45. An originally toned example of this very scarce, key date issue. Trends $725 in XF, $1,600 in AU. This coin also appears to be the much rarer Large Mintmark variety.

5145 PCGS 1848 Large Date MS 63. The Large Date is a scarce and widely recognized variety that was apparently caused by using the dime logotype for the date rather than the one for the half dime. One of only 9 pieces to have been so graded by PCGS, this piece shows original, attractive blue-gray toning and is fully struck.

5146 PCGS **1849-O MS 64.** Both sides of this condition rarity are toned in original steel-violet and bluish hues. The strike is a tad soft on the highest points, characteristic of this date and mintmark. As of September, 1991, only five mint state examples had been graded by PCGS, four of which grade MS-64.

5147 PCGS 1851-O MS 63. A sharp and attractive coin for the grade with mild semi-prooflike fields, covered with a layer of light golden color. One of the more commonly available O-mint half dimes.

5148 NGC 1852 MS 63. Sharply struck with golden and lilac toning.

5149 NGC **1853-O Arrows MS 65.** A satiny gem, toned in rich splashes of violet and sea-green. Perhaps ten times scarcer in mint state than its P-mint counterpart and one of just 4 specimens graded MS-65 by both services, the only such example graded similarly by NGC.

5150 NGC **1858-O MS 64.** Rich russet and blue highlights about the peripheries. A much scarcer Stars Obverse date

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)●Texas WATS: 1-800-448-6470●Texas Phone: 214-528-3500

with a curiously higher NGC population of 18 pieces in this grade, as opposed to a single PCGS specimen. Trends $700 in MS-63.

5151 NGC **1860 Transitional MS 64.** Semi-prooflike with only a bit of splotchy toning on the obverse. A most popular pattern issue, generally included among the regularly issued half dimes, with a listed mintage of a mere 100 pieces. Trends at $8,500 in MS-63 and one of eight pieces graded as such by NGC, along with seven in higher condition.

5152 NGC 1861 MS 64. Bright satiny luster with hints of golden color about the borders.

5153 ANACS 1861 MS 64. Violet and sea-green toning about the edges, with noticeable die clashing on the obverse.

5154 ANACS 1862 MS 63. A lustrous, silvery-gray example, toned in streaks across the reverse.

5155 PCGS **1863 MS 66.** A shimmering, fully struck example of this rare Civil War era date, with splashes of light russet toning about the date and lettering on the obverse and, in a deeper shade, about the wreath on the reverse. One of just 18,000 business strikes issued and only nine MS-66 specimens graded by PCGS as of September 1991.

5156 PCGS 1869 PR 64. Deeply toned in shades of royal blue, red, and russet. The flash of the proof mirrors is still abundantly evident in the fields.

5157 PCGS 1871 PR 64. A dazzling white cameo featuring impressive contrast between fields and devices.

EARLY DIMES

5158 PCGS 1797 Very Small Eagle, JR-2, R.4. Although of low grade, this coin has an appealing look to it both visually and aesthetically. The centers have a light gray patina while the edges show a delightful red and blue toning. On the neck of Liberty the tip is what appears to be a Mint plug--when placed here, most likely right after Mint would insert a small piece of metal to make the planchet of the proper weight. If that is not what this is we would appreciate a reader informing us of the exact nature of this particular piece.

5159 PCGS 1800 AU 53. JR-1, R.1. Sharply struck with satiny, original luster. The centers are light in color with golden-brown and blue-green toning.

5160 Heilbrunk 1801 XF 40. 4 Berries. JR-2, R.2. Light in color with only a touch of toning on the top of the obverse. Lightly burnished.

5161 NGC **1820 MS 64.** Large O. An impressive Large Size Bust dime, generally very well struck and displaying splashes of golden toning over both sides of the coin.

5162 PCGS 1836 MS 61. Mildly prooflike with milky patina overlaying the obverse. A few minor scrapes are noted in the reverse fields, the most serious to the left of the eagle's beak.

5163 PCGS 1845 MS 63. Well struck with attractive soft blue and golden-brown patina. A nice type coin.

LIBERTY SEATED DIMES

5164 PCGS 1838 Partial Drapery MS 63. Technically a No Drapery dime, the so-called Partial Drapery variety actually had nothing to do with a conscious design change. Rather, it was created by die flashing with the stand of the E from the reverse showing up beneath Liberty's elbow, simulating drapery. The Partial Drapery has been accepted for many years by collectors and is a very scarce item. Only one other coin has been certified in mint state of this variety, that coin also being MS 63, making this piece tied for the finest known. This piece is fully struck with each side covered by a smokey golden-gray patina with bright underlying luster.

5165 PCGS 1842 MS 63. Sharply struck with mostly brilliant surfaces that have taken on a light, scattering of gray patina over both sides.

5166 NGC 1852 MS 64. A shimmering, boldly detailed example, partially framed on the obverse and blanketed on the reverse in attractive golden-gray toning. One small spot rests to the right of the 12th star. One of the more available Stars Obverse dates in Mint State, but still fairly scarce at this grade level. NGC population: six pieces, with four higher.

5167 PCGS **1854-O Arrows MS 64.** An enchanting type coin with original surfaces that are toned a light golden-rose on each side, darkening considerably at the bottom of the obverse. The coin has a thick mint frost that underlies the original patina and the devices are all fully struck. Although a 64 coin (and one of only 11 to have been so graded), we believe this piece is very close to full gem condition--it certainly has the originality and eye appeal of a gem.

5168 PCGS 1859-O MS 60. Steel-toned surfaces, boldly defined and highlighted in olive-gold.

5169 PCGS 1859-O MS 62. Full, pinpoint striking detail with deeply mirrored prooflike fields. The centers are light in color but the edges have taken on a russet and blue toning at the edges.

5170 PCGS **1859-O MS 64.** Satiny and sharp, with hints of charcoal toning outlining the stars and date on the obverse. Just fifteen MS-64 specimens have been graded by PCGS as of September, 1991, roughly a tenth of the entire Stars Obverse population.

5171 PCGS **1865 MS 66.** A magnificent example of this low-mintage (10,000) rarity. The devices are ultra frosty and are outlined on both sides in crescents of russet toning. PCGS has graded just two MS-66s to date, in addition to a solitary 67.

5172 NGC 1874 Arrows AU 50. Originally toned and definitely a cut above most coins of this grade.

5173 NGC 1875 MS 64. Both sides are colorfully toned in concentric shades of blue-green, gold and burnt-orange.

5174 NGC 1883 MS 65. A magnificent coin with thick mint frost. The obverse is brilliant except for an arc of color on the bottom. The reverse, on the other hand, is toned a deep blue-green and rose. Fully struck.

5175 NGC 1884 MS 64. Fully defined, with bright satiny luster. The obverse is toned a light russet and blue which deepens about the date and lettering.

5176 NGC 1889 MS 64. Toned a natural golden-gray.

5177 NGC 1890 MS 64. Golden-brown toning, a bit lighter on the reverse. A choice, moderately priced example of the Legend Obverse type.

5178 NGC 1891 MS 65. Milky toned with attractive reddish-orange peripheral highlights. Some softness is noticed on Liberty's head, normal for this date.

5179 NGC 1891 MS 65. Gray and golden toning, deepest about the date and obverse lettering.

5180 NGC **1858 PR 64.** Watery proof surfaces, toned a light gray in the protected areas. One of a mere 80 proofs reportedly struck and additionally desirable due to the scarcity of Stars Obverse proofs. NGC population: six pieces, with only two finer.

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)● Texas WATS: 1-800-448-6470● Texas Phone: 214-528-3500

5181 NGC **1874 Arrows PR 64.** Rich multicolored toning blankets the obverse and outlines the reverse. A rare and desirable two-year type, one of 700 proofs struck for the year, of which PCGS and NGC combined have graded only 14 pieces higher.

5182 PCGS 1884 PR 63. Attractive two-toned surfaces displaying speckled golden-brown toning mostly about the obverse border.

5183 PCGS **1885 PR 65.** A sparkling proof example, with pleasing contrast and untoned save for a splash of milky patina along the right half of the obverse.

5184 PCGS 1886 PR 64. Deep, hazy blue and purple toning with strong mirrors in the fields that still flash through when held beneath a light.

5185 PCGS 1887 PR 63. Golden-gray peripheral toning. Very pleasing for the grade and an excellent buy at current price levels.

5186 PCGS 1888 PR 61. The obverse displays scattered hairlines, but the reverse is considerably finer.

5187 NGC 1889 PR 64. Choice mirror surfaces overlaid, on both sides, in gray and iridescent toning.

BARBER DIMES

5188 NGC **1895 MS 65.** An original coin with a virtually untoned center on the obverse and scattered peripheral color. The reverse is toned in deep shades of brown and blue. Superior luster. Very scarce in gem condition with only 2 others having been so graded (PCGS has only graded 2) with none finer.

5189 NGC 1898 MS 63. Fully struck and deeply toned.

5190 NGC **1907-O MS 65.** A very scarce date in the upper reaches of mint state. In gem condition only 5 other coins have been graded by NGC with only piece being finer. This coin is well struck with good definition along the brow of Liberty. While the centers are light in color, the edges on both sides have taken on a deep red, blue, and green patina that is most attractive. Bid on the September Monthly Summary is $4,000.

5191 PCGS **1908-O MS 65.** Vibrant luster and pinpoint detail beneath finely mottled golden-violet and pastel-green toning. As a date, the 1908-O is quite rare in gem condition. As of September, 1991, PCGS had graded just three MS-65 specimens, along with two others of higher grade.

5192 PCGS **1909-D MS 66.** Superb, original surfaces that have taken on a green, gray, rose, and golden toning with randomly placed streaks of brilliance on each side. Quite scarce in high grade with only 2 other coins having been so graded by PCGS, none are finer. Bid on the September Monthly Summary is $3,600.

5193 NGC **1910-D MS 66.** A satiny, mark-free example draped in natural steel-violet toning, with small patches of brilliance visible on either side. Very scarce as a date, particularly in superb condition where only three MS-66 specimens have been graded by both major grading services, two of those in NGC holders.

5194 NGC 1911-D MS 63. Original gray, with mottled orange-gold overtones.

5195 PCGS 1905 PR 63. Deep multi-colored toning with good reflectivity.

5196 NGC **1908 PR 67.** In addition to the technical perfection one would expect from a coin in this grade, this piece also has that extra something that propels it into the top 1% of all Barber dimes. And that extra something is eye appeal. It is difficult not to look at this coin. The sheer beauty of its bright, multi-colored toning is enhanced even more by the highly reflective proof mirrors in the fields. A stunning type coin and one of only 2 pieces to have been so graded by NGC.

MERCURY DIMES

5197 NGC 1916 MS 64 Full Bands. A clean and highly lustrous example of this popular first year of issue. Mostly brilliant with a few small specks of russet on each side.

5198 NGC 1919-D MS 65. Although the central bands are not separated, the surfaces are otherwise very lovely and the coin is easily of gem quality with bright, almost untoned, features and superb luster. A very scarce issue with only 1 other coin having been so graded by NGC.

5199 PCGS **1921 MS 64 Full Bands.** Light in color with a satiny, matte-like texture. We see very little to keep this rare, key date issue from the gem category. Only 43 other pieces have been so graded out of the low mintage of 1.2 million.

5200 PCGS 1926-D MS 64 Full Bands. Frosty and very well struck, with beginnings of golden toning about the devices.

5201 PCGS 1928-S MS 63. Pleasing olive-gold toning frames a portion of the obverse. The reverse is toned a milky golden-gray.

5202 PCGS 1929 MS 64 Full Bands. Dazzling mint brilliance.

5203 PCGS 1934 MS 67 Full Bands. A virtually perfect specimen, featuring pristine surfaces and pastel gold highlights on the reverse. One of 22 pieces graded as such by PCGS, with just one higher.

5204 PCGS 1934-D MS 66 Full Bands. Smooth satiny luster with the lightest touch of golden color. One of only 11 pieces to have been so graded by PCGS.

5205 PCGS 1935 MS 66 Full Bands. Scattered speckles of golden-russet around the edges.

5206 PCGS 1935-D MS 64.

5207 PCGS 1936-S MS 65 Full Bands. Lustrous.

5208 PCGS 1936-S MS 65 Full Bands. Frosty mint luster.

5209 PCGS 1936-S MS 66 Full Bands. Nearly perfect surfaces.

5210 PCGS 1937 MS 66 Full Bands. Pristine surfaces.

5211 PCGS 1937 MS 66 Full Bands. Brilliant with superb mint luster.

5212 PCGS 1937 MS 66 Full Bands. Flashy mint brilliance.

5213 PCGS 1937-S MS 66 Full Bands. Superb luster with bright toning on the reverse.

5214 PCGS 1938-S MS 66. Superior luster and overall surfaces. Partial bands.

5215 PCGS 1938-S MS 65 Full Bands. Deeply struck with brilliant surfaces.

5216 PCGS 1939-S MS 65. Brilliant.

5217 PCGS 1940 MS 65 Full Bands. Dazzling mint luster.

5218 PCGS 1940 MS 66 Full Bands. Pale golden color with superb underlying mint frost.

5219 ANACS Four (4) 1941 MS 65. Three of the four pieces are brilliant while one has obverse toning and all but one has a

partial split in the central bands. (Total: 4 coins)

5220 PCGS 1942-S MS 65 Full Bands. Sharp looking coin. Brilliant.

5221 PCGS 1943-D MS 66 Full Bands. Pristine surfaces and outstanding luster.

5222 PCGS 1943-S MS 66 Full Bands. Soft, glowing luster. A super nice type coin.

5223 PCGS 1944-D MS 66 Full Bands. Pale lilac with traces of russet around the edges.

5224 PCGS 1944-S MS 66 Full Bands. Clean features with superb luster.

5225 PCGS 1944-S MS 67 Full Bands. An extraordinary coin. The obverse is perfect, only on the reverse can one find a couple of tiny abrasions. Brilliant with superb satiny luster. This is one of only 9 pieces to have been so graded with none finer.

5226 PCGS 1945-S MS 66 Full Bands. Pale golden color around the edges.

5227 PCGS 1947 PR 64. A dazzling, deep mirror example of this scarce low mintage early proof. Just a bit of light, hazy patina on each side.

5228 PCGS 1948 PR 65. An original coin with light, hazy toning. An attractive example of this scarce early proof.

ROOSEVELT DIMES

5229 NGC 1946-S MS 67. Seemingly perfect surfaces with Mint set toning.

EARLY QUARTERS

5230 PCGS 1807 VF 20. An original coin with deep gray color in the fields and lighter accents in the devices. Quite well detailed and very pleasing coin for the grade.

5231 PCGS 1807 XF 40. Well detailed for the date with bright gray-mottled tones. The surfaces are dark, as is the light golden-brown toning at the edge with an occasional purple-gray blotch.

LIBERTY SEATED QUARTERS

5232 PCGS **1840 MS 64.** Mostly brilliant, with sparkling semi-prooflike qualities in the fields. Some Mint-caused raised marks are noted across the figure of Liberty detracting only slightly from the overall condition. Very scarce in all uncirculated grades; PCGS has graded a total of only 7 being one of just two MS-64 specimens, along with a single MS-63 currently graded by PCGS.

5233 PCGS 1842 MS 61. Only 88,000 pieces were struck of this date and of those surviving today most are low grade. Mint state coins are very elusive--PCGS has only certified 4 pieces in all grades of mint state, the finest 2 being MS 64. Generally well struck with bright, almost untoned surfaces. The fields are mostly prooflike with only a trace of cartwheel.

5234 PCGS 1854 Arrows MS 63. Satiny and extremely well struck with just the lightest golden-gray tint to the obverse.

5235 PCGS **1858 MS 66.** A beautifully preserved, frosty specimen highlighted in original golden-rose toning and flashes of iridescent-blue along the borders. Not particularly rare as a date in lesser uncirculated grades, but, like all No Motto quarters, quite elusive in gem condition. One of just two pieces warranting an MS-66 grade from PCGS as of September, 1991, none grading higher.

5236 PCGS **1864 MS 63.** This is an exceptionally attractive coin with even, light golden toning over both sides, good luster showing through, and a strike that is complete in all areas. The 1864 quarter is a coin that, were one to only look at the mintage to get an indication of rarity, would seem to be available. This, of course, is not true as most of the mintage was melted during and just after the Civil War leaving very few coins in any condition, this date being scarce even in circulated grades. One of only 5 pieces to have been so graded by PCGS. Trends $1,800 (9/11).

5237 PCGS 1866 AU 50. Only 16,800 business strikes were produced of this rare date and of that number only a small handful exist in mint condition. This is an originally toned AU with sharp, clean surfaces.

5238 NGC **1867 MS 63.** It is most unusual to find this date as a business strike. Only 20,000 were made as little bullion came into the Mint after the Civil War; silver being worth more than its face value in currency. The fields of this piece are fully prooflike, but when closely examined one realizes there is no possibility of it being a proof--on the reverse the fields show myriad die striations--these would have been polished away on a proof striking. The strike is complete in the centers but the stars are weak also a non-proof trait and each side is covered with deep iridescent toning. This is the only coin to have been so graded by NGC. PCGS has only certified 4. Trends $2,000 (9/11).

5239 PCGS 1876-S MS 64. A high quality coin for the grade, sharply detailed and covered in natural golden-gray toning.

5240 PCGS **1877 MS 66.** Complete, pinpoint striking details on both sides. The surfaces are untoned in the centers with light golden peripheral color. This is a lovely Seated quarter and one of only 22 coins to have been so graded.

5241 PCGS 1891 MS 64. Bright, satiny luster, with only a light crescent of golden toning along the upper obverse edge.

5242 PCGS **1891 MS 65.** Untoned with subdued silvery-gray surfaces. Fully struck and a very handsome example of this popular final year of issue for the Seated design. One of 29 gems graded to date.

5243 NGC **1891 MS 65.** Frosty and choice, with a pale golden-rose toning splashed across the obverse and in a lighter hue, along the lower reverse border.

5244 PCGS 1877 PR 63. Violet and golden-brown toning overlays both sides, leaving only the figure of Liberty basically untoned.

BARBER QUARTERS

5245 ANACS 1892-O MS 64. Generally mark-free surfaces overlaid in a hazy golden-steel patina.

5246 NGC 1893 MS 64. Excellent luster with attractive, light golden-brown toning around the edges.

5247 PCGS **1899-S MS 65.** A scarce, low mintage issue that is worth a significant premium even in Good condition. In gem only 3 other coins have been certified by PCGS with 4 being finer. This piece has a pleasing gray and pink patina with strong underlying luster. Fully struck with no noticeable abrasions. Bid on the September Monthly Summary is $3,300.

5248 PCGS **1900-O MS 65.** Exceptionally well detailed with bright, vibrant mint luster that is mostly brilliant, only showing the lightest trace of pale golden patina on the obverse. This is a lovely, high-end coin and is, as well, a better date with only 6 gems graded by PCGS and 2 coins finer. Bid on the Monthly Summary for September is $4,400.

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza•Highland Park Village•Dallas, Texas 75205-2788•WATS: 1-800-US COINS (872-6467)•Texas WATS: 1-800-448-6470•Texas Phone: 214-528-3500

5249 PCGS 1901 PR 62. Steel-violet toning covers watery, two-toned surfaces. An attrative, if not exceedingly choice, example, one of 813 proofs minted.

5250 PCGS 1910 PR 64. Very deeply mirrored fields with thick, frosted devices. Each side has a layer of golden-reddish toning that enhances even more the already considerable eye appeal of this lovely coin.

STANDING LIBERTY QUARTERS

5251 PCGS **1916 MS 63.** Sharply struck with smooth surfaces. This piece is a very attractive example of this rare date, much finer than one might expect from the grade. Only 64 pieces have been so graded by PCGS.

5252 NGC **1916 MS 64.** The first thing one notices about this coin is its superb mint luster--thick and frosted with a light granularity to the surfaces. The coin is essentially untoned, showing a few spots of color here and there around the edge of each side. This is a most attractive example of this scarce, key date issue with an original mintage of only 52,000. One of only 24 pieces to have been so graded by NGC.

5253 PCGS 1917 Type One MS 62 Full Head. Pinpoint striking details in all areas and covered overall with a light gray patina.

5254 PCGS 1917-D Type One AU 55. Steely-gray toning and good head detail.

5255 PCGS 1917 Type Two MS 65. Milky golden-brown toning lightly coats the obverse and is splashed across the reverse.

5256 PCGS 1917 Type Two MS 65 Full Head. An exceptionally choice, frosty example, just starting to tone a delicate golden hue about the peripheries.

5257 NGC 1918 MS 64. Brilliant and highly lustrous.

5258 NGC 1918-S MS 65. Even gray toning over both sides with a light underlying iridescence on the reverse.

5259 PCGS 1920 MS 65. Untoned with superb luster and more than half of the head detail present.

5260 PCGS 1920 MS 65. Highly lustrous and framed, on the obverse, in pleasing golden color. The reverse displays a speckled golden toning.

5261 PCGS 1924-D MS 64. Gleaming white frosted surfaces.

5262 PCGS 1924-D MS 65. A vibrant, frosty white example, flat on Liberty's head but otherwise very well struck for the date.

5263 PCGS **1926-S MS 65.** Splendid golden-gray toning blankets frosty surfaces. This incredibly choice and attractive example is one of just 29 pieces graded as such by PCGS, with only one higher. Trends $4250 in MS-65.

5264 PCGS 1928-D MS 65. Flashy luster. An attractive coin that is certainly underpriced at today's levels.

5265 PCGS 1928-D MS 65. Light golden-gray toning adorns the reverse.

5266 PCGS 1928-D MS 65. Light silvery-gray, with pastel gold highlights.

5267 NGC 1928-S MS 66. Superb luster with pristine surfaces, both sides are toned in multi-colored shadings of golden, rose, and gray. Some head detail shows. One of 16 coins to have been so graded by NGC.

5268 PCGS 1929 MS 65. Very sharply struck with excellent luster and an arc of golden-olive color at the top of the obverse.

5269 PCGS 1929 MS 63 Full Head. Deeply lustrous, with attractive green-gold overtones.

5270 PCGS 1930 MS 65. Attractively toned with almost complete head detail.

5271 PCGS **1930 MS 66 Full Head.** Shimmering, mark-free surfaces under a milky layer of golden-brown toning. The most available Standing Liberty date in this lofty condition, but a very desirable 20th century type coin.

WASHINGTON QUARTERS

5272 ANACS 1935-S MS 65. Beautiful deep iridescent toning with clean features on each side.

5273 ANACS 1935-S MS 65. Golden-brown and blue toning.

5274 PCGS 1936-S MS 64. Brilliant on the obverse, lightly toned on the reverse.

5275 PCGS 1938 quarter MS 62; PCGS 1938 quarter MS 63; ANACS 1890-O dollar MS 62; and an ANACS 1897-S dollar MS 62, semi-prooflike. (Total: 4 coins)

EARLY HALF DOLLARS

5276 PCGS 1803 VF 30. Brilliant in the centers with blue and golden toning around the edges. Numerous small abrasions (consistent with the grade) but no adjustment marks.

5277 ANACS 1805 4 Fine 12. O-102. R.3. Although low grade, this is still an attractive and desirable example of this scarce overdate half dollar. The outline of the design is complete but the inner details are sketchy. The surfaces are light in color with the only noticeable area of toning being around the edges.

5278 PCGS 1806 VF 20. O-101. R.3. Actually an 1806 5 but not labeled as such on the PCGS insert. Light, almost untoned surfaces with no large or distracting marks.

5279 PCGS 1806 5 XF 40. O-101. R.3. Well struck and attractive, an unquestionably original coin, with light to moderate color on each side. There are also no major marks and no adjustment marks on either side. While we have not known that this overdate is a major condition rarity in the Bust half series, we find that this is the finest coin certified by PCGS to date, the next closest coin being a VF 25.

5280 PCGS 1833 MS 62. Well struck with medium gray and golden toning over both sides that is enhanced considerably by the sizzling underlying luster. A very nice looking coin and an especially good buy in this grade.

5281 PCGS 1839-O Reeded Edge AU 50. A scarcer date within the Reeded Edge half series that assumes a much greater significance because of the obverse mintmark--the only collectible mintmark in the series. Sharply struck with gray-olive patina and clean surfaces. Trends $1,400 (9/11)

LIBERTY SEATED HALF DOLLARS

5282 PCGS 1839 No Drapery VF 30. This is a pleasing, original coin with clean surfaces and moderately deep toning in most areas, although the center of the obverse is almost free from color. The 1839 No Drapery is quite a rare issue and a one year of type. Many high grade survivors, as Breen notes, have been vigorously cleaned and this issue is prohibitively rare in mint state.

5283 PCGS **1857 MS 65.** Steel-blue and olive-gold toning fills in

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)●Texas WATS: 1-800-448-6470●Texas Phone: 214-528-3500

the more protected areas of this impressive No Motto half dollar. The strike, other than a few stars to the right, is particularly sharp and abrasions are truly minimal. The population of this difficult type in MS-65 condition (67 coins) is well dispersed among the 56 different issues. Only three 1857 half dollars have been similarly graded by PCGS, with none having attained a higher grade.

5284 PCGS 1858 MS 63. Lustrous silvery-gray with antique-gold peripheral highlights.

5285 NGC **1861 MS 64.** Extremely sharp, with subtle die striations in the obverse field. Both sides exhibit rich reddish-gold and blue toning in the protected areas. A pleasing Civil War era half dollar.

5286 PCGS 1861-O MS 63. Lustrous and very well struck overall, though some weakness is evident, as always, about Liberty's head and surrounding stars.

5287 PCGS 1871-S AU 55. Sharply struck and generally untoned with almost complete luster remaining.

5288 PCGS 1877 MS 61. Fully struck and covered with deep gray patina and strong underlying iridescence on the reverse.

5289 PCGS **1879 MS 64.** Mostly brilliant with little trace of the usual prooflikeness seen on business strikes of this low-mintage (4,800 pcs.) date.

5290 PCGS 1879 PR 63. Good depth of mirrors with attractive oil-slick iridescence over both sides. Very scarce as a business strike making the proofs much more desirable than other, earlier dates.

5291 PCGS **1881 PR 64.** Much of the obverse is untoned showing strong contrast between the fields and devices while the balance of the coin is dressed in a somewhat hazy blue-brown and violet toning. Popular low-mintage date.

5292 ANACS 1884 PR 63. A select example of this popular low-mintage date. The surfaces display watery reflectivity and only modest obverse hairlines.

5293 NGC **1890 PR 64.** A stunning, deep fields (mint) gem that has clean mirrors with fine, gold-rose patina around the edges. A very attractive specimen.

BARBER HALF DOLLARS

5294 PCGS 1892 MS 64. A striking strike toned in mottled golden-steel and violet hues.

5295 ANACS 1895 MS 63. Both sides of this fully struck specimen are highlighted in attractive shades of silvery-gray, green and rose.

5296 PCGS 1907 MS 64. Lustrous with gray-brown toning around the edges and as clean as a whistle, just a trifle soft to grade any higher.

5297 PCGS 1908-D MS 63. Sharply struck and lustrous with attractive, medium density toning.

5298 NGC 1908-O MS 64. Sharply struck and untoned with excellent luster.

5299 PCGS 1896 PR 63. A heavily frosted cameo, limited in grade by two noticeable slide marks on Liberty's cheek.

5300 PCGS 1897 PR 64. At a distance this coin appears to be rather drab, even dull. But when placed under a light myriad colors burst forth, backlighted by the brilliant sheen of the deep proof mirrors. An interesting coin with great visual appeal.

WALKING LIBERTY HALF DOLLARS

5301 NGC 1916-D MS 63. Matte-like surfaces with specks of toning scattered about both the obverse and reverse.

5302 PCGS 1917 MS 63. Brilliant and satiny with fine, matte-like surfaces.

5303 NGC 1934-D MS 63. Lustrous but showing no head detail.

5304 PCGS 1935 MS 64, speckled iridescent toning; (2) 1942 MS 63, both brilliant; and a 1945-D MS 64, light golden toning (Total: 4 coins).

5305 NGC 1935-S MS 65. The obverse is surrounded in a halo of golden toning. An extremely well struck example of this more difficult Walking Liberty issue.

5306 NGC 1937 MS 66. Splashes of olive-green and violet coloration atop near flawless surfaces.

5307 NGC 1939-D MS 66. Lovely golden-brown and lavender toning overlays frosty surfaces.

5308 NGC 1941-D MS 66. Both sides display splashes of olive-gold and violet toning.

5309 PCGS 1941-S MS 64. Above average strike with bright reddish-orange toning on the obverse.

5310 ANACS 1941-S MS 64. Smooth, fairly well struck surfaces toned a light silvery-gray color.

5311 PCGS 1943-S MS 62, slightly above average strike; and (2) 1947-D MS 62 (Total: 3 coins).

5312 PCGS 1944-S MS 64. Decent strike for this notoriously weak issue.

5313 NGC 1945-D MS 66. A satiny gem bathed in soft golden toning.

5314 PCGS 1945-S MS 64. A MS 64 coin with MS 67 toning.

5315 NGC 1945-S MS 66. Quite well struck and frosty, with some traces of toning at the edges. Among the more difficult short set dates in superb condition and a date with four-figure potential.

5316 NGC 1938 PR 65. Deeply mirrored beneath a uniform layer of golden color.

5317 NGC 1939 PR 65. Lightly toned.

5318 PCGS 1939 PR 66. Beautiful light iridescent toning with apparently flawless surfaces.

5319 PCGS 1942 PR 66. Dazzling brilliance, with a slice of russet toning along the lower obverse edge.

5320 PCGS 1942 PR 66. Another hairline-free specimen, this one displaying milky originality and specks of toning above Liberty's head and beneath the sun.

FRANKLIN HALF DOLLARS

5321 PCGS 1949-D MS 64. Lightly toned, probably from a Mint set.

5322 NGC 1950-D MS 64. Hazy lilac toning with strong underlying luster.

5323 NGC 1960 MS 65. Brilliant with exceptionally clean surfaces. A scarce Franklin in gem condition.

EARLY DOLLARS

5324 PCGS **1795 Draped Bust AU 58.** B-14, R.3. Once in a great while we see a mint state early dollar, and over the years the coins we can remember seeing have certainly been attractive, fully lustrous pieces. But we can only remember a couple that can rival the sheer eye appeal of this AU 58 piece. This is an extraordinary coin. The strike is almost complete with most of the stars being fully popped up above the field and showing complete details. The hair on Liberty is finely detailed and the feathers on the eagle are sharp with the only area of weakness being in the center of the breast and on the legs--areas that are usually weak on even the finest specimens. The surfaces overall have bright, scintillating luster that is only broken on the highest points of the design. Both sides have a pale translucent golden-brown color that in no way obscures one's view of the coin's features. An exceptional early dollar.

5325 ANACS 1799 EF 40. B-10b, R.3. Original surfaces that have a deep gunmetal gray and blue patina with slight rubbing noted on the highpoints of the design. There is a very interesting planchet flaw on the obverse rim at 2 o'clock, quite unlike any we have seen before. It looks as if something dug into the metal along the rim, displacing a thin sliver of it and folding it over. Is there a name for this? We are not certain what it is but it is interesting nevertheless.

LIBERTY SEATED DOLLARS

5326 ANACS 1850-O Fine 12. The '50-O is the scarcest of the New Orleans Seated dollars and is generally unavailable any finer than the present coin. Over the years it has been vastly underrated and generally unobtainable. This piece is completely original with deep charcoal gray color outlining the devices with light silvery-gray elsewhere and showing the dots of die rust on the reverse that are diagnostic of all genuine 1850-O dollars.

TRADE DOLLARS

5327 PCGS **1873 MS 64.** There are numerous examples of first year of issue U.S. coins that were widely saved at the time of issue that can hardly be called scarce, much less rare. However, the 1873 Trade dollar is certainly an exception. Perhaps because so many were shipped to the Orient never to return, this is a very elusive coin in mint condition. According to the PCGS Population Report only 8 pieces have been graded MS 64 with 5 finer. This coin has gray-olive and rose toning on each side, is fully struck, and shows no obvious signs of impairment. An excellent coin for the collector of this historic, short-lived series.

5328 PCGS 1875-S MS 62. A frosty silvery-gray example, with olive-gold highlights and scattered obverse abrasions.

5329 PCGS 1876-S MS 63. Richly toned in patchy golden-russet, rose and blue shades, clinging mainly to the devices. A bold strike, free from serious marks.

5330 PCGS **1874 PR 64.** Mostly brilliant, with acceptable contrast between fields and devices. Much scarcer in select grades than the more highly touted proof-only dates and almost impossible in PR 65 condition, as its current PCGS population of 3 indicates.

5331 PCGS **1880 PR 66.** A majestic proof Trade dollar whose fields are deeply mirrored and flash forcefully through the red-violet central toning that turns to a royal blue at the edges. The surfaces are free from post-striking impairments and are uncleaned. This is an excellent type coin and one of only 14 pieces of this date to achieve such a lofty grade, exceeded by only 1 piece (a Proof-67).

MORGAN DOLLARS

5332 NGC 1878 8TF MS 64. Prooflike obverse.

5333 NGC 1878 7TF MS 64. Reverse of '78. Evenly toned in blue and gold.

5334 PCGS 1878-CC MS 64. Milky golden-gray toning.

5335 PCGS 1878-S MS 64, semi-prooflike; and an 1888 MS 64, peripheral golden color. (Total: 2 coins)

5336 NGC 1878-S MS 64. Toned obverse with a flashy white, untoned reverse.

5337 NGC 1878-S MS 65. Multi-colored obverse toning with a brilliant reverse. Fully struck.

5338 PCGS 1879 MS 64. Brilliant.

5339 PCGS **1879-CC MS 63.** Perfect Dies. A frosty and very appealing specimen with the few scattered marks confined to Liberty's cheek, thus limiting an even higher potential grade. Extremely popular Carson City issue and a truly scarce (and much more expensive) coin in grades exceeding MS-63.

5340 NGC **1879-CC MS 63.** Perfect Dies. Both sides are handsomely toned. The obverse displays milky golden-orange and steel coloration while, on the reverse, more colorful rose and green shades prevail.

5341 ANACS Two 1879-O dollars, both MS 62. Each, although a trifle scuffy on the obverse, is a genuinely new example. (Total: 2 coins)

5342 ANACS 1879-S MS 63, iridescent obverse toning; 1883-O MS 63; 1889 MS 63, golden-olive toning; 1896 MS 63, multi-colored obverse toning; 1899-O MS 63, lilac color; 1900 MS 63, weak in the centers; 1902-O MS 63, golden-rose color and weakly struck; and a 1904-O MS 63, iridescently toned. (Total: 8 coins)

5343 PCGS 1879-S MS 67. A brilliant coin whose surfaces are almost technically perfect. Add to the technical correctness of the coin's grade the considerable eye appeal of this snow-white coin and the strong semi-prooflike fields; one then begins to get an idea of the profound visual impact of this coin.

5344 PCGS **1880 MS 65 Prooflike.** A very scarce dollar with prooflike fields. To date (9/91) only 9 coins have been certified in gem condition with prooflike surfaces. The fields of this coin are quite deep and are borderline DMPL. Brilliant throughout, there is a moderate contrast on each side and minimal abrasions.

5345 ANACS 1880-S MS 63 Deep Mirror Prooflike. Light peripheral toning.

5346 ANACS 1880-S MS 64 Deep Mirror Prooflike. A gem example, save for a tiny cut on Liberty's cheek.

5347 PCGS 1881 MS 64. Lustrous.

5348 PCGS 1881 MS 64. Toned reverse.

5349 NGC 1881 MS 65. Fully struck, with pleasing satiny luster. Light golden-gray toning is splashed across the obverse.

5350 PCGS 1881-CC MS 65 Deep Mirror Prooflike. A high quality cameo dollar that is unusually clean for a Carson City issue. One of only 42 pieces to have been so graded by PCGS.

5351 PCGS 1881-S MS 64. Prooflike with just a touch of cartwheel around the devices.

5352 NGC 1881-S MS 65. Fully struck with the usual superb luster and covered with lovely golden, rose, and blue toning.

The October 1991 Long Beach Bullet Auction

5353 ANACS 1881-S MS 66. A true gem example, virtually free of surface marks

5354 ANACS 1881-S MS 64 Deep Mirror Prooflike. Milky toning, deepening slightly at the edges.

5355 NGC 1881-S MS 65 Deep Mirror Prooflike. The eagle's breast and inner wing feathers are, curiously, heavily frosted while the rest of the devices show considerably less contrast.

5356 PCGS 1881-S MS 66 DMPL. Ultra-deep mirrors, and very high-end for the grade. This coin is what some Morgan dollar enthusiasts refer to as a "Headlight!" It will certainly not go cheaply.

5357 PCGS 1881-S MS 66 Prooflike. A sliver of multicolored toning is visible about the date and lower obverse stars.

5358 NGC 1882-S MS 66. A superb Morgan dollar with the cheek of Liberty being clean and unblemished. Bright lustrous surfaces with a faint tinge of color around the edges.

5359 PCGS Ten 1882-S dollars, all MS 63 Prooflike. Often grouped with the earlier S-mint issues, the 1882-S is actually several times scarcer than these other dates in similar condition (Total: 10 coins)

5360 PCGS Ten additional 1882-S dollars, also MS 63 Prooflike examples. Here is an excellent opportunity to purchase slabbed PL Morgan dollars for less than their raw wholesale value only a few years ago. (Total: 10 coins)

5361 PCGS A third and final group often 1882-S dollars. Again MS 63 Prooflike examples. (Total: 10 coins)

5362 ANACS Three 1882-S dollars, all MS 63 Prooflike examples. (Total: 3 coins)

5363 ANACS MS 61 Morgan Dollars: 1883, 1883-O, 1885-O toned obverse; 1889-O artful toning; 1896, deep iridescence; 1898, nicely toned; 1900-O fully struck; 1902-O satiny with golden-rose toning; and a 1904-O pale color. (Total: 9 coins)

5364 PCGS Five 1884-O dollars, all MS 62 Prooflike. Each is brilliant and displays sparkling reflectivity in the fields. (Total: 5 coins)

5365 PCGS 1885-O MS 64. Brilliant and highly lustrous

5366 PCGS 1885-O MS 65 Prooflike. Flashy and very choice with a strong strike and minimal abrasions

5367 PCGS 1884-CC MS 65 Prooflike. Dazzling cartwheel brilliance, with moderate reflectivity in the fields.

5368 NGC 1884-O MS 64; 1891-O MS 64; and 1904-O MS 64. Despite the variation in dates in this lot, the coins all have a uniform look, with warm golden and lilac toning and strong underlying luster. (Total: 6 coins)

5369 NGC 1884-S AU 53. Only slight luster breaks on the high points and in the left obverse field.

5370 NGC 1884-S AU 53. Similar to the previous coin, but identified by a small drift mark on the eagle's left wing.

5371 PCGS 1884-S AU 58. Milky silvery-gray surfaces displaying only the slightest obverse friction. A nearly new example of this popular key.

5372 PCGS **1884-S MS 62.** While there are hundreds (maybe thousands) of 1884-S dollars in lightly circulated condition, there are very few truly uncirculated examples of this date. Even on the few mint state coins extant many have a dull gray or satiny luster. This piece has bright, semi-prooflike fields with vibrant mint frost on the devices. The strike is complete on both sides and there are no marks of any real consequence, just a few small abrasions from contact with other coins. One of only 33 pieces to have been so graded by PCGS. Of the greatest rarity any finer, with only 14 pieces grading higher.

5373 PCGS 1885 MS 65. Beautifully toned with strong underlying mint frost.

5374 PCGS 1885-CC MS 60 Prooflike. Scuffy obverse.

5375 PCGS 1885-CC MS 64 Deep Mirror Prooflike. Fully brilliant and showing perhaps a little better depth of mirrors on the reverse.

5376 PCGS 1885-O MS 64. Brilliant

5377 NGC 1885-O MS 66. Sharply defined and very clean, with hints of golden color at the rims.

5378 ANACS Four 1885-S dollars, all MS 62 examples of this slightly better S-mint issue. (Total: 4 coins)

5379 ANACS 1885-S MS 63. Mildly prooflike reverse.

5380 PCGS 1885-S MS 64. Fully frosty, with razor sharp detail and much cleaner than the typically encountered example of this date.

5381 PCGS 1887-O MS 64 Prooflike. An especially clean coin, and quite scarce as such, with bright prooflike fields. The strike is a trifle soft as usual over the ear and on the breast feathers of the eagle, but this detracts little from the overall beauty and attractiveness of this lovely dollar. One of only 37 pieces to have been so graded with 5 finer.

5382 PCGS 1887-S MS 63. Lightly toned with minimal abrasions for the grade

5383 PCGS 1887-S MS 63 Deep Mirror Prooflike. A very scarce Morgan in prooflike. This piece is fully struck with a strong cameo contrast. Only 15 coins have been so graded with 3 finer (all 64s).

5384 PCGS 1888-O MS 64. Satiny luster.

5385 NGC 1888-O MS 64. Lightly toned with good luster

5386 PCGS 1888-S MS 64 Deep Mirror Prooflike. A brilliant and very flashy coin with just the lightest touch of golden color on the highpoints of each side. The '88-S is a scarce dollar with deep mirrors in the fields. Usually it is only seen in 63 or lower grades, this is one of only 18 pieces to have been given the 64 grade, and only 1 coin is finer (a 65).

5387 PCGS 1889-S MS 64. Well struck with semi-prooflike fields.

5388 NGC 1890 MS 64 Deep Mirror Prooflike. Not heavily abraded as are most prooflike 1890 dollars, this piece has heavily frosted devices and exceptionally deep mirrors in the fields. Only 5 pieces have been so graded by NGC with none finer.

5389 PCGS 1890-CC MS 63 Deep Mirror Prooflike. Glittering surfaces struck in full detail and showing traces of golden-violet toning about the obverse edge.

5390 NGC 1890-S MS 64. Fully struck with beautiful luster. Light golden-lilac toning on the obverse, brilliant on the reverse.

5391 NGC 1890-S MS 65. The "look" of this coin is clearly reminiscent of the early S-mint dollars with its flashy mint frost and paucity of abrasions. Fully struck as well

5392 PCGS 1890-S MS 63 Deep Mirror Prooflike. Untoned with strong cameo contrast. A much overlooked issue in DMPL.

5393 NGC 1891-CC MS 62. Heavily toned.

5394 PCGS 1891-O MS 62. Lightly toned.

The October 1991 Long Beach Bullet Auction

5395 PCGS 1891-O MS 64. Clean features with superb mint frost. Softly struck in the centers as usual.

5396 PCGS 1891-S MS 64. Fully struck with superb luster and light, variegated color on each side.

5397 PCGS 1892-CC MS 64 Prooflike. Attractively toned with deep cinnamon-red centers that are framed by a ring of blue around the edges. The devices appear to be heavily frosted and the mirrors in the fields flash forcefully through the toning. Scarce with only 27 pieces having been so graded.

5398 PCGS 1892-O MS 64. Clean features with superb luster, but of course lacking a bit of detail over the ear.

5399 PCGS 1894-O MS 62. Lightly toned on the obverse with a brilliant reverse. The strike is definitely above average for this scarce issue with very slight softness seen over the ear and on the eagle's feathers and above average luster. Very scarce in uncirculated with only 69 pieces having been so graded by PCGS.

5400 PCGS **1894-O MS 63.** Excellent luster with original brown, blue, and lavender toning. The strike on this piece is extraordinary. We have seen hundreds of 1894-Os without seeing a single coin with a strike this strong. Only 69 coins have been so graded by PCGS and we doubt that any of those have a strike this sharp (in fact we doubt that very many of the 64 and 65s do either).

5401 ANACS 1897 MS 62 Deep Mirror Prooflike. An ultra-deep coin, marred by a few serious marks on the eagle's breast and reverse rim.

5402 PCGS 1897-O MS 62. Attractive satiny luster with a few abrasions that account for the grade. Lightly toned on the obverse with an above average strike. One of only 89 coins to have been so graded by PCGS.

5403 PCGS 1898 MS 64 Deep Mirror Prooflike. A brilliant coin with minimal abrasions for the grade and good depth of mirrors. Only 55 coins have been so graded.

5404 PCGS **1900-O MS 65 Deep Mirror Prooflike.** As common as this date is in mint state, one would think it to be readily available also with prooflike fields. Not so. The 1900-O is quite scarce and to date only 8 coins have been graded MS 65 DMPL. This is a brilliant coin with a full strike and minimal contrast. Apparently this was one of the first coins from a new pair of dies as the fields still show the "basining scratches" that were transferred to the first few coins (when improperly basined). Bid $2,600 on CCDn.

5405 PCGS 1901-O MS 64. Lustrous with light color on each side.

5406 NGC 1901-O MS 65 Prooflike. Beautiful golden-orange peripheral toning adds to the appeal of this clean, boldly detailed example. Scarce in gem prooflike condition.

5407 NGC 1902-O MS 65. Satiny white, with an especially clean cheek.

5408 NGC 1902-O MS 65 Deep Mirror Prooflike. Brilliant and sharply struck with unfathomably deep mirrors in the fields on each side. Scarce, only 7 pieces have been so graded with only 1 piece finer.

5409 PCGS 1902-S MS 63. Semi-prooflike with a band of golden toning across the reverse.

5410 NGC 1904-O MS 64. Brilliant with deeply reflective obverse fields, lustrous on the reverse.

5411 PCGS 1904-O MS 65. The obverse is fully prooflike but there is a slight cartwheel effect in the reverse fields. Sharp coin.

5412 NGC 1904-O MS 65. Like the MS 64 above, this is another dazzling one-sided prooflike.

5413 NGC 1904-O MS 65. Again, an obverse-only prooflike. Lightly toned around the edge of that side.

5414 PCGS 1904-S MS 62. A clean coin for the grade but perhaps just a bit lackluster to grade any higher.

5415 PCGS 1921-D MS 64. Lovely speckled iridescent toning on the obverse.

5416 NGC 1921-D MS 64. Both sides are heavily toned in charcoal and golden-gray shades.

5417 ANACS 1921-D MS 64. Mottled obverse toning.

5418 PCGS 1921-D MS 64 Prooflike. Very sharply struck with obvious reflective qualities on both sides. Only a faint mark or two on Liberty's cheek precludes an even higher grade. NGC has graded just 18 coins as such, along with 5 higher.

5419 ANACS Ten 1921-S dollars, all MS 63 examples. (Total: 10 coins)

5420 ANACS Ten more 1921-S dollars, also MS 63 in grade. (Total: 10 coins)

5421 ANACS 1921-S MS 64. A bold strike with light abrasions on the highpoints.

5422 ANACS Three 1921-S dollars, all MS 64. Two display varying degrees of obverse toning. (Total: 3 coins)

5423 NGC **1921-S MS 65.** The surfaces exhibit shimmering luster and are toned a delicate golden hue. This minimally abraded example is one of just 16 so-graded by NGC. No 1921-S has been graded higher by either PCGS or NGC.

PEACE DOLLARS

5424 ANACS 1922 MS 64, light spotty gray patina; 1923 MS 63; 1923 MS 64, superb luster; 1925 MS 63, brilliant; and a 1926 MS 63, beautiful light iridescence. (Total: 5 coins)

5425 NGC 1922 MS 65. A beautiful Peace dollar with bright, frosty mint luster and just a touch of light peripheral color.

5426 PCGS 1922-S MS 64. Lustrous and minimally abraded. Very few 1922-S dollars exceed the quality of this example.

5427 ANACS 1923 MS 64. Clean for the grade with booming mint luster.

5428 PCGS 1924 MS 64. Sharply struck and brilliant with excellent luster.

5429 NGC 1925 MS 65. Clean surfaces with superior luster and a full strike.

5430 PCGS 1926 MS 65. Soft golden toning covers both sides of this lustrous example.

5431 PCGS 1926 MS 65. Creamy, mark-free surfaces exhibiting only scattered traces of orange-gold toning on the reverse.

5432 NGC 1927-S MS 64. Hints of toning along the obverse edge, along with milky patina on the reverse. A scarce, low-mintage Peace dollar, becoming increasingly difficult in higher Mint State grades.

5433 NGC 1928 MS 64. Mostly untoned, with deep, satiny luster and clean features. Popular low-mintage date.

5434 PCGS 1928-S MS 64. A highly lustrous example of this scarce, semi-key issue. Light golden-rose toning that is a few shades deeper around the edge of the reverse.

5435 NGC 1934 MS 64. Lustrous untoned obverse; golden-gray reverse.

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)●Texas WATS: 1-800-448-6470●Texas Phone: 214-528-3500

5436 NGC 1934 MS 64. Frosty and wholly original, with speckled golden toning which is somewhat deeper on the reverse.

5437 NGC 1934-D MS 64. Speckled golden-brown toning overlays original surfaces. One of the more difficult Peace dollar issues in choice condition.

5438 NGC 1934-S MS 62. A sharply struck example of this scarce, key date issue. Both sides have wide streaks of deep golden-russet patina and there are very few contact marks on either side, the ones there are being small and relatively insignificant.

5439 ANACS 1935 MS 64. Excellent luster with the face of Liberty being devoid of marks. Only one V-shaped mark on the eagle's feathers keeps this piece from grading MS 65.

PATTERNS

5440 PCGS **1838 Half-Dollar, Judd-73 Restrike, R.6, PR 64.** Gobrecht's half dollar design with flying eagle reverse. Struck in silver with a reeded edge. Obviously a restrike from the diagnostic softness in the centers and medallic turn. Nicely toned and struck from lightly cracked dies.

5441 PCGS 1850 Three-Cent Silver, Judd-125, R.4, PR 62. Three-cent silver pattern with a radiated Liberty cap on the obverse, 1850 below, III in the center of the reverse surrounded by a palm branch and UNITED STATES OF AMERICA. Struck in silver with a plain edge. The centers are a light gray in color with deeper blue at the edges. An interesting early pattern.

5442 PCGS 1859 Indian Cent, Judd-228, R.1, MS 64. The regular dies (obverse assessed for 1859 with the remodeled reverse as adopted in 1860. Struck in copper-nickel with a plain edge. This is one of the few patterns available as a business strike. Sharply struck with attractive, light colored surfaces.

5443 PCGS **1859 Half Dollar, Judd-242, R.4, PR 65 Brown.** The Longacre design with 50 CENTS in the center of the reverse surrounded by a floreal wreath. Struck in copper with a reeded edge. An unspotted coin with even brown color and lovely subtle iridescence in the fields.

5444 PCGS **1862 Ten-Dollar, Judd-297, R.3, PR 64 Brown.** A regular dies striking with the addition of GOD OUR TRUST above the eagle. Struck in copper with a reeded edge. The surfaces of this coin are a monochromatic deep reddish-brown (perhaps bronzed). An attractive, problem-free gold pattern.

5445 ANACS **1862 Ten-Dollar, Judd-297, R.3, PR 64 Brown.** Regular dies striking with GOD OUR TRUST above the eagle. Struck in copper with a reeded edge. This piece has deeply reflective proof fields, tan in color overall, with significant iridescence in the fields.

5446 PCGS 1862 Ten-Dollar, Judd-298, R.3, PR 60 Brown. The same pattern as the above two coins, differing only in the absence of a scroll, GOD OUR TRUST being placed directly into the field above the eagle. Deep brown, olive-green, and rose toning.

5447 PCGS **1863 Half Dollar, Judd-343, R.7, PR 64 Red and Brown.** Regular-dies half dollar with the With Motto reverse as adopted in 1866, but dated 1863. Struck in copper with a reeded edge. A beautiful copper pattern with deeply mirrored fields, and orange-red luster that shows slight mellowing over the highpoints of the design. One of only two pieces that have been graded in all conditions and in all colors.

5448 PCGS 1866 Shield Nickel, Judd-489, R.6, PR 61. An interesting variant of the Shield nickel with the ball at the bottom of the shield separating the digits in the date and a fancy 5 in the center of the reverse surrounded by a wreath instead of stars and rays. Struck in nickel with a plain edge. Mostly untoned and downgraded by the presence of a few shallow scratches on the shield.

5449 PCGS **1866 Dollar, Judd-541, R.6, PR 63 Brown.** Regular die trials piece for the silver dollar including the motto above the eagle. Struck in copper with a reeded edge. Even brown color on both sides, the source for the 63 grade seems to be a small area of minor scratches in the field above TRUST in the motto. The coin lacks crisp highpoint definition, this is no doubt because the piece was struck in the harder copper metal rather than more malleable silver.

5450 PCGS **1868 Half-Dime, Judd-638, R.7, PR 66.** Regular die trials issue for the half-dime. Struck in nickel with a plain edge. This pattern was struck on both thick and thin planchets, most likely as a result of an editorial in the New York Herald regarding the striking of thinner dimes. This piece is almost brilliant, showing only the lightest trace of color, and a moderate cameo contrast.

5451 NGC 1869 Three-Cent Nickel, Judd-676, R.4, PR 65. Virtually the same as the adopted design except the Roman numerals have smooth surfaces. Struck in nickel with a plain edge. Brilliant.

5452 ANACS 1869 Standard Silver Quarter, Judd-721, R.5, PR 64. Standard Silver design with a scroll in the exergual area on the obverse paired with a commonly seen reverse. Struck in silver with a reeded edge. Deep royal blue toning with golden at the edges.

5453 ANACS 1869 Standard Silver Quarter, Judd-727, R.5, PR 64. Differing from the J-721 above by Liberty wearing a diadem. Struck in silver also with a reeded edge. Deeply mirrored with some cameo effect on the obverse and light in color.

5454 PCGS 1869 Standard Silver Half-Dollar, Judd-748, R.5, PR 63. Liberty wearing a diadem with the commonly seen oak and laurel wreath reverse. Struck in silver with a reeded edge. Toned a deep, almost scarlet, red on the obverse with a blue-gray border and light golden on the reverse. Good depth of mirrors.

5455 ANACS **1870 Standard Silver Quarter, Judd-911, R.6, PR 66.** The cap of Liberty has three stars and the reverse has the traditional oak and laurel wreath. Struck in the exotic and very expensive metal of aluminum, with a plain edge. Coinage struck in aluminum was quite costly in the 19th century because of the difficulty in separating it from other metals. It was not until the turn of the century that bauxite was found to be the necessary element in making aluminum a household item. Brilliant and very deeply mirrored, the surfaces show none of the often seen oxidation spots common to patterns struck in this metal.

5456 PCGS **1870 Dollar, Judd-1017, R.7, PR 65 Brown.** The Longacre design of an Indian wearing a headdress, seated, with the conjoined flags of the Union and Confederacy behind a globe upon which she rests her left hand. The reverse is from the regular dies. Struck in copper with a plain edge. This is one of the most inspired and artistic designs ever devised for a U.S. pattern or coin. In our estimation it is second only to the Amazonian design among patterns. The surfaces are an even reddish-brown, almost having a bronzed appearance, with little reflectiveness in the fields.

5457 PCGS 1871 Five-Cents, Judd-1054, R.5, PR 63 Brown. The obverse is similar to the adopted design for the three-cent nickel while the reverse has 5 CENTS in the center surrounded by a laurel wreath. Struck in copper with a plain edge. The obverse is royal blue with an occasional glimpse at the original red luster here and there. The reverse on the other hand, has toned down several shades to a mellow reddish-brown. There are a few small carbon spots on each side.

5458 NGC **1873 Trade Dollar, Judd-1281, R.5, PR 64.** The

Heritage Plaza•Highland Park Village•Dallas, Texas 75205-2788•WATS: 1-800-US COINS (872-6467)•Texas WATS: 1-800-448-6470•Texas Phone: 214-528-3500

Bailley design for the Trade dollar featuring what must surely be one of the ugliest women of the 19th century representing Liberty. This obverse is paired with a half-naturalistic, half-heraldic eagle on the reverse with the usual statutory inscriptions plus the differing weights for the Trade dollar. Struck in silver with a reeded edge. Toned a blue-gray overall with occasional streaks of red and violet iridescence in the fields.

5459 NGC **1873 Trade Dollar, Judd-1317, R.6, PR 63 Brown.** The Bailley design for the Trade dollar with Liberty seated surrounded by American produce. The reverse depicts a small defiant eagle with all the statutory requirements placed on that side. Struck in copper with a reeded edge. Obviously cleaned at one time, the coin has recovered nicely and the hairlines are concealed by multi-colored toning. Good depth of reflectivity in the fields.

5460 PCGS **1875 Ten-Dollar, Judd-1444, R.7, PR 64 Red and Brown.** The "Sailor Head" design by William Barber paired with an eagle that resembles that used on the twenty-cent piece and Trade dollar. Struck in copper with a reeded edge. This is an aesthetically pleasing coin that was well designed, especially on the obverse. The surfaces retain most of their original red color with scattered bits of brown in the fields. A desirable and important pattern.

5461 NGC 1878 Morgan Dollar, Judd-1550, R.5, PR 62. Only slight differences are apparent between this and the adopted design for the silver dollar. These differences should be of great interest to many collectors and this coin should find a wide audience of buyers. Struck in silver with a reeded edge. Cleaned at one time, the surfaces have retoned a deep blue-gray.

5462 PCGS **1879 Metric Dollar, Judd-1617, R.6, PR 65.** William Barber's design for the metric dollar with a large head of Liberty on the obverse, paired with a reverse that plainly spells out the statutory requirements plus the weight and content of the coin. Struck in silver with a reeded edge. Deep blue-gray toning with a strong underlying layer of red. An important coin for those interested in the plan for internationally convertible currency.

COMMEMORATIVE SILVER

5463 PCGS 1921 Alabama MS 64. Medium gray toning over both sides with faint traces of pink beneath. Strong mint luster.

5464 PCGS 1921 Alabama 2x2 MS 64. Lovely pastel iridescence with no noticeable abrasions on the cheek of Bibb or Kilby.

5465 NGC 1936 Albany MS 66. Lightly and attractively toned with virtually flawless surfaces.

5466 ANACS 1936 Arkansas MS 63. Brilliant.

5467 ANACS 1936-D Arkansas MS 63. Hazy silvery-gray obverse.

5468 NGC 1938 Arkansas PDS Set. 1938 MS 64, 1938-D MS 63, and a 1938-S MS 64. All three are well matched, being brilliant with only a touch of light golden color around the rim. The D-mint coin has a few more bagmarks than the other two, the P and S coins being sharp, upper-end pieces. (Total: 3 coins)

5469 NGC 1939-S Arkansas MS 65. Extremely clean under a layer of pale golden toning. A low mintage (2,105) date, generally found in lesser Mint State grades.

5470 PCGS 1936 Bay Bridge MS 64. Lightly toned.

5471 PCGS 1936-S Bay Bridge MS 64. Very clean surfaces with just a hint of light color.

5472 NGC 1936-S Bay Bridge MS 65. Faint iridescence--evenly matched from one side to the other.

5473 NGC **1935 34-S Boone MS 66.** Approximately TWICE as rare as the D-Mint in this grade, according to both the PCGS and NGC Population Reports.

5474 NGC **1936-S Boone MS 68.** The technical perfection of this coin's surfaces is equally matched by its breathtaking toning. Both sides are toned in shades of autumn leaves, showing streaks of crimson, green, yellow, and rose in no particular pattern but spread randomly over both sides. Needless to say any commemorative in MS 68 is of the utmost rarity and importance. This is the only one to have been graded by either of the major grading services--its quality and beauty is unsurpassable.

5475 NGC 1938 Boone PDS Set. The 1938 grades MS 65 as does the D-mint, but the S-mint is a MS 64. A sharp, lustrous set with light toning on each coin. (Total: 3 coins)

5476 PCGS 1936 Cleveland MS 64. A sharp looking coin with lilac, golden, and purple toning.

5477 NGC 1936 Columbia MS 64. Light in color with excellent luster and a few small field marks.

5478 PCGS 1892 Columbian MS 64. A borderline gem, toned in original gray and steel-blue shades and struck with unusual sharpness in the ship's rigging. We're only one year from the 500th anniversary of this historic event.

5479 NGC **1892 Columbian MS 65.** Aside from the few proofs we have seen, this is one of the sharpest strikes we can remember on any Columbian half. The ship's rigging and the vertical lines on the sails are very strongly detailed. Highly lustrous, the coin is a pearl-gray overall with a slightly deeper hue on the reverse.

5480 NGC 1893 Columbian AU 58. Good luster with just a trace of friction.

5481 ANACS 1893 Columbian MS 62. Toned a natural golden-gray, with deeper rose and violet iridescence about the lettering.

5482 PCGS 1893 Columbian MS 63. Attractive medium toning.

5483 NGC **1936 Delaware MS 66.** An exceptionally clean coin that has retained much of its original brilliance, but is accented by a pale multi-colored iridescence around the edge of the obverse.

5484 NGC 1936 Gettysburg MS 65. Superb luster with pearl-gray centers and a thin ring of russet patina around the edges.

5485 NGC **1922 Grant with Star MS 64.** The surfaces display a hard, nearly prooflike brilliance under milky golden and pastel-blue toning. One of the scarcest of all the silver commemoratives, particularly in higher grades.

5486 PCGS **1928 Hawaiian MS 64.** The obverse exhibits speckled golden-gray toning while the more lustrous reverse is framed in golden peripheral color. This scarce commemorative enjoys popularity at all grade levels.

5487 PCGS 1946 Iowa MS 66. Both the obverse and reverse are framed in a multitude of golden-brown toning specks.

5488 Hallmark 1946 Iowa MS 66. Original russet and apple-green toning clings to the devices.

5489 PCGS 1925 Lexington MS 64. Brilliant.

5490 PCGS 1936 Long Island MS 65. Light milky gray obverse, turning to golden-russet along portions of the rim.

5491 NGC 1936 Long Island MS 65. An original coin with spotty color around the edges. Sharp coin with excellent luster.

5492 NGC 1936 Long Island MS 66. While a common coin in lower grades, the Long Island is quite scarce in MS 66 condition. Only 46 pieces have been so graded with 6 finer.

The surfaces of this coin are virtually flawless and it is toned in shades of deep golden-brown and blue

5493 NGC 1934 Maryland MS 64. Excellent luster with gray-olive patina on each side

5494 PCGS 1921 Missouri MS 63. Well struck under a primarily steely-gray obverse and golden-gray reverse.

5495 NGC 1921 Missouri 2x4 MS 64. A cleaner coin than usually seen for this grade, the surfaces have a medium gray patina with significant portions of underlying iridescence showing through.

5496 ANACS 1924-S Monroe MS 63. Better struck than most, with golden-brown toning outlining the central devices.

5497 PCGS 1923-S Monroe MS 64. Superb luster with very few marks on either side. The obverse is light, almost brilliant, while the reverse has a gray tint with golden-olive at the edges. A scarce and desirable commemorative that is a particularly good value in this grade.

5498 NGC 1938 New Rochelle MS 65. Blue-gray toning overall with a faint underlying speckled iridescence.

5499 PCGS 1926-S Oregon MS 65. Lovely light golden and blush peripheral toning. Looks viciously undergraded to us

5500 PCGS 1926-S Oregon MS 65. Beautiful gray-lavender and rose toning

5501 NGC 1936-S Oregon MS 67. An immaculate coin with subtle multi-colored iridescent toning. One of only 22 pieces to have been so graded by NGC.

5502 NGC 1938-D Oregon MS 65. Brilliant with dazzling mint luster

5503 NGC **1915-S Panama-Pacific MS 65.** A gorgeous gem quality example framed by the reverse in russet and blue toning. The surfaces display superior luster and no serious marks

5504 NGC 1936-D Rhode Island MS 64. Light, even toning

5505 PCGS 1936-S Rhode Island MS 65. Deep iridescent toning

5506 NGC 1937 Roanoke MS 65. Very sharply struck with a satiny texture to the surfaces and light toning. A premium coin

5507 PCGS 1935-S San Diego MS 65. Pale tinting with the usual excellent luster

5508 PCGS 1935-S San Diego MS 65. Lightly toned on the obverse

5509 NGC 1936-D San Diego MS 65. Deeply toned with strong underlying mint frost

5510 NGC 1936-D San Diego MS 65. Thick coruscating mint frost with a light layer of golden toning

5511 NGC 1926 Sesquicentennial MS 64. Light even toning with bright underlying luster and no noticeable marks. A sharp, appealing coin with most of the eye appeal of a much more expensive MS 65

5512 PCGS 1925 Stone Mountain MS 64. Toned

5513 PCGS 1925 Stone Mountain MS 64. Untoned.

5514 PCGS 1925 Stone Mountain MS 64. Brilliant with a strong strike

5515 PCGS 1925 Stone Mountain MS 64. Brilliant with superb luster

5516 PCGS 1925 Stone Mountain MS 64. Light toning

5517 ANACS 1925 Stone Mountain MS 64. Soft yellow-gold toning overlays much of the obverse and reverse.

5518 PCGS 1935 Texas MS 64. Deep olive and lavender toning with strong luster glowing beneath.

5519 PCGS **1935-D Texas MS 67.** Virtually untoned, with vibrant mint luster and unblemished surfaces. For those who enjoy high grade, brilliant coins, this superior Texas commemorative should prove just the ticket.

5520 NGC 1935-S Texas MS 65. Spectacular lavender and lilac toning with olive highlights on the eagle.

5521 NGC 1936 Texas MS 65. Superb luster and lightly toned

5522 PCGS 1936 Texas MS 66. Supremely lustrous and attractively toned with pinpoint striking detail.

5523 NGC 1936-S Texas MS 65. Lightly toned with strong underlying luster.

5524 PCGS 1938 Texas PDS Set MS 65. A uniform group of coins that appear to have been together since the year of issue. Each is sharply struck and lightly toned--so lightly that they almost appear untoned. Original sets are quite difficult to locate today and this is the first we have handled in some time. CCDn bid is $1,150 for the three-coin set. (Total: 3 COINS)

5525 NGC 1946 Booker T. Washington MS 65. Beautiful multi-colored toning on the obverse, monochromatic on the reverse.

5526 PCGS 1947-S Booker T. Washington MS 66. An exceptionally clean coin with light toning on both sides. One of only 8 pieces to have been so graded by PCGS

5527 NGC 1952 Wshington Carver MS 65. Deep blue-gray toning over both sides

5528 NGC 1952 Washington Carver MS 65. Beautiful, original multi-colored iridescent toning that is quite unlike the color seen on any other Washington Carver that we can remember. A truly spectacular coin.

5529 PCGS 1953-S Washington Carver MS 66. This and the 1952 WC make quite a pair. This piece is beautifully toned also, in shades of deep aqua and golden-rose. One of only 7 pieces to have been so graded, none are finer

5530 NGC 1954-D Washington Carver MS 64 Prooflike. Brilliant with clean surfaces, this is quite a flashy WC half. A scarce coin also with prooflike surfaces with this being the only coin certified as such to date in any grade. This coin does not appear on the September Census Report because it has been so recently certified.

5531 NGC 1936 Wisconsin MS 65. Patches of original toning on each side. A lustrous and attractive example of this popular issue.

5532 NGC 1936 Wisconsin MS 66. A lovely Wisconsin that is unusually clean and that possesses a faint golden-brown patina of obvious originality.

COMMEMORATIVE GOLD

5533 PCGS **1904 Lewis and Clark MS 63.** Lightly abraded with orange-gold color and tiny bits of russet encrustations within the outer legends.

5534 PCGS **1904 Lewis and Clark MS 64.** A clean example of this scarce commemorative gold coin with subtle variegated coloration.

5535 PCGS 1916 McKinley AU 55. Deep orange color and

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-U S COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)●Texas WATS: 1-800-448-6470●Texas Phone: 214-528-3500

showing considerable reflectivity in the fields.

5536 PCGS 1926 Sesquicentennial MS 63. Lustrous and fully struck with only minor abrasions.

5537 NGC 1926 Sesquicentennial MS 63. Fully lustrous with a few small abrasions on each side.

5538 NGC 1926 Sesquicentennial MS 64. Superb glittering mint luster. Only held back from grading gem by a few microscopic marks on each side. A strong, upper-end coin.

ONE-DOLLAR GOLD PIECES

5539 PCGS **1849 No L MS 65.** This is an outstanding example of this popular first year of type. The fields are highly lustrous with a bright semi-prooflike sheen. The devices are fully struck and the surfaces overall are clean and problem-free. Only 1,000 pieces were struck on May 8 but this variety has been little recognized over the years although it is roughly comparable in rarity to the famed 1875. This is the only gem to have been graded by PCGS and is exceeded in grade by only 2 pieces. Trends $12,500.

5540 ANACS 1849-C Closed Wreath EF 45. Somewhat prooflike, like most remaining examples of this elusive issue and displaying several scattered marks on either side. A high grade example, normally seen in VF or less.

5541 PCGS 1849-D AU 55. Fully struck with bright orange-gold color and almost complete mint luster. An obtainable D-mint gold dollar in and close to mint state.

5542 PCGS 1849-O XF 45. Scarce first year of issue for the gold dollar from the New Orleans mint. Deep reddish-orange color on both sides.

5543 PCGS 1850 MS 60. Attractive coloring with complete mint luster.

5544 PCGS 1851-C VF 35. One of the more common C-mint gold dollars, this should be an affordable coin in this grade. The obverse has deep orange-red and steely-blue patina but the reverse is virtually unaffected.

5545 PCGS 1851-C AU 55. Bright, glittering semi-prooflike fields and a full strike. A very attractive Charlotte gold dollar that would do nicely as a type coin. Trends $1,150 in AU 50.

5546 PCGS 1851-C AU 55. An attractive example of this popular Charlotte gold dollar that is often used as a type coin. The surfaces are completely original with deep reddish color in the fields and few handling marks on either side. Trends $1,150 in AU 50, $2,650 in MS 60

5547 ANACS 1852 AU 50. Problem-free, with an appealing pinkish-gold color.

5548 PCGS 1852-C XF 45. Well struck and original with light reddish patina in the fields. A very scarce Charlotte dollar with an original mintage of 9,434 pieces.

5549 ANACS 1852-O EF 45. Bright and lustrous, with a small mark to the left of the numeral 1.

5550 ANACS 1853 AU 50. Fully defined and satiny, with only a trace of wear.

5551 ANACS 1853 AU 55. A near Mint State example, displaying bright, satiny luster.

5552 NGC 1853 MS 62. Fully struck.

5553 PCGS **1853 MS 63.** Fully struck with superb luster that is thick and frosted with attractive orange-gold color.

5554 PCGS 1853-C VF 35. A clean coin that was struck on a relatively smooth planchet that shows good color. A scarcer C-mint but not too difficult in this grade. Trends $600 in VF 20.

5555 ANACS 1853-O EF 40. Lightly cleaned, accentuating a few scattered marks.

5556 PCGS 1853-O AU 55. A lustrous coin with attractive color. This is a branch mint issue that is available without paying too substantial a premium.

5557 PCGS 1853-O MS 60. Completely struck up in all areas and showing attractive yet subtle color. Just a bit lackluster to grade any higher.

5558 PCGS 1854 Type Two AU 50. Deep orange-gold color with remarkably clean surfaces for the grade. Showing some central weakness as usually seen on this type.

5559 PCGS 1854 Type Two AU 50. A very sharply struck coin with the date, the word DOLLAR, and the hair of Liberty boldly struck up. The surfaces are a deep reddish-orange and show significant portions of luster still around the devices. This is a most attractive Type Two dollar in an affordable grade.

5560 ANACS 1854 Type Two AU 50. Well struck for the type and showing almost no trace of the usually heavy die clashing.

5561 NGC 1854 Type Two AU 58. This is one of the most attractive Type Two dollars we have seen in some time, regardless of grade. The strike is full, yes full, with completely defined hair and bold details on the letters and digits in the center of the reverse. The fields are prooflike and very flashy. The only surface irregularities are those seen on almost all Type Twos: the ubiquitous die clashing marks. Look for this coin to bring a significant premium.

5562 PCGS 1855 Type Two AU 50. The fields are free from any noticeable impairments and the surfaces have a rich golden-yellow color. Well struck with only minor weakness noted in the centers.

5563 ANACS 1855 Type Two AU 50. Sharply struck with bright yellow-gold color and a single spot of russet and blue at 7 o'clock on the obverse rim (probably from the copper alloy).

5564 NGC 1855 Type Two AU 53. A very clean coin with significant traces of luster still in evidence around the devices. Clearly a cut above most AU Type Twos.

5565 PCGS 1855-C Type Two VF 30. A very scarce Type Two dollar with an original mintage of only 9,803 pieces. While this issue is known for poorly produced coins, this piece seems to have been struck on a clean planchet, its only defects being the usual small handling marks a coin takes on after 30 points of wear. Softly struck in the centers as is almost diagnostic for this issue. Otherwise, considering the rarity and difficulty in locating a nice example of this issue, this is quite a nice coin. Trends $1,000 in VF 20.

5566 PCGS 1855-O Type Two VF 35. Bright, attractive surfaces with no evidence of die clashing on either side. An important Type Two gold dollar.

5567 NGC 1855-O Type Two VF 35. A sharp coin for the grade with a warm, reddish patina over both sides and unusually clean surfaces.

5568 PCGS 1855-O Type Two XF 40. The 1855-O is the most affordable of the mintmarked Type Two dollars, it is also perhaps the best manufactured of those issues. This piece shows only slight weakness in the center of the obverse. The fields are quite clean and the devices are accented by a deep orange patina.

5569 NGC **1855-O Type Two AU 50.** Sharply struck, even in the centers, with bright semi-prooflike fields. This is a difficult issue to locate in or near mint condition, especially if one is looking for a problem-free coin. The only defect we can find on this lovely piece is a thin scratch running just

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza • Highland Park Village • Dallas, Texas 75205-2788 • WATS: 1-800-US COINS (872-6467) • Texas WATS: 1-800-448-6470 • Texas Phone: 214-528-3500

below TES in STATES on the obverse. Trends $1,950 in AU 50.

5570 PCGS **1856-S Type Two AU 50.** Here is a gold dollar one doesn't see very often. The mintage of the 1856-S was 24,600 pieces but very few remain today in any grade, and survivors are especially elusive in high grades. Well struck and original with attractive, yet subtle, reddish and olive-green color; the fields show no mentionable out-of-the-mint defects and there is only one small planchet flake out of the upper reverse field. Double punched S. Breen-6045, not worth a premium as such but interesting nonetheless. Trends $2,850.

5571 PCGS **1857-D AU 50.** A very rare gold dollar with an original mintage of only 3,533 pieces. Of that number apparently none have survived in mint condition, at least none have been so graded by either of the major grading services. This piece is among the finest graded and finest known, ranking in the lower range of condition census. A very clean coin for the grade with little of the usually seen weakness on either side. Showing good original orange-gold color.

5572 PCGS **1857-S AU 55.** For some unknown reason the 1857-S is a major condition rarity among gold dollars. Its mintage was an even 10,000 pieces but to date only 2 coins have been graded in mint state with a total of 11 AUs certified by both services. This is a sharply struck, semi-prooflike piece with clean surfaces and a tinge of light reddish color over each side. Trends $2,150.

5573 PCGS 1859 MS 61. Excellent luster with attractive orange and green color. Fully struck as well.

5574 PCGS 1859 MS 62. Approximately nine times rarer in this grade than a common date. According to the August Population Report there have only been 21 pieces certified in this grade contrasted against 212 for the 1874 (a common date).

5575 PCGS **1859-D AU 53.** The 1859-D is a scarce dollar from this popular Southern mint and is rare known as fine as AU or mint state. This piece is typical for the issue being struck on a poorly prepared planchet and showing the usual softness of strike in the centers of each side. Otherwise the coin has few abrasions and is quite pleasing for the grade. Trends $1,250 in AU 50.

5576 PCGS 1859-S XF 40. The 1859-S is a very scarce coin in all grades as one could infer from its mintage of only 15,000 pieces. In XF condition PCGS has only graded 8 coins and in AU a single piece. This scarcity in AU has given this issue a Trend's value of $2,200 for in XF Trends is only $450. Clean original surfaces with good details for the grade.

5577 ANACS 1859-S EF 45. With mint state and even AU coins being virtually unobtainable, a problem-free EF is about the best coin most people can ever hope to locate much less afford. This piece is well struck with bright yellow-gold color and shows no obvious or distracting marks in the fields. Trends in EF 40 is $450 in AU 50 $2,200.

5578 ANACS 1860 AU 55. Well struck with good remaining luster. A moderately scarcer coin.

5579 PCGS **1860-S MS 61.** A very rare early gold dollar with a mintage of only 14,000 pieces. There are only a small handful of uncirculated coins in existence and the appearance of one on the market is a rare occurrence. This is the only MS 61 graded by either service out of a total of 4 in all grades, the finest being MS 63. This is a well struck coin with attractive deep orange and steely-blue coloration. Trends $2,800 in MS 60.

5580 PCGS **1861-D AU 50.** The 1861-D has earned the reputation as the "King of the Gold Dollars" both because of its extremely low (although unknown) mintage and because some were struck under the auspices of the Confederacy. Just as with the 1860-D, the U in UNITED shows extreme weakness, this being diagnostic for the issue. Unlike the 1860-D though, there are a few mint state coins in existence. Some estimates place this number as high as 8 pieces, but to date only 6 have been certified by the grading services. This is a very clean coin with no objectionable marks on either side and a fair amount of luster remaining in the more protected areas. A very presentable example of this rare Dahlonega gold dollar.

5581 ANACS 1862 AU 58. Lustrous.

5582 NGC **1862 MS 64.** One of the more readily obtainable of the early Type Three dollars, this piece is fully struck with excellent luster and absolute minimal abrasions.

5583 PCGS **1863 MS 62.** The 1863 is one of the rarest of all Philadelphia gold dollars. Its mintage was only 6,200 pieces and mint state coins are of the greatest rarity. This is the only MS 62 graded to date by PCGS with only 3 pieces that are finer. Fully struck with deep orange-gold color and excellent luster. Trends $4,500 in MS 60, $12,000 in MS 63.

5584 NGC 1866 AU 58. Fully struck with die striations in the fields (as often seen) that have given the coin a prooflikeness, but at the same time the surfaces have cartwheel luster as well.

5585 ANACS 1868 XF 45. A popular low mintage issue with only 10,500 pieces struck. Bright, problem-free surfaces.

5586 NGC **1871 MS 64.** As might be expected from a mintage of only 3,900 pieces, the 1871 gold dollar is quite scarce in all grades. While usually weakly struck in the centers, this piece shows no softness. It is fully struck and the fields are bright and prooflike with a warm reddish color over the coin's surfaces. Only 3 other pieces have been so graded by NGC with 2 finer. PCGS has graded 8 in MS 64 with only 5 finer.

5587 ANACS **1873 Closed 3 AU 50.** A very rare gold dollar with an original mintage of only 1,800 pieces. This coin is well struck with the usually seen prooflike fields. An important opportunity for the gold specialist. Trends $1,650--an inexpensive price for a coin with such a low mintage.

5588 ANACS 1874 MS 62. Excellent luster.

5589 PCGS 1876 AU 58. A very rare gold dollar, possibly THE RAREST, of the post-1875 issues. The surfaces are typical for the issue with prooflike fields and the usual softness of detail on the hair curls. Only the lightest touch of friction can be detected in the fields with the coin basically having the appearance of one in full mint state.

5590 PCGS **1888 MS 65.** Fully struck with attractive reddish color and excellent luster. The 1888 is one of the most common Type Three gold dollars in MS 65 with 49 coins having been so graded. As such it has been the choice for many high grade type sets.

5591 PCGS **1889 MS 65.** Fully struck with beautiful red and steely-blue variegated color with smooth, virtually unblemished surfaces. The 1889 is by far the most common Type Three gold dollar in gem condition with 238 pieces having been so graded.

5592 PCGS **1889 MS 66.** Fully struck with pristine, original surfaces; this is a perfect coin for type purposes--not only because of the smooth, unblemished nature of the coin's features, but also because the date, 1889, marks the end of the coinage of gold dollars in this country. As such, this otherwise common date assumes a greater significance to the wider numismatic community.

EARLY QUARTER EAGLES

5593 PCGS **1802 1 XF 40.** While the 1802 1 is the second most available date in the series of Heraldic quarter eagles, one must not lose perspective of what the word "common" means in this context. The original mintage was only 3,035 coins and some estimates place the number of survivors in all grades as low as 50 pieces. It is very elusive in AU and mint state. This piece shows some of the characteristic softness in the center of each side, but overall the coin is well detailed with clean problem-free surfaces that show none of the usual adjustment marks. Perhaps the most prominent feature of this coin though, is the color. The fields have a pronounced deep blue-green hue and the devices are outlined by a reddish-gold color. Only 2 other coins have been so graded by PCGS.

5594 PCGS 1834 Classic AU 55. Sharply struck and lustrous with pleasing reddish color.

5595 PCGS 1835 AU 53. Well struck except on the hair curls as usual, with bits of scattered reddish color around the edges and remnants of prooflikeness in the fields.

5596 ANACS 1836 XF 40. Softly struck in the centers as usual with a tinge of orange color on the highpoints.

5597 PCGS 1838 XF 45. A nice, problem-free coin for the grade with good remaining luster.

5598 PCGS **1839-D MS 61.** Anyone vaguely familiar with U.S. gold will recognize this as not only a rare coin but a major condition rarity as well. AU coins are rare with only a half dozen or so believed to exist. In mint condition a total of 4 coins have been certified by both services. There is one other PCGS MS 61 and one piece graded the same by NGC, placing this coin in a three-way tie for finest known. This is a well struck coin with clean surfaces and a faint glimmer of prooflikeness in the fields.

12,000

LIBERTY QUARTER EAGLES

5599 PCGS **1841-C XF 40.** A scarce and overlooked early Charlotte quarter eagle. Despite this issue's reputation for weak strikes on poorly prepared planchets, this piece is clearly defined (for a Charlotte coin) and struck on a clean, problem-free planchet. The only superficial detraction is a scratch in the right obverse field above star 12. The original mintage was 10,281 pieces and of that number it is estimated that perhaps only 13-15 may still exist today in XF condition. Trends only $1,300 in XF 40.

5600 NGC **1842-D XF 40.** Well struck on a planchet that shows only minor flaking in the fields, this coin is definitely above average in both grade and eye appeal for this normally troublesome issue. The original mintage was a paltry 4,643 pieces. David Akers was very keen on this issue. In his 1975 book on quarter eagles he wrote in part, "Very rare in all grades and almost impossible to obtain better than EF. From the standpoint of total number of appearances at auction, the 1842-D is the 14th rarest quarter eagle and also has the 12th lowest average grade...it is generally unappreciated for its real rarity." No mint state coins have been graded by either of the major services (only one is alleged to exist), and in fact, only one AU has been graded. Trends $3,250 in XF 40.

5601 PCGS **1843-D AU 50.** A well struck example of this moderately more available early Dahlonega quarter eagle. There are a couple of small planchet flakes out of the fields on each side but the strike is actually quite strong and there are noticeable portions of luster around the edges and in the more protected areas. Light greenish-gold color. None have been graded in mint state by either of the major services.

5602 PCGS 1844 VF 25. A very scarce early P-mint that is seldom seen any finer than VF. The surfaces are clean for the most part and the strike is somewhat soft on the eagle's feathers as usual for coins of this era. Trends $435 in VF 20.

5603 PCGS 1844 XF 40. Much brighter and more attractive than the VF coin above, this piece still shows localized striking weakness on the eagle. Trends $1,075 in XF 40.

5604 NGC **1844-D AU 50.** Although a relatively common coin for a Dahlonega quarter eagle, the overall beauty of 1844-Ds has kept the price for these coins at high levels because of the great demand for them as type coins. This is an original piece with clean features and traces of reddish patina around the devices. Trends $2,450 in AU 50.

5605 NGC **1845-D AU 50.** While relatively available in VF-XF condition, in AU the 1845-D is an event for specialists. It may well be that no mint state coins exist. Indeed, none have been graded to date by either service. In AU there is a combined total population of only 10 coins (no doubt several of these are resubmissions). This is a very attractive coin with bright prooflike fields on the obverse. The strike is remarkably strong for a Dahlonega coin with only the slightest weakness noted in the centers. The surfaces are a bright yellow-gold and show no variation in hue. Trends $3,450.

5606 PCGS 1847-O XF 40. An original coin with light color and the usually seen central striking weakness.

5607 PCGS **1848-C XF 40.** A very rare Charlotte quarter eagle that is seldom seen in XF condition; AU and mint state coins are virtually unknown (only one low grade unc. has been certified). This piece shows the usual soft strike on the eagle's legs but the obverse is better detailed. The obverse fields have a deep reddish patina while the reverse is much lighter in color. Overall a clean coin with only minimal handling marks for the grade.

5608 PCGS **1848-D XF 45.** One of the more commonly available D-mint quarter eagles, this original coin has remnants of a semi-prooflike field on the reverse and a deep coppery-red hue on the devices. An attractive example of this popular Dahlonega quarter eagle.

5609 PCGS **1848-D AU 50.** A well struck example of this popular Southern mint quarter eagle that has bright, semi-prooflike fields. The surfaces are clean overall with the only detracting mark being seen in the right reverse field (and that actually of minor consequence). Trends $2,550.

5610 PCGS **1850-C XF 40.** Usually not available in AU and most likely unknown in mint state, the best most collectors can hope for is a nice, problem-free XF such as this coin. Bright surfaces with a few minor handling marks, the coin shows the diagnostic weakness in the centers but overall is a very pleasing coin. Trends $1,800 in XF 40.

5611 NGC **1850-C AU 55.** The 1850-C is an issue that may not exist in mint state. None have been graded by either service, and considerable doubt has been cast on the three coins that have been auctioned as mint state since 1965. Four pieces have been certified as AU 55 (3 by PCGS and this single piece by NGC), making those four pieces tied for finest known. The surfaces of this coin show considerable prooflikeness still in the fields and the surfaces overall indicate that the coin was struck on a well prepared planchet.

5612 PCGS 1854-O AU 50. This is a very clean coin that only shows one noticeable dig between stars 11 and 12 (of minor note) and unusually lustrous surfaces for an AU 50 coin. Weakly struck in the centers with deep original color. This is overall a pleasing and attractive coin. Trends $600 in AU 50.

5613 Hallmark 1854-O AU 53. Well struck, especially so on the obverse, with semi-prooflike fields and showing none of the often seen clash marks so common to this issue. Trends $1,200.

5614 NGC **1855 MS 62.** Although this date is of little consequence in circulated grades, in mint state it, along with all other dates of quarter eagles from the 1840s and

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)● Texas WATS: 1-800-448-6470●Texas Phone: 214-528-3500

1850s, is of paramount importance both to the type and date collector. These early dates for many years were listed at the same value as the later dates from the 1890s and early 1900s. In fact, the Red Book still lists this date as having the same value in MS 60 as do the most common of the late dates. There has only been 1 other coin that has been so graded by NGC while PCGS has graded 9 pieces in MS 62. This is a lovely, well struck coin with excellent mint luster--light in color with a few marks on each side, none of which are distracting without a magnifier. Trends $500 in MS 60, $1,550 in MS 63.

5615 ANACS **1856-O AU 50.** This is an exceptional opportunity for the collector of rare gold to acquire this coin in such high grade. Mint state pieces, although they may exist, are off the market in major collections. This piece is quite pleasing with clean surfaces and a strong strike on the obverse but, as usual, shows some localized striking weakness on the reverse. Trends $1,900 in AU 50.

5616 NGC **1856-S MS 62.** Although the mintage of 71,120 is not sufficiently small to attract buyers who rely on that statistic alone as a criterion for rarity, this is a very rare issue in high grades. As far as we know, this is the only coin to have been certified in mint state. PCGS has graded one piece finer: an MS 63. It is exceptionally well struck, even displaying strong (but not quite complete) feather detail on the eagle's leg. The fields are prooflike and the surfaces are minimally abraded for the grade. This is a rare opportunity for the specialist in 19th century gold to acquire this elusive issue in a grade that places it among the finest (probably second finest) examples known. Trends $7,500 in MS 60; $15,750 in MS 63.

5617 NGC 1857-O XF 45. Well struck in the obverse with prooflike fields and clean, undamaged surfaces. The '57-O is a difficult issue that is scarcely seen above XF. This is an overlooked and much underappreciated issue that still seems unperprised in the pricing guides. Trends $335 in XF 40, $1,050 in AU 50.

5618 NGC 1858 XF 45. The 1858 is one of the scarcest P-mints from the 1850s, along with the 1850 and 1856. Well struck with only slight softness on the legs of the eagle and showing small, but noticeable, portions of luster around the devices.

5619 PCGS **1858-C XF 45.** Although showing the diagnostic weakness in the center of each side seen in all coins of this issue, there is no evidence of the poorly prepared planchets that are occasionally seen. The luster is bright and above average for the grade with rich reddish-orange color in the fields. Trends $1,450 in XF 40, $3,750 in AU 50.

5620 PCGS **1859-D XF 40.** A rare Dahlonega quarter eagle with an original production run of only 2,244 pieces. Although a few coins are rumored to exist in mint condition, so far none have been certified by the grading services, and we may have to assume that these alleged mint state coins may not measure up to today's grading standards. This coin shows the usual softness of detail on the highpoints of the design, but it is difficult to imagine a more attractive coin for the grade. The surfaces show no abrasions, nicks, or bumps and there is more luster around the peripheries than one would normally expect for a XF coin.

5621 PCGS 1859-S VG 10. A rare early S-mint that shows evidence of heavy wear and a few light field scratches on each side.

5622 PCGS 1868 AU 55. A very scarce post-Civil War issue with a mintage of only 3,600 pieces that is rarely seen in grades above XF. This piece has prooflike fields as do all examples of this date and the strike is complete in all areas. A very flashy coin for this rare date. Trends $925 in AU 50, $2,900 in MS 60.

5623 NGC 1868-S XF 40. A clean and attractive example of this moderately scarcer S-mint. Trends $355.

5624 NGC **1869 MS 61.** Very rare as an issue with an original mintage of only 4,320 pieces. While some authorities claim that the 1869 is occasionally available in mint condition, this has clearly not been the case over the past five years. There has only been one other coin graded in mint state by NGC, and that one is also MS 61. PCGS has not graded any. This is a lovely mint state coin with bright prooflike fields, a full strike, and deep reddish color over both sides. Trends $4,150 in MS 60.

5625 ANACS 1871 AU 50. A scarce quarter eagle with a mintage of only 5,320 pieces. This is a well struck coin with bright surfaces and a number of small handling marks on each side. Trends $925 in AU 50.

5626 NGC 1873 Open 3 XF 45. Above average luster for the grade.

5627 ANACS 1873 Closed 3 AU 55. The scarcer of the two varieties of the year, the surfaces retain almost complete mint luster and show a few small contact marks on each side. Trends $500 in AU 50, $1,600 in MS 60.

5628 PCGS 1882 AU 58. This is a very nice example of this popular, low-mintage issue. The fields are fully prooflike and the strike is complete in all areas with only a few minor abrasions noted. Trends $500 in AU, $1,400 in MS 60.

5629 PCGS 1884 AU 50. With an original mintage of only 1,950 coins the 1884 is a worthy acquisition for anyone interested in rare, underrated 19th gold issues. Sharply struck with attractive light orange-gold color. Trends $800.

5630 PCGS **1885 AU 50.** A very scarce and underappreciated issue that has not drawn that much attention over the years despite its tiny mintage of only 800 business strikes. As with most of the remaining 30 or so coins this piece is sharply struck with prooflike fields. Trends $2,900 in AU 50.

5631 PCGS 1887 AU 55. Another scarce, low mintage quarter eagle from the 1880s with an original production of only 6,160 pieces. Sharply struck with prooflike fields and attractive reddish color. Trends $550 in AU 50, $1,400 in MS 60.

5632 PCGS 1888 VF 35. Moderately scarce.

5633 NGC 1888 MS 61. A somewhat scarcer late date quarter eagle with a mintage of 16,001 pieces. Fully lustrous with the usual slight softness of strike in the centers. Trends $800 in MS 60.

5634 PCGS 1888 MS 62. Excellent luster with attractive reddish color and cleaner surfaces than one might imagine for the grade. Scarce. Trends $800 in MS 60.

5635 NGC 1891 AU 55. Bright surfaces albeit somewhat baggy.

5636 PCGS 1892 AU 53. Scarce, low mintage issue with an original production run of only 2,440 coins. Lustrous and somewhat prooflike.

5637 PCGS 1893 AU 55. Good color and a sharp strike.

5638 PCGS 1893 MS 63. Well struck with deep reddish-orange centers surrounded by a pronounced band of green around the edges. Trends $1,350 in MS 63.

5639 PCGS 1894 AU 53. A popular issue because of its low mintage of only 4,000 pieces. Good luster for the grade and fully struck.

5640 PCGS 1894 AU 55. Sharply struck and lustrous with red and olive color. Popular low mintage issue.

5641 PCGS 1898 MS 62. Fully struck with deep red color.

5642 PCGS **1902 MS 64.** A lovely, upper-end coin with deep reddish-coppery color and a full strike. A good coin for a high-end type set.

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)● Texas WATS: 1-800-448-6470● Texas Phone: 214-528-3500

5643 ANACS 1903 MS 62. Lustrous and well struck with good color.

5644 PCGS 1906 MS 61. Good luster for the grade.

5645 NGC 1906 MS 63. Fully struck with bright, lively colors.

5646 NGC **1884 PR 64.** Cameo. A sparkling piece of proof gold whose surfaces are covered with a thin layer of reddish patina. There are very few signs of contact, this coin has obviously been well taken of over the years. With only 73 proofs originally minted, the 1884 carries a substantial premium over the more commonly encountered dates of the 1890s and early 1900s--a fact even recognized by the Red Book. Only 30 or so are estimated to survive today in all grades. According to the NGC Census Report only 2 other pieces have been so graded with a single coin graded PR 65 Cameo.

INDIAN QUARTER EAGLES

5647 PCGS 1911-D XF 40. Light wear over the highpoints with rich orange-red color and clean surfaces. The D mintmark is weak as is often the case. An affordable entry-level coin of this scarce, key date issue.

5648 NGC 1911-D AU 50. A fully struck example of this rare, key date issue. The only defect noted on the surfaces is a squiggly scratch in the left obverse field. The mintmark is well defined and the coin is light in color. Trends $1,175.

5649 ANACS 1914 AU 58. A lustrous slider with just a touch of rub on the highpoint of the cheek.

5650 PCGS 1925-D MS 62. Fully struck with light color and a few scattered marks.

5651 PCGS 1925-D MS 64. Fully struck and lustrous with attractive color.

5652 PCGS 1926 MS 64. Pinpoint striking detail with superb luster and absolutely minimal marks.

5653 ANACS Two (2) 1927 MS 60. Well struck coins. (Total: 2 coins)

5654 NGC **1908 PR 62.** First year of issue for the type and the first year matte proof gold was struck in the United States. As such this is a very collectible coin. The granular texture of the surfaces is immediately apparent as is the telltale deep green hue, common only to this year's proofs. The surfaces are actually much cleaner than one might imagine from the grade with no shiny spots on the highpoints, only a few tiny contact marks in the fields, most noticeably on the reverse.

THREE-DOLLAR GOLD PIECES

5655 PCGS 1854 AU 55. Sharply struck with fine hair detail and well struck elsewhere with attractive yellow and orange color. A lustrous, near-mint example of this popular first year of issue.

5656 PCGS **1854 MS 61.** Although saved in relatively large numbers as the first year of its kind, in mint condition the 1854 is not as available as one might at first imagine. According to the PCGS Population Report there have only been 28 coins certified in this grade. Contrast that to a really common date such as the 1878 with 160 coins certified in MS 61. This piece is fully lustrous and sharply struck throughout with cleaner surfaces than would be expected from a coin in this grade.

5657 PCGS **1854-D VF 30.** The 1854-D three-dollar is one of the most desirable of all 19th century U.S. gold coins. Not only is it a rare coin with a mintage of only 1,120 pieces, but it is also the only three-dollar from the popular Dahlonega mint. One estimate has placed the number of survivors as high as 55 to 65 pieces but those numbers seem a trifle optimistic in light of how seldom the coin enters the marketplace. This piece shows even wear on the highpoints and the surfaces are remarkably clean for this grade. The fields have an attractive deep reddish hue that is partially accented by a steely-blue around the devices on the obverse. A nice coin for the grade and without a doubt one of the most important coins in this impressive offering of rare gold.

5658 ANACS **1868 MS 60.** A well struck example of this low mintage three-dollar that has much prooflike reflectivity in the fields with a faint trace of frost on the reverse. PCGS has only graded one coin in this grade and there are 14 certified higher, while NGC has only certified 8 pieces in all grades.

5659 PCGS 1874 AU 55. Sharply struck with good remaining luster and clean surfaces.

5660 PCGS 1878 AU 55. A well struck example of this popular three-dollar type coin. Significant portions of the original luster remain and each side shows rather deep golden-orange color. A few small marks are noted on each side.

5661 PCGS 1878 AU 58. The fields show a mixture of both cartwheel and prooflikeness, making it difficult to determine just how much luster is actually missing from the fields on this super slider. Sharply struck with minor abrasions on each side, this is a coin that could fool many an untrained eye.

5662 ANACS 1878 AU 58. A pleasing slider AU with excellent luster and a strong strike.

5663 ANACS 1878 AU 58. An exceptionally clean coin with almost complete mint luster in evidence and attractive, even orange-gold color.

5664 PCGS **1878 MS 61.** Well struck with attractive golden-yellow color, the fields show a faint glimmer of prooflikeness. Actually quite clean for the grade, this coin has been downgraded more for incompleteness of strike than for bagmarking.

5665 PCGS **1880 MS 61.** The 1880 has the distinction of having a very low original mintage of only 1,000 business strikes. While there are many low mintage issues in this denomination any coin with only a thousand struck qualifies as rare and worthy of attention by both the specialist and non-specialist alike. As with most examples of this date we have seen, the fields of this piece show a mixture of both prooflike reflectivity and mint frost. Sharply struck with a few minor marks in the fields, this is an attractive coin and is one of only 8 pieces to have been so graded by PCGS.

FOUR-DOLLAR GOLD PIECES

5666 PCGS **1879 Flowing Hair PR 50.** The famous "Stella," so named because of the large star on the reverse, is actually a pattern (Judd-1657). It was to be the American international coin that would be easily convertible into the monetary units of Austria, France, Italy, Spain, and The Netherlands. However, because of the relatively large number minted (425) the Stella has long since transcended the realm of pattern coinage. It has been regarded as a separate denomination and has been accepted as such by the publishers of the Red Book since its inception. In fact, enough people in the general populace regarded the coins as a new denomination that some of them, such as this coin, actually saw circulation. The surfaces of this piece are uncleaned and show no obvious or detracting marks on either side. This is a rare opportunity to acquire this highly sought after classic American coin in an affordable grade.

EARLY HALF EAGLES

5667 PCGS **1795 Small Eagle XF 40.** The Small Eagle half eagles and eagles are one of the most significant designs in U.S. numismatics. Struck in only one year, they are the initial design used on the first American gold coins. They are rare in all grades and highly sought after by collectors. Their popularity transcends market ups and downs because they are firmly linked to the collector base rather than the whims of investors. This piece is a solid XF with sharply defined hair details on Liberty but, as usual, showing no feathers on the neck or head of the bird. There are no adjustment marks on either side, but the obverse has a number of small contact marks from having been in circulation in the early part of the last century. Trends $8,000.

5668 PCGS 1834 Classic Plain 4 AU 50. Much sharper struck than most coins of the type, this piece has prooflike fields, as often seen, that tend to magnify the numerous small abrasions on each side.

5669 ANACS 1836 AU 50. Well struck with good remaining luster and showing a few small handling marks in the fields.

5670 PCGS **1838-C VF 25.** The 1838-C is the second rarest issue in the Classic half eagle series, second only to the 1834 Crosslet 4. It is seldom available in any condition and rarely seen above VF. This piece has the usual soft strike in the centers but seems totally original with a light reddish-orange hue over each side. Trends $2,350 in VF 20.

5671 PCGS **1838-C VF 30.** A very handsome example of this rare key date issue. The 38-C is not only the second rarest Classic five, but it is also the premier issue among Charlotte half eagles. As such it is of interest to both segments of the collecting community. This pressure from two strong collecting sources has kept the price of this issue high in both good and bad markets over the past twenty years. This piece is of completely original with traces of reddish color in the fields and good details in the devices. The reverse shows the often seen diagonal die break that completely traverses that side of the coin. Trends $2,450 in VF 20.

5672 NGC **1838-D XF 45.** This is an especially attractive example of this rare and highly sought after issue. The strike is strong with complete feather details and minimal loss of definition over the ear of Liberty. There are only a few slight abrasions on either side, none of which are worth individual mention. This is a particularly choice coin and we expect strong bidding on this lot. Trends $3,350 in XF $6,750 in AU.

5673 PCGS **1838-D AU 53.** Third rarest issue in the series of Classic half eagles--the only coins that are scarcer are the 1834 Crosslet 4 and the 38-C. This is a very elusive issue in AU or mint state with only 18 pieces graded in AU and a single mint state coin, and that a MS 60. This is a well struck piece with a few minor handling marks on each side some of which are serious and remnants of mint luster still to be seen around the edges.

LIBERTY HALF EAGLES

5674 ANACS 1840-O EF 45. Narrow Mill. A very scarce early New Orleans half eagle that is rarely ever seen any finer than EF. A clean coin that only shows the small handling marks one normally encounters with coins of this grade. Trends $775 in XF, $2600 in AU.

5675 Hallmark 1842-D Small Date VF 35. An original coin with surfaces that show virtually no contact marks and has good details remaining for the grade. Although a scarce issue, the Small Date is not as scarce as its Large Date counterpart. Trends $750 in VF 20.

5676 NGC 1843-C EF 40. One of the more commonly available Charlotte half eagles, this piece has bright yellow-gold color and is well struck on the obverse.

5677 ANACS 1843-C XF 40. A scarcer coin that one might assume from looking at the mintage and quite elusive above VF with an estimated 16-18 pieces believed extant in XF. A clean coin with a reasonably sharp strike for a Charlotte product. Trends $1,350.

5678 PCGS **1843-D AU 55.** Sharply struck with excellent remaining luster and scattered small abrasions. A lovely example of this relatively common Dahlonega half eagle.

5679 PCGS 1843-O VF 30. Large Letters. A nice VF coin with no particular problems that one would not normally expect to see on a coin of this grade.

5680 ANACS 1844-D XF 40. Bright surfaces with a sharp strike. A nice example of this relatively common date and a good choice for a XF type coin. Trends $1,175.

5681 PCGS 1844-O AU 50. A sharply struck example of this relatively common New Orleans five.

5682 NGC **1845-D AU 58.** Sharply struck in all areas and showing none of the usual weakness seen on most issues from this mint. The surfaces are bright and the fields semi-prooflike with an overlay of light reddish color on both sides. One of the more commonly available Dahlonega fives, but of course, very rare in AU 58 or mint state. Only 1 MS coin has been certified by the major services. Trends $2,200 in AU 50, $12,500 in MS 60.

5683 PCGS **1846-D D XF 40.** A clean and attractive Dahlonega half eagle with the popular and somewhat scarcer double punched mintmark.

5684 PCGS 1847 AU 55. Sharply struck with semi-prooflike fields. One of the more commonly encountered No Motto tens.

5685 NGC **1848-C XF 45.** The 1848-C is very scarce in any grade although 64,472 pieces were struck. Apparently most were used in the channels of commerce and few have survived today. Most coins have weak details in the center of the obverse, but this piece is actually quite strong on both sides with only slight softness noted on the eagle's neck. A clean coin with bright yellow-gold surfaces, this is an affordable example of this rare date. Trends $1,650 in XF 40, $3,600 in AU 50.

5686 ANACS **1848-C AU 55.** It is very unusual to have two examples of this rare issue in the same auction, even more unusual that they are both high grade, attractive coins. This is a superior coin with a good strike on both sides and remarkably clean surfaces. The fields are covered with a deep reddish-coppery patina that provides a pleasing accent against the greenish-gold color seen elsewhere on the coin. Termed by Breen as "Prohibitively rare in AU," only 7 pieces have been so graded by both PCGS and NGC with 2 coins in the lower grades of mint state. Trends $3,600.

5687 PCGS 1849 XF 40. Breen-6582, the Doubled 49 variety. Known since 1963, few have surfaced since. Classed by Breen as "Extremely rare." Clean surfaces with light reddish color around the devices.

5688 NGC **1850-C XF 40.** This is one of the more commonly encountered half eagles from this popular Southern mint, and as such is often used as a type coin. Showing some softness of detail on the highpoints of each side as is usually the case, the color of the coin is light, and there are a few scattered small handling marks. The mintmark is much sharper than usually seen and the coin is worth a small premium because of this. Trends $1,300 in XF 40.

5689 PCGS 1852 XF 45. An inexpensive No Motto half eagle.

5690 NGC 1852 AU 50. Well struck and light in color.

Heritage Plaza● Highland Park Village● Dallas, Texas 75205-2788● WATS: 1-800-US COINS (872-6467)● Texas WATS: 1-800-448-6470● Texas Phone: 214-528-3500

5691 PCGS **1854 AU 58.** A scarce and often overlooked coin that was for many years considered a common date. Nothing could be further from the truth. Uncirculated coins are very difficult to locate with only 7 pieces having been graded. Only 2 other pieces have been certified in AU 58. Sharply struck with rich orange-gold color, missing only the slightest bit of luster from the fields

5692 ANACS 1854-O XF 45. A rather common O-mint No Motto five that is well detailed for the grade with bright, semi-prooflike fields. Its only defects are a couple of light scratches in the left obverse field. Trends $525 in XF 40 and $1,200 in AU 50.

5693 NGC 1855-C EF 45. The 1855-C is one of the more commonly encountered late date Charlotte half eagles. This does not appear to be one of the often seen "seawater pieces," its surfaces still showing minute traces of prooflikeness around the obverse devices. The strike overall is quite strong with the only area of softness being in the center of the reverse. The surfaces show numerous small abrasions on each side, but none are especially large or distracting. An affordable Charlotte type coin.

5694 PCGS **1855-C MS 60.** As a date the 1855-C is a scarce coin, but not as rare in all grades as many other Charlotte issues. However, in mint condition it is EXTREMELY RARE. This is the only MS 60 graded by either service and only one other mint state example has been certified, that being a MS 63. Over the past several years several "salt water uncs." have appeared on the market, but this coin is clearly not of that ilk. The surfaces are fully lustrous and display a warm orange-gold tone. The fields and devices are minimally marked and the strike is quite strong throughout, being especially sharp at the edges. The central details are much sharper than usually seen as well. Overall, this is a pleasing mint state coin that stands as the second finest known.

5695 NGC **1855-D XF 40.** A scarce coin, even in XF. Akers states that the 1855-D is "...more rare in all grades than any of the D Mint coins from 1843 to 1854 except for the underrated 1848-50 coins..." A clean, problem-free example of this tough date.

5696 NGC **1859-C XF 45.** The 1859-C is the first of two successive years in which the same poorly prepared die was used for the reverse. As a result, grading these coins can be tricky. This piece has sharp details on the obverse with tiny bits of luster still to be seen around the devices. There are a number of small abrasions on each side but the only noticeable one is a shallow curving scratch that punctuates the lower obverse field picking up again on the neck of Liberty. Overall, a pleasing coin and an affordable grade (although one isn't likely to find a coin that grades any higher).

5697 NGC **1859-D XF 45.** Second lowest mintage in the Dahlonega series of half eagles, but not quite as rare as one might think--not quite a type coin--but not as rare as other coins with mintages similar to this issue's 10,366. This is a clean and attractive example with no objectionable marks and bright surfaces that show a thin outline of reddish patina around the devices.

5698 NGC **1860 AU 50.** One of the most difficult of all Philadelphia half eagles in the No Motto series, the 1860 began with a mintage of only 19,825 pieces and no doubt the impending Civil War caused most of those to disappear forever into the melting pot. According to Breen the 1860 is "prohibitively rare above EF." He is correct again: no mint state coins have been certified by either service and this is one of only 2 AU pieces NGC has graded, while PCGS has graded 4. This coin is sharply struck with bright surfaces that are lightly marked and show pale reddish color around the devices and edges. Trends $1,900.

5699 NGC **1860-D EF 40.** A very scarce late date Dahlonega half eagle with an original mintage of only 14,635 pieces. This is quite a striking looking coin even though it has twenty points of wear on its surfaces. The fields show the remnants of prooflikeness that, when new, must have been electrifying. Today they are somewhat subdued but still retain quite a bit of the original flash. Well struck with only slight softness noted on Liberty's hair curls and the neck of the eagle. An attractive example of this scarce issue that is seldom seen any finer.

5700 NGC 1861 XF 45. Sharply struck with numerous small handling marks on each side.

5701 NGC 1861 AU 50. Well struck.

5702 PCGS **1861-C VF 30.** The 1861-C owes much of its popularity not only to its low mintage of 6,879 pieces, but also to the fact that 887 coins were struck after Confederate forces took over the mint. It is generally believed that these coins show a die crack through AMER (which this coin has). While missing some highpoint detail from circulation, this is a smooth, problem-free coin for the grade with original, subdued reddish color. Trends $1,700 in VF 20.

5703 PCGS **1865-S XF 45.** The 1865-S is not only a rare coin per se, it is also one of the great condition rarities among all Liberty Bonnet half eagles. Only two pieces have been graded in AU 50 by either of the major grading services, mint state pieces are unknown. This is a sharply struck XF with attractive, original surfaces that show light reddish color in the fields and a fair amount of remaining luster for the grade. Trends $3,050 in XF 40, $10,500 in AU 50.

5704 PCGS 1866-S No Motto Good 6. A very rare issue and a coin that is apparently unknown in high grades. Granted, one can find pieces better than this one, but for an entry level coin this one would be hard to beat for the money. The surfaces are clean for the grade with deep reddish-coppery color

5705 ANACS **1868 AU 50.** A very rare With Motto five with an original mintage of only 5,725 pieces. There is only one mint state coin known and graded, that one being MS 60. This is one of the very few AU pieces known and as such is well up in the condition census. A well struck coin with even reddish-orange color, there are a number of small bagmarks on each side, but these may be unfairly magnified by the semi-prooflike fields. Trends $3,850.

5706 PCGS 1868-S VG 10. An original example of this scarce S-mint five with deep reddish colored surfaces.

5707 ANACS **1869-S XF 45.** A rare coin in any grade, being especially difficult above VF. No mint state coins have been certified by either of the major services. In fact, only 1 AU has been graded (by PCGS). This is among the finest coins known of this extremely rare issue. The surfaces are original with a reddish outline around the devices and a fair portion of original luster remaining. There is only one noticeable mark, that being in the right obverse field. An opportunity for the collector of rare gold to acquire this very difficult issue in high grade. Trends $2,350 in XF, $9,000 in AU.

5708 PCGS 1871-CC Fine 15. A scarce early CC half eagle in an affordable grade. Well worn with a few surface blemishes.

5709 ANACS **1871-CC XF 45.** A rare, key date early CC half eagle with an original mintage of only 20,770 pieces. None have been graded by either of the major certification services in mint condition, and only 1 piece has been graded as high as AU 50. This coin shows a few marks that are normal for coins from this mint and there is a noticeable amount of luster remaining on each side. A high grade example of this rare CC five. Trends $2,600 in EF, $7,000 in AU.

5710 PCGS 1873 AU 55. Open 3. Slightly scarcer than the Closed 3 variety and an underrated issue. Lustrous and well struck with rich reddish color

The October 1991 Long Beach Bullet Auction

5711 NGC 1873 AU 58. Closed 3. Slight rubbing evident in the fields. Somewhat baggy and appearing at first glance to be a low grade mint state coin.

5712 PCGS 1874-CC VG 10. A very rare Carson City five with a correspondingly low mintage of only 7,416 pieces. An original coin with considerable reddish color, the fields are remarkably clean for fifty points of wear.

5713 PCGS **1874 AU 55.** The original mintage was a mere 3,508 pieces and undoubtedly most of those were worn out in circulation as precious few survive today in any grade. Only one coin has been certified in mint state (the WGC coin no doubt) and only 3 pieces have been graded in AU by both certification services. This is an attractive coin, albeit somewhat marked on each side, with deep prooflike fields and a sharp strike. Trends $4,700.

5714 PCGS 1874-CC VF 35. While not of the same rarity as the other CC fives from the 1870s, the 1874-CC is nevertheless a scarce coin. This is a clean, well struck piece with tiny bits of luster still clinging to the devices. Trends $685 in VF 20, $1,350 in XF 40.

5715 ANACS **1875-S EF 45.** We are indeed fortunate to be able to consistently offer the buyers of rare U.S. gold as many scarce and rare coins as we have in recent auctions. We have been given consignments of coins from all U.S. mints representing the rarest and most desirable coins available in today's collector-focused marketplace. This 1875-S half eagle is one of the rarest coins from this mint with an original mintage of only 9,000 pieces. It is as well one of the great condition rarities in the entire Coronet half eagle series. Mint state coins are unknown. The finest coin graded to date is an AU 58. No other AUs have been certified, placing this coin in the middle range of condition census with 2 other XF 45 pieces. A very well struck coin with original surfaces that are minimally abraded, this is a pleasing, problem-free example of this major rarity. Trends $2,900 in XF 40, unlisted in AU.

5716 NGC **1876-S AU 50.** Another exceptionally rare S-mint half eagle, this one with an original mintage of only 4,000 pieces. Like the 1875-S above it is also an important condition rarity. However two mint state coins are alleged to exist even though none have been certified by the major grading services. This is the only coin graded in any condition by NGC. PCGS has certified 1 AU 55 with 5 pieces in lesser grades, the next finest being EF 40. The surfaces are bright golden-gold in color and are very sharply struck, showing virtually no abrasions. There is the minimum planchet mark on the upper obverse, at the ear that is diagnostic of all genuine 1876-S half eagles. Trends $11,000 in AU 50.

5717 Hallmark 1878-S AU 58. A scarce later S-mint that is especially difficult to locate in mint condition. This piece has almost complete luster, is sharply struck throughout, and shows a few small bagmarks in each side.

5718 PCGS 1880-CC Fine 12. Well worn but a clean, problem-free coin for the grade.

5719 NGC 1880-CC Fine 15. Despite its original mintage, the 1880-CC is almost as scarce as the much lower mintage 1879-CC. Well worn and free from any objectionable marks.

5720 NGC **1880-CC AU 50.** Very scarce in AU or better grades, this is an attractive piece with bright yellow-gold surfaces, a sharp strike, and good remaining luster. Trends $1,800 in AU.

5721 NGC **1880-CC AU 50.** Sharply struck on the obverse with lesser detail in the center of the reverse. The surfaces are light in color and show a fewer than average number of marks for a CC gold coin. Much scarcer than its mintage would suggest.

5722 ANACS 1880-S MS 63. Lustrous and well struck.

5723 ANACS 1882-CC XF 40. A common date CC half eagle with very clean surfaces and significant amount of russet color around the edges. Trends $490.

5724 ANACS 1882-CC XF 40. Light in color and well struck with minimal abrasions.

5725 PCGS 1883-S XF 45. Rich orange-gold patina and well struck throughout.

5726 ANACS 1884-S AU 50. A scarce and underrated issue that is especially difficult in AU or mint state. Lightly marked with light reddish color around the devices.

5727 ANACS 1884-S AU 50. A moderately scarcer date. Trends $300.

5728 PCGS 1885 MS 61. Reddish color.

5729 PCGS 1885-S MS 63. Sharply struck with a prooflike obverse.

5730 PCGS 1888-S XF 45. Lightly marked with rich reddish color.

5731 PCGS 1890-CC AU 55. A scarce CC five with good remaining luster but a bit soft in the centers.

5732 PCGS 1891 XF 40. A scarce and overlooked date with stronger luster than usually seen on a XF coin.

5733 NGC 1891-CC AU 58. Well struck with bright lustrous surfaces.

5734 PCGS 1891-CC MS 61. Fully lustrous and well struck. A common CC half eagle.

5735 PCGS 1891-CC MS 61. Stongly struck with superior luster and scattered bits of reddish color. Sharp looking coin.

5736 PCGS 1892-S AU 53. Good luster and a scarcer date.

5737 PCGS 1893-CC AU 50. Attractive and original. A very popular date in a very collectible grade.

5738 ANACS 1893-CC AU 50. A clean example of this popular final year of issue from the Carson City mint. The devices are outlined with a deep red patina and the strike is well brought up on both sides. Trends $775.

5739 PCGS 1893-O XF 40. A clean coin with a surprising amount of luster for the grade.

5740 NGC 1893-O AU 55. Sharply struck with light color. Trends $390 in AU 50, $1,300 in MS 60.

5741 NGC 1893-O MS 60. Sharply struck with bright, lustrous surfaces. Trends $1,300.

5742 NGC **1893-O MS 62.** For an issue that is supposed to be common, the 1893-O has an unusually small amount of mint state coins that have been graded. PCGS has only graded 10--the finest being MS 61. NGC has only graded 5--the finest being MS 63. Only 1 other MS 62 has been certified, making this one of the finest pieces graded (and probably known). Satiny with clean features, the only detracting element of this coin is a slight softness of strike.

5743 ANACS 1893-S MS 60. Slightly better date. Semi-prooflike fields and fully struck. Trends $675.

5744 PCGS 1893-S MS 61. Scarcer S-mint five.

5745 PCGS 1894-O AU 50. Somewhat scarcer issue. Sharply struck with bright, semi-prooflike fields.

5746 ANACS 1894-O AU 55. Somewhat scarcer O-mint with a mintage of only 16,600 pieces. Well struck with semi-prooflike fields.

5747 ANACS 1894-S AU 55. Sharply struck and prooflike. A

The October 1991 Long Beach Bullet Auction

scarce and valuable coin in such a high grade. Trends $925 in AU.

5748 PCGS 1895-S VF 25. Clean surfaces with traces of luster--the coin appears undergraded to us. Scarce

5749 PCGS 1896 MS 60. Scarce, low mintage date.

5750 NGC 1896-S AU 53. A scarce and seldom seen date. Original reddish color around the devices with slight friction in the fields.

5751 PCGS 1896-S AU 58. Very scarce as a date and quite elusive in mint condition. Well struck with almost complete mint luster and deep reddish color around the edges. Trends $675 in AU, $2,250 in MS 60.

5752 ANACS **1896-S MS 60.** A very scarce issue in any grade but very rare in mint condition. PCGS and NGC have only graded 1 coin MS 60 with 4 finer. This is a sharply struck coin with excellent luster. Trends $2,250.

5753 PCGS 1897 MS 63. Lustrous and well struck.

5754 ANACS 1897-S AU 50. Scarce and a very collectible coin. Trends in 21's $625.

5755 PCGS **1897-S MS 60.** A very difficult S-mint half eagle to locate in any grade. To date this is the only MS 60 graded by PCGS with only 9 pieces finer. Well struck with good mint luster. Trends $1,850.

5756 ANACS 1900-S AU 58. Lightly bagmarked. Scarcer late date half eagle. Trends $325 in AU, $975 in MS 60.

5757 PCGS **1901-S MS 64.** Fully struck with beautiful satiny luster that is thick and unbroken except for a few tiny abrasions. Strong eye appeal and an excellent type coin.

5758 NGC 1902 MS 62. Sharply struck with reddish-orange color.

5759 PCGS 1905 MS 63. Fully struck with scattered bits of russet around the edges.

5760 Hallmark 1905-S AU 55. Well struck with light reddish color. A scarce and underpriced gold coin. Trends is only $285 in AU.

5761 PCGS 1906-S MS 62. Fully struck with attractive luster and minimal abrasions for the grade. Slightly scarcer date

5762 PCGS 1906-S MS 63. Somewhat scarcer as a date, but very scarce in this condition. Only 9 pieces have been so graded by PCGS. A choice coin with bright, lustrous surfaces.

5763 ANACS 1908 MS 62. Final year of issue and a sharply struck coin.

INDIAN HALF EAGLES

5764 ANACS 1909 MS 60. Good color and cleaner than most five Indians in this grade.

5765 PCGS 1910-D MS 61. Well struck with deep orange-red color

5766 ANACS 1910-S AU 58. A much scarcer coin that one might imagine for such a substantial mintage. Uncs are very rare and this piece has almost complete mint luster with a sharp strike and minimal abrasions, with only slight rub on the highpoint of the cheek--a coin that would surely have been sold as an Unc. ten years ago.

5767 ANACS 1911-S XF 45. A clean coin with sharp, well defined features.

5768 ANACS 1915-S AU 50. One of the great rarities of the five-dollar Indian series, this date is almost never found in mint state. This piece has a number of small abrasions on either side but is well struck--a good value in this grade. Trends is $800 in AU.

5769 NGC 1915-S AU 55. One of the rarest gold coins of the 20th century, especially in mint condition, the 1915-S is a wise purchase in AU 55 because of the huge differential in price between AU and MS coins. This is a sharply struck coin with considerable reddish color and a number of contact marks in the fields, but retaining considerable luster. Trends $800 in AU 50.

5770 ANACS **1915-S AU 58.** Highly lustrous with just a touch of friction on the highpoint of the cheek. The surfaces are clean and this is a very desirable slider AU of this important 20th century gold rarity. Only 15 coins have been certified in mint state by PCGS of this date with the finest one being MS 63.

5771 PCGS 1916-S MS 62. An attractive coin with considerable mint frost and covered with deep reddish-orange patina. Fully struck with minimal marks for the grade, this is a premium quality coin. One of 20 pieces to have been so graded with only 19 finer.

LIBERTY EAGLES

5772 PCGS 1839 Large Letters VF 30. While termed by PCGS as the Large Letters variety this is actually the type from 1838 with a distinctly different portrait of Liberty. The more common of the two dates in this two year type, the 1839 is nonetheless a very scarce coin in any grade. Sharply struck in the centers with slight weakness at the edges, the fields show only minor marks. An affordable grade for this scarce issue with Trends only listing at $750 for a VF 20.

5773 NGC 1842 XF 40. Large Date. Original surfaces that show numerous small abrasions from handling.

5774 ANACS 1842 Large Date EF 45. An average coin with the usual number of small abrasions. Of approximately the same scarcity as the Small Date.

5775 PCGS **1842 AU 55.** Small Date. A scarce early ten that is especially difficult in grades above XF. Only one coin has been graded in mint state (and that one by PCGS), 32 have been certified in all grades, but only 3 others have been graded in AU 55. This is a bright, well struck coin with a considerable amount of luster remaining that is plainly evident in the fields. Trends $2,950 in AU 50.

5776 PCGS **1844 XF 45.** David Akers probably summed up this issue best when he wrote, "This date has the second lowest mintage of this type from 1839-1857 and its rarity matches its low mintage." No mint state coins have been graded and only 1 AU has been certified to date. This piece has clean, original surfaces that are quite well detailed and show scattered portions of reddish color, most noticeably on the reverse. Trends $3,750 in XF 40, $9,000 in AU 50.

5777 PCGS 1844-O VF 35. The obverse shows an outline of reddish patina around the devices. A nice coin for the grade.

5778 PCGS 1845 VF 35. A rare and difficult issue in any grade and seldom seen above VF. Attractive surfaces that are light in color with no large or distracting problems. Trends $610 in VF 20, $2,300 in XF 40.

5779 PCGS 1846 VF 30. An exceptionally difficult issue with an original mintage of only 20,095 pieces. This is a very clean coin that has a pronounced reddish color on each side. Trends $1,075 in VF 20.

5780 ANACS 1846 VF 30. Unlike the coin immediately above, this piece lacks the reddish color. Instead, it has lighter colored surfaces with a faint bit of gray around the devices and shows numerous small handling marks on each side.

5781 PCGS **1846 5-O VF 35.** This very rare overdate was only discovered in the mid-1950s and since that time very few coins have surfaced. It is unknown in uncirculated and according to the July Population Report (the most current information available for circulated coins) only 4 pieces have been graded. The finest graded was XF 40! This piece is obviously original and shows a number of small marks on each side, the only ones of note being just to the right of the date and above the eagle.

5782 ANACS 1847-O XF 40. Slight bagginess but good luster for the grade. One of the more common dates in the No Motto ten series.

5783 PCGS **1847-O MS 60.** The majority of this series is so rare in VF-AU grades, that one finds it easy to believe that mint state coins are of extreme rarity, their survival being left only to the capricious nature of chance over the past 140 years. This lovely piece is bright with complete mint luster and just a tinge of color around the devices on each side. The central details are sharply struck but the edges are a bit soft, most noticeably around the stars. As can be inferred from the grade there are a few abrasions, but one can become so transfixed by the luster and originality of the coin that these few superficial flaws are of secondary importance. There has only been 1 other coin to have been so graded by PCGS with 2 finer. Trends $4,600.

5784 ANACS 1849 XF 40. Well struck with no impairments noted. A common No Motto ten.

5785 PCGS 1851-O XF 45. A slightly better date in XF. A lustrous, no-problems XF.

5786 PCGS 1852 XF 40. Reddish-orange color with tiny portions of luster still to be seen within the recesses of the design.

5787 PCGS 1853-O XF 40. A moderately scarcer No Motto ten. This piece has very clean surfaces and bright fields that show the remnants of a prooflike finish.

5788 PCGS 1854 AU 50. A rare date that is seldom seen above XF. This is an original coin with an attractive outline of red around the edges and a significant amount of remaining luster. Only one mint state coin has been certified by both services.

5789 ANACS 1855 AU 50. Only slightly scarcer when compared to other issues of No Motto coins. This piece shows numerous small bagmarks on each side with good portions of luster remaining.

5790 PCGS **1855-S VF 25.** The 1855-S is almost an unknown issue to the general collecting public. Yet its true rarity is staggering. Only 9,000 pieces were originally struck and of this small original number none have survived in mint state. The finest graded to date is an AU, certified by NGC. Even EF coins are rarely encountered. This is an original coin with pinkish-red color and several small to moderate bagmarks, the only one of any real consequence being an ugly scratch in the field above the eagle. This is a rare opportunity for the specialist in this scarce and fascinating series. Trends $1,450 in VF 20.

5791 PCGS **1857 XF 40.** An elusive issue with a small mintage of only 16,606 pieces. Few exist today in EF or better condition. This is a solidly graded coin with strong central details and considerable prooflikeness remaining in the fields. Trends $1,400 in XF.

5792 PCGS 1857-S VF 25. Another very scarce No Motto ten that is seldom seen any finer than VF. Akers compares the 1857-S to the 1855-S saying it is "very nearly as rare." Yet in VF it is usually only valued at a third of the price with Trends for the '57-S only $445 in VF 20. A pleasing coin that appears finer than the stated grade.

5793 PCGS **1859-S VF 25.** The 1859-S is one of the key issues in the highly collectible series of No Motto tens. Akers compares it to the 1858 and 1859-O. It original mintage was only 7,000 pieces and very seldom is it seen above VF, apparently being unknown in mint condition. This is a clean coin with even wear on the highpoints and light reddish color. Trends $2,750 in VF 20.

5794 PCGS 1860 EF 40. A very scarce and underrated date. Reddish color with a few scattered light marks and localized striking weakness on the stars. The Population Report for July only shows 4 pieces having been certified in this grade, with only 6 higher. Trends 18 21 $1,275.

5795 PCGS **1860 AU 53.** Very scarce as an issue with an original mintage of only 15,105 pieces. It is even scarcer in this condition with 4 coins graded in AU, only 1 is finer. This is a sharply struck piece with bright surfaces and considerable prooflikeness noted in the fields. Trends $2,450 in AU 50.

5796 PCGS 1860-O XF 40. A very scarce No Motto ten and the final O-mint in the series (not resuming again until 1879, long after the start of the With Motto design). This is a well struck coin that is light in color and shows a few scattered abrasions, none of which are important enough to mention. Trends $1,300.

5797 PCGS 1861 XF 45. The most common date of the type.

5798 NGC **1861-S XF 45.** The mintage of 15,500 pieces does not begin to convey the rarity and importance of this coin, especially in this grade. There are no mint state coins in existence. Akers didn't find any in his auction survey, he hadn't heard of any, and neither of the major grading services has ever graded one. How about AU? Two pieces, one from each service. XF? The population balloons to a whopping 6 coins in XF. This coin is almost extinct. It belongs on some national register along with the gray spotted owl and the small darter. The surfaces are relatively clean for the grade with tiny bits of luster still to be seen clinging to the devices. The strike is somewhat irregular with soft stars, weak hair curls, and strong feather details. Trends $4,350 in XF, $13,000 in AU.

5799 PCGS **1862 XF 45.** A surprisingly difficult date with a mintage of 10,995. Presumably most were melted during the War. It seems that none exist today in uncirculated (none that will grade as such by today's standards), nor have any been graded by either certification service in AU. This and 2 other pieces are the finest that have been graded. Although rather extensively bagmarked, the surfaces are bright and well struck. Trends $1,400 in XF 40.

5800 PCGS **1863-S EF 40.** Attractive and well struck with a trace of mint luster remaining. Very scarce. According to the June Population Report, only one EF 40 has been certified (this is a second one) with 3 higher. Current (8 21) Trends value is a conservative $4,500. Always in great demand, this coin should see spirited bidding.

5801 PCGS **1864 VF 35.** A very rare No Motto ten, struck during the Civil War when mintages on all coins were low and the attrition rate very high (mostly because of meltings here and abroad). The original mintage was only 3,580 pieces but that number does not begin to tell the story of this coin's actual rarity. Probably fewer than 20 exist today in all grades. This piece has a pronounced reddish color around the devices and the surfaces are clean and problem-free, making this an excellent coin for the collector. Trends $1,625 in VF 20, $4,600 in XF 40.

5802 NGC **1864 AU 50.** A very rare, low mintage Civil War gold piece with an original production of only 3,580 pieces. Undoubtedly the vast majority of these were melted as only 12-15 pieces may exist today in all grades. Only one coin has been certified in mint state, an MS 60 (presumably the Miles coin) and 2 other AUs have been graded (both by PCGS). That is an impressively low number of high grade survivors, placing this coin in the middle of the condition census. Well struck with attractive orange-gold color and only a few small bagmarks on either side. Trends $12,800 in AU 50.

The October 1991 Long Beach Bullet Auction

5803 PCGS **1866-S No Motto EF 40.** One of the rarest of all Eagles, ranking only behind the 1875 and 1864-S. Prohibitively scarce in high grades. Akers lists none above XF. This piece is an opportunity to acquire what many numismatists only dream about; a chance which may not be repeated any time soon. Trends $7,000.

5804 ANACS **1869 XF 45.** When faced with as many rare gold coins as are offered in this auction, perhaps the most overused word is "rare." But no other word can best describe a coin such as this one. The original mintage was a tiny 1,855 pieces and hardly any survive today for the collector market. Breen says XF coins are "prohibitively rare." The fields of this piece are bright, retaining much of their original prooflikeness. There are also a number of small bagmarks, but none of these are large or of any real significance. Well struck also. This is one of the finest pieces known of this rare date and is well within the condition census for the issue. Trends $4,400 in XF 40, $13,750 in AU 50.

5805 NGC **1870 AU 50.** From the original mintage of 4,025 coins only a small handful have survived in any condition. Interestingly, there has never been an offering at public auction of this date in mint state, not even a rumor of such a coin exists. This is the only AU graded by NGC and PCGS has only certified 3 pieces (also all AU 50s). Prooflike fields with slight softness of detail noted on the obverse (no, it's not a circulated proof) with a few tiny handling marks in the fields and attractive orange-gold color. Trends $5,250.

5806 PCGS **1876-S VF 20.** This is a very elusive With Motto coin with an original mintage of only 5,000 pieces. Virtually nothing survives in high grade (XF or better) with the few pieces known being VF or worse. One could not ask for a more problem-free coin for the grade. It is a perfect VF 20 with smooth, unblemished surfaces and attractive, light color. Trends $1,900.

5807 PCGS **1877-S XF 40.** A very scarce and seldom encountered With Motto ten. The original mintage was 17,000 pieces and of that number none are known to exist today in mint state. Only 2 coins have been graded in AU (both by PCGS). This piece is reasonably well detailed with pleasing, clean, original surfaces that have taken on a light reddish patina. Very scarce in XF with Trends listing the coin at $1,850.

5808 PCGS 1878-S VF 30. A very scarce and underrated coin that is all but unknown above XF. Well struck with minimal marks and light reddish color. Trends $700 in VF 20.

5809 PCGS 1879 AU 50. An original coin with scattered brown encrustations around the edges.

5810 PCGS 1879 AU 55. Very sharply struck with almost complete mint luster remaining.

5811 ANACS 1879-S XF 40. A moderately scarce coin with prooflike fields and a sharp strike.

5812 PCGS 1879-S AU 53. An attractive example of this scarcer S-mint. Lustrous and well struck with clean surfaces. Trends $440 in AU 50.

5813 PCGS 1880 MS 60. Deep reddish color with a couple of copper stains on the obverse.

5814 PCGS 1880 MS 60. Distinctive pinkish-orange luster.

5815 PCGS 1880 MS 60. Deep orange-red color.

5816 PCGS 1880 MS 60. Baggy but highly lustrous.

5817 PCGS 1880 MS 60. Sharply struck with attractive color and luster.

5818 PCGS 1880-CC VF 20. A scarcer CC ten. Clean surfaces just 40 points of wear.

5819 PCGS 1880-O VF 25. Scarcer O-mint. Bright surfaces with a bit of color around the devices. Trends $355 in VF 20.

5820 PCGS 1880-O XF 40. Original surfaces on this scarce, late date O-mint ten.

5821 PCGS 1880-O XF 40. Scarce O-mint ten that is very rare any finer than EF. An original coin with a few chatter marks in the fields.

5822 NGC **1881-CC AU 55.** A rare CC ten with a mintage of only 24,015 pieces. Very rare and essentially unobtainable in mint condition with only 2 pieces having been graded (one by each service). This is a well struck XF with good luster and absolute minimal surface abrasions. Trends $1,150 in AU, $4,000 in MS 60.

5823 PCGS 1881-S AU 50. More lustrous than usually seen for this grade.

5824 ANACS 1882-S AU 50. Scarce. Attractive pinkish color around the devices.

5825 PCGS 1883 MS 60. Well struck with deep, original color.

5826 PCGS **1884 MS 60.** The 1884 is a scarce coin in any grade, but it is a major condition rarity in mint state. This is only the second coin to have been certified in mint condition by the major grading services. The other coin is MS 63, making this one the second finest known and the more affordable of the two. Sharply struck and fully lustrous, the surfaces show the usual small abrasions one associates with a MS 60 coin. Believe it or not, as rare as proofs of this date are, they are actually more available than unquestioned mint state business strikes! This is an extraordinary opportunity for the collector to acquire this rare date in mint condition.

5827 PCGS 1884-S XF 40. Good luster and color for the grade.

5828 NGC 1884-S AU 50. Flashy pink and steely-blue color. A difficult coin in AU.

5829 ANACS 1884-S AU 55. A colorful coin with considerable prooflikeness in the fields and a number of small marks on each side.

5830 NGC 1885 MS 61. Sharply struck with bright, flashy luster. As a date the 1885 is uncommon, but it is very scarce in mint condition. This is the only MS 61 graded by NGC and only 3 have been certified in higher grades.

5831 PCGS 1885-S AU 50. Another scarcer S-mint. Reddish color around the devices with an ununusal amount of luster for the grade.

5832 PCGS 1886 AU 55. A slightly scarcer late date P-mint. Bright, fully struck surfaces.

5833 PCGS 1886 AU 58. Sharply struck with bright, flashy luster. Scarcer date. Trends $425 in AU 50, $1,100 in MS 60.

5834 PCGS 1886-S AU 55. Well struck.

5835 PCGS 1887-S MS 60. Colorful with pink centers and deep orange around the edges.

5836 PCGS 1887-S MS 61. Only 14 certified (with 5 higher, all 62s) according to the August Population Report.

5837 PCGS 1888-O AU 55. Relatively clean surfaces for the grade.

5838 PCGS 1888-S AU 55.

5839 PCGS 1888-S AU 58. Deep orange color with almost full mint bloom.

5840 PCGS 1888-S MS 60. Well struck and lustrous.

5841 PCGS 1889-S AU 55

5842 ANACS 1890 XF 45. Scarcer date with clean surfaces and a good strike. Trends $330 in XF, $410 in AU

5843 PCGS 1891-CC AU 50. Good luster for the grade with scattered bits of russet coloration around the edges. Trends $485.

5844 PCGS 1891-CC MS 60. Fully struck with bright golden-orange color. A common date CC ten.

5845 NGC 1891-CC MS 60. Sharply struck with the usual strong luster this issue is known for

5846 ANACS 1891-CC MS 60. Bright color with excellent luster Well struck. Trends $775.

5847 PCGS 1892 MS 60. Pronounced orange-red color and well struck.

5848 PCGS 1892-CC XF 40. A common CC ten with more remaining mint luster than usually seen on coins of this grade.

5849 PCGS 1892-O AU 53. Good luster with a few contact marks

5850 PCGS 1892-O AU 55. Numerous small bagmarks on the obverse with a bit of luster missing from the fields

5851 PCGS 1892-O AU 55. Well struck with rich orange-gold color.

5852 PCGS 1892-O AU 58. Superb color and luster

5853 ANACS 1892-O MS 60. Somewhat baggy but fully lustrous

5854 PCGS 1893-CC VF 35. Unlike its half eagle and double eagle counterparts the 1893-CC eagle is quite a scarce item. This coin has much of the deep red coppery color seen in coins of this year and from this mint. Trends $375 in VF, $575 in XF.

5855 PCGS 1893-S AU 58. While there are many scarce and underrated ten-dollar Liberties, few of the later dates have the distinction of being virtual keysin the better grades of mint state. These numbers are quite revealing: there have been 7 pieces graded in AU 58, 8 in MS 60, and 6 in MS 61. But none have been graded any higher than MS 61. This piece has just a trace of rub in the fields is very sharply struck and has most of the luster and eye appeal of a mint state coin. A pleasing quality piece.

5856 PCGS 1894-S XF 40. A scarce S-mint with attractive original surfaces

5857 PCGS 1895-O AU 53

5858 PCGS 1895-S VF 40. A scarce and formerly overlooked issue that has recently begun to receive its just recognition. Deep russet color around the devices

5859 ANACS 1896-S AU 50. Another scarce S-mint. Good luster and clean fields. Trends $1,125

5860 PCGS 1897 MS 62. Thick original luster and well struck. A scarcer coin in the better conditions of mint state

5861 PCGS 1897-S AU 55. Almost complete mint luster and well struck with scattered bits of coppery-red color in the reverse fields. A somewhat better date.

5862 ANACS 1897-S AU 55. Sharply struck with relatively clean surfaces. At first glance it looks uncirculated.

5863 NGC 1899-S AU 53. Well struck with a few handling marks in the fields.

5864 ANACS 1899-S MS 60. Sharply struck with good mint luster.

5865 PCGS 1900 AU 55. Fully struck with bright surfaces and good luster.

5866 PCGS 1901-O MS 60. A scarcer late date O-mint with a mintage of only 72,041 pieces. Fully struck and clean but a bit lackluster to grade any higher. Trends $750.

5867 PCGS 1901-O MS 62. Fully struck with satiny luster. Scarce, especially in this condition with only 4 coins having been so graded and only 7 finer.

5868 NGC 1901-S MS 62. One thing that is constant about all 1901-S tens is the outstanding luster. Bagmarks may vary and this coin has a few, but the luster is always exceptional

5869 PCGS 1901-S MS 63. Fully struck with superb luster

5870 PCGS 1901-S MS 63. Superb, dazzling mint luster and fully struck as well.

5871 PCGS 1902-S MS 63. Bright, sparkling mint luster with few abrasions to distract the viewer. This is a lovely type coin that is fully struck and appealing for the grade.

5872 NGC 1903-O AU 55. Bright, fully struck surfaces

5873 PCGS 1903-O MS 60. An affordable mint state New Orleans ten-dollar.

5874 PCGS 1903-S MS 63. Fully struck with beautiful orange tinted mint luster that shows a few scattered flecks of steely-blue. An attractive type coin.

5875 PCGS **1903-S MS 64.** Fully struck with smooth, highly lustrous surfaces that show a subtle red and pale green patina. A lovely coin with minimal abrasions. Only 69 have been so graded with only 22 finer.

5876 PCGS 1904-O MS 60. Fully lustrous and generally well struck (except on the stars).

5877 PCGS 1905 AU 55. Sharply struck with only slightly subdued luster

5878 ANACS 1905-S AU 50. An underrated, better date among the later No Motto tens. PCGS has not graded any in mint state. NGC has only certified 1 in MS 60 and 1 in MS 61.

5879 ANACS **1905-S MS 60.** A MAJOR RARITY! This is the ONLY mint state 1905-S eagle graded by any of the major services, and indeed the only mint state 1905-S eagle we have handled or seen in well over a decade. Bright lustrous surfaces, held back from a higher grade by a planchet flaw in the left obverse field. A vastly underrated coin.

250

5880 PCGS 1906 AU 55. Well struck.

5881 ANACS 1906-D MS 60. Sharply struck and satiny

5882 PCGS 1906-O MS 60. A very scarce eagle from the New Orleans mint and especially difficult in mint condition. Only 6 pieces have been graded MS 60 by PCGS.

5883 PCGS 1906-S AU 58. A nearly uncirculated example of this better, late date Ten Lib. Rich orange color and sharply struck. Trends $340 in AU 50, $675 in MS 60.

5884 PCGS 1907 AU 58. Fully struck with bright, almost prooflike, surfaces

5885 ANACS 1907 MS 62. Good luster and a sharp strike, just a little baggy.

5886 PCGS 1907-S AU 55. The obverse is quite clean, most of the hits being on the reverse, and the luster is still strongly in evidence on this scarce and underrated coin. Trends $425 in AU 50, $1,250 in MS 60.

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS

Heritage Plaza ● Highland Park Village ● Dallas, Texas 75205-2788 ● WATS: 1-800-US COINS (872-6467) ● Texas WATS: 1-800-448-6470 ● Texas Phone: 214-528-3500

5887 PCGS 1907-S MS 60. Superb luster and a strong strike with attractive orange-gold color. Trends $1,250.

INDIAN EAGLES

5888 PCGS 1907 No Motto MS 63. This remains one of our favorite gold type coins. Not only is the design less cluttered without the motto, but the surfaces of the 1907 coins have a smooth satiny texture quite unlike that seen on other issues. This is a very clean coin with bright lustrous surfaces and a strong strike, especially on the reverse.

5889 NGC 1908-S AU 53. Showing evidence of light circulation without showing any large or distracting marks, this is a pleasing and affordable example of this scarce ten-dollar Indian.

5890 NGC 1908-S MS 61. A scarce, low mintage issue with an original run of only 59,850 business strikes. This is a sharply defined coin with lustrous surfaces that have taken on a pronounced reddish color. Only 3 pieces have been so graded by NGC with a mere 15 finer.

5891 ANACS 1909-D AU 58. A scarce and underrated issue that is especially difficult to locate in mint state. A clean, problem-free coin that only shows slight friction on the highpoints.

5892 ANACS 1910-S AU 50. Like the 1909-D this is another issue that is very difficult to locate in mint condition. This lightly circulated coin has clean fields and a significant portion of red color around the devices.

5893 ANACS 1911 MS 61. Sharply struck with bright yellow-gold color, satiny luster, and slight granularity to the surfaces.

5894 PCGS 1912-S AU 50. Even wear over the highpoints and showing subtle variegated color in the fields. Scarce in mint state.

5895 ANACS 1912-S AU 50. This is a very elusive issue in mint condition, making this AU 50 a very collectible item. As usual, not well struck; the surfaces show considerable granularity and scattered small marks.

5896 PCGS 1912-S MS 61. The 1912-S is one of the most difficult issues in this series to locate in mint state and weak strikes abound when found. The surfaces on this coin show numerous small marks and these account for the grade, but the strike is very sharp, especially so on the obverse with good mint frost overall.

5897 PCGS 1913-S AU 50. A very rare ten-dollar Indian with an original mintage of only 66,000 pieces. Virtually unobtainable in mint condition, this original, clean, and lightly worn coin is a presentable alternative to the nearly impossible task of trying to locate one in mint state. Trends $1,050 in AU 50.

5898 ANACS 1916-S AU 58. Lustrous with just a bit of friction in the fields.

LIBERTY DOUBLE EAGLES

5899 NGC 1850 AU 55. Usually seen in VF-XF condition, this popular first year of issue is quite scarce in AU or better. This piece is fully struck with bright yellow-gold color and no mentionable abrasions on either side. It looks uncirculated and has almost complete mint luster, with just the lightest rub in the fields.

5900 PCGS 1851 XF 40. Slight bagginess in the fields but fair amounts of luster still clinging to the devices.

5901 PCGS 1852 AU 50. Sharply struck.

5902 ANACS 1852-O VF 30. A clean, problem-free example of this relatively common O-mint.

5903 ANACS 1852-O XF 40. A bright, attractive, and well struck coin with prooflike fields on the obverse.

5904 PCGS **1853/2 XF 45.** For years little or nothing was known about this coin or if it really existed. Apparently it does not exist in mint state but seven circulated pieces have been graded by PCGS. The downstroke of the 2 is clearly visible within the lower loop of the 3 with a magnifier. Even with the unaided eye one can tell something is there. The surfaces of this piece are lightly abraded and there is a noticeable portion of luster still to be seen around the devices. Trends $1,100 in XF 40, $3,000 in AU 50.

5905 ANACS 1853-O VF 30. A perfect coin for the grade with no abrasions, bumps, or nicks apparent. This is a very scarce Type One twenty that is especially difficult in XF or better condition. In VF it is really quite affordable though with Trends listing the coin at only $555 in VF 20.

5906 ANACS **1853-O AU 50.** This is a very scarce and underrated coin among the Type Ones with the bulk of surviving pieces being in the VF-XF grades. In AU this is a coin to sit up and take notice of. The fields, although bagmarked from circulation, have a strong residual prooflike reflectiveness, and the strike is very strong for an O-mint. Trends $3,750.

5907 PCGS **1854-S MS 61.** Fully struck with somewhat subdued luster. Mint state Type One twenties are of the greatest rarity. PCGS has only graded 6 pieces of this date in MS 61 with 18 finer.

5908 ANACS 1855-S XF 45. An original looking coin with light reddish color.

5909 ANACS 1856-S XF 40. Unusually bright surfaces with good remaining luster.

5910 ANACS 1857-S XF 40. A clean, well detailed XF coin.

5911 ANACS 1858-S XF 40. Deep orange-gold color.

5912 PCGS 1859 VF 30. Although well worn, there are still tiny bits of original luster to be seen around the devices on the reverse. A scarcer and often overlooked issue among the Type Ones.

5913 NGC **1859-O Fine 15.** A very rare issue among Type One twenties, one that Akers ranked fifth rarest of the 13 O-mint issues in the entire series. He rated it as rarer than even the more famous 1879-O. A well worn piece, there either weren't any noticeable marks on this coin to begin with, or the 45 points of circulation have worn them down. Either way, this is a clean coin for the grade with all major design details showing plainly although some of the interior details (feathers, hair) have faded. Trends $1,900 in Fine 12.

5914 ANACS 1859-S XF 40. Smooth, virtually unblemished surfaces with rich orange-gold color.

5915 PCGS **1860-O XF 40.** A very rare New Orleans twenty with an original mintage of only 6,600 pieces. Of this date David Akers said, "...the 1860-O is so rare that it is not often available even in the lower grades. According to rarity based on both average grade and frequency of appearance, the 1860-O ranks in the top 10% of the entire Double Eagle series." Generally well struck for the grade (except on the first four stars as always) there are no obvious or particularly distracting marks on either side and the surfaces appear to be completely original with the devices having taken on an outline of light reddish patina. Trends $7,000.

5916 ANACS **1860-S AU 55.** One of the scarcer S-mint twenties that Akers ranks alongside the 1854-S, 1861-S, 1862-S, and 1864-S. Only 2 mint state coins have been graded by PCGS.

none by NGC, making this one of the finest pieces known. Well struck with almost complete luster remaining and a strong semi-prooflike reverse. Trends $1,550 in AU 50.

5917 PCGS **1861 MS 61.** A lovely coin with clean surfaces and a complete, full strike in all areas. Only a deficiency in luster holds this coin back from grading much higher. One of 21 coins to have been so graded of this "common" date.

5918 PCGS **1861-O VF 30.** A rare New Orleans twenty--rare in any grade and made even more desirable because part of the mintage was struck under the auspices of the Confederacy. This is an attractive coin with even wear over the highpoints and only minor marks in the fields. There is a planchet flake out of the upper reverse field but at this grade level that hardly affects the value of the coin. No coins have been graded in mint state (knowlegable sources believe none exist) and only 2 AUs have been certified. Trends $1,450 in VF 20.

5919 ANACS **1861-S Paquet Reverse XF 40.** In this sale there are many scarce and rare gold coins, but few can rival the rarity and desirability of a Paquet twenty. The Paquet is a separate one-year type coin, struck from dies that were redesigned by Anthony Paquet. The difference is immediately recognizable. The lettering on the reverse is much taller and there is no determinate rim to the coin. This latter distinction is what led to the coin's demise: the lack of a high edge caused the reverse to take on abrasions more readily and wear away more quickly. But before Mint Director Snowden could stop production 19,250 had been struck with Paquet's reverse. These are not patterns or experimental pieces; these are regular production coins and are an integral part of any U.S. type set. They are also very rare. Apparently none exist in mint condition. PCGS has only certified 18 pieces in grades ranging from VF 20 to AU 50. This piece is light in color and shows far fewer abrasions than normally seen on this issue. Trends $8,750.

5920 PCGS 1864 XF 40. A scarce Civil War issue with attractive original color.

5921 ANACS 1865-S AU 50. Lustrous and well struck. Trends $1,475.

5922 ANACS 1867-S AU 50. A scarce Type Two that is seldom seen in AU condition. Good luster for a 50 coin with light orange-patina on the highpoints of the design.

5923 PCGS **1868-S AU 50.** Despite its large mintage, the 1868-S is a very scarce coin and is seldom available in any grade. No mint state coins have been certified by either service and only 17 AUs have been graded. This coin is generally well struck with a surprising amount of luster remaining.

5924 ANACS 1869 XF 40. A somewhat scarcer date. This is an attractive and original coin with a couple of minor facial marks.

5925 ANACS **1869 AU 50.** A very elusive coin in AU or mint state: this is a solid AU piece with good luster and color. Trends $2,150.

5926 PCGS **1869 AU 55.** A scarcer and seldom seen Type Two twenty with 2 other pieces having been so graded. NGC has only graded 1 AU. Very scarce in mint state with only 6 pieces graded between the two major services. This is a very attractive piece with deep prooflike fields and sharply defined devices, even the stars around the obverse show full radial details. Trends $2,150 in AU 50.

5927 PCGS 1869-S VF 35. Well struck for the issue with an unusual amount of luster for the grade. A scarce early S-mint twenty.

5928 NGC **1869-S AU 50.** Not quite as rare as the 1868-S, nevertheless the '69-S is a very difficult issue and one that has only had a total of 4 coins graded in mint state. Attractive orange-gold color with good luster remaining.

5929 ANACS 1870 XF 45. A scarce P-mint that is quite rare in AU or better condition. Only 2 pieces have been graded in mint state with 8 in AU (by both services). Lightly marked with good luster for the grade. Trends $975 in EF 40 and $2,300 in AU 50.

5930 PCGS 1871 XF 40. One of the rarest of all the P-mints in the entire series of Coronet twenties and certainly one of the rarest of the Type Two. The coin has rich orange color and a few noticeable abrasions in the center of the obverse. Trends $1,350 in XF.

5931 ANACS **1871-CC AU 50.** Here is a coin that should rev up the motors of a few serious collectors. The 1871-CC is the second rarest CC twenty and it is rare indeed in AU condition, almost non-existent. Read what David Akers has to say about this issue: "Few dates in the series come generally worse than the 1871-CC. The 1871-CC is like the 1870-CC in that respect and about all one can expect to find is a heavily abraded F or VF. A strictly graded EF is very rare and I have never personally seen one that I would call AU." This is a lovely piece with full prooflike fields on each side and a full strike. An extraordinary coin for this issue and very likely the finest specimen one will find for many years to come. Trends $12,000.

5932 PCGS 1871-S AU 50. A moderately scarce issue, the usual 1871-S is only VF or XF. A clean coin with few abrasions in either side and good remaining luster.

5933 NGC **1872-CC XF 40.** A moderately rare Carson City twenty, but a rather pleasing coin with good color and a couple of small handling marks. Trends $1,600.

5934 NGC 1872-S AU 53. A slightly scarcer date. Orange-gold overall with traces of pink luster in the recesses of the design and numerous, small bagmarks.

5935 PCGS 1873 Closed 3 VF 30. By far the scarcer of the two varities of this year, the Closed 3 is difficult in any grade. This is a clean coin with minimal abrasions.

5936 ANACS 1873 Open 3 MS 60. A common date and the most affordable of the Type Two twenties. Superb pink and orange luster.

5937 NGC 1873-S AU 50 Open 3. Lightly marked surfaces with good luster for the grade.

5938 PCGS 1873-S AU 55. Open 3. Very clean devices with excellent luster, only marred by the presence of several abrasions in the left obverse field.

5939 PCGS 1873-S MS 60. Open 3. Well struck with superb orange-gold color and thick mint frost.

5940 ANACS 1874-CC VF 30. A somewhat better CC twenty but in this grade there is little premium attached.

5941 ANACS 1874-CC XF 40. Light pinkish-golden color.

5942 PCGS **1874-CC AU 50.** A better date among CC twenties: this piece has unusually clean surfaces for a CC and even yellow-orange color.

5943 PCGS 1874-S AU 58. Bright lustrous surfaces with only a trace of friction evident.

5944 ANACS 1874-S MS 60. Thick mint frost that has a pronounced pinkish tinge.

5945 ANACS 1875-CC VF 20. Showing signs of extensive wear in the channels of commerce, this is about as inexpensive as a CC twenty gets. Trends $585.

5946 PCGS 1875-CC XF 40. An affordable example of this popular and rather common Carson City twenty.

5947 ANACS 1875-CC AU 58. A flashy prooflike coin with loads

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza • Highland Park Village • Dallas, Texas 75205-2788 • WATS: 1-800-US COINS (872-6467) • Texas WATS: 1-800-448-6470 • Texas Phone: 214-528-3500

of eye appeal. This will make a nice type coin for some collector. Trends $1,175 in AU 50, $2,200 in MS 60.

5948 PCGS 1875-S MS 60. Completely lustrous but rather extensively bagmarked. Still, a valuable type coin as are all mint state Type Two twenties.

5949 PCGS 1876-CC AU 50. Attractive, lustrous to semi-prooflike fields. This date is roughly ten times scarcer in uncirculated grades than a common date like the 1875-CC, and hence is in great demand in this grade. Current $8,21) Trends is $1,350.

5950 PCGS 1876-CC AU 50. Another affordable CC twenty with good remaining luster.

5951 NGC 1876-CC AU 53. A clean Carson City gold piece with semi-prooflike fields. A nice lightly circulated coin that would be good for a type piece.

5952 ANACS 1877 AU 50. Deep reddish-orange color.

5953 PCGS 1877 MS 60. Fully lustrous with attractive deep orange and pink color. A scarcer Type Three twenty.

5954 NGC 1877-S AU 50. Sharply struck with a few abrasions on each side.

5955 ANACS 1877-S AU 50. Very sharply struck.

5956 PCGS 1877-S MS 60. While common enough in lower grades, in mint condition the '77-S is surprisingly difficult to locate. Although heavily abraded the luster is complete and unbroken.

5957 PCGS 1878 MS 60. Lustrous and well struck. A somewhat better early Type Three. Trends $1,025 in MS 60.

5958 ANACS 1878-CC VF 30. A well worn example of this scarce CC twenty with clean features and considerable reddish color. Trends $750 in VF 20.

5959 ANACS **1878-CC XF 40.** Well struck with bright prooflike fields. Very scarce in high grades, no mint state coins have been graded by either PCGS or NGC. Trends $1,800.

5960 PCGS 1878-S MS 60. A well struck, lustrous specimen with normal light bagmarks. August population: 11 with 2 higher. Trends: $1,500.

5961 PCGS 1879 AU 53. A scarcer P-mint that is quite elusive and expensive in mint state. Sharply struck with above average remaining luster.

5962 ANACS **1879 MS 60.** A scarce coin in high grades. Combining the PCGS and NGC Population only yields a total of 9 coins in all conditions of mint state. This piece is fully struck with deep prooflike fields and considerable frost on the devices. Trends $1,650.

5963 NGC 1879-S AU 55. Sharply struck with bright, flashy surfaces. A somewhat scarcer issue.

5964 PCGS 1880 AU 50. A scarcer Type Three that is almost impossible to locate in mint condition. Lustrous and well struck.

5965 PCGS 1880 AU 53. A very scarce issue in any condition with AU and mint state coins being especially difficult to locate. The original mintage was a paltry 51,456 pieces. This piece is fully brought up in all areas with considerable reflectivity in the obverse fields, more frosted on the reverse. Trends $1,000 in AU 50.

5966 PCGS 1880-S AU 50. Good luster and a sharp strike with original deeper colored surfaces. Scarcer issue.

5967 PCGS 1880-S AU 50. Sharply struck with a few small abrasions on each side, none of which are large or objectionable. Trends $775.

5968 PCGS 1881-S AU 50. Not quite as scarce as the 1880-S, the obverse of this piece has been slightly roughened by contact with other coins, but the features are well brought up on both sides.

5969 PCGS 1881-S AU 55. Almost complete mint luster and sharply struck.

5970 ANACS 1882-S AU 58. Sharply struck.

5971 PCGS 1882-S MS 60. Attractive orange and green patina with full frosty mint luster.

5972 PCGS 1883-S AU 55. Full strike.

5973 NGC 1884-CC AU 55. A well struck CC with attractive light reddish color.

5974 PCGS **1884-CC MS 60.** Only 18 uncirculated specimens have been graded by PCGS according to the August Population Report. So far, only one coin has been graded MS 61, with none higher. Sharply struck with the usual bright lustrous surfaces. August 21 Trends is $3,350.

5975 PCGS 1884-S MS 60. Somewhat scarce in mint state.

5976 PCGS 1884-S MS 60. Slightly scarcer issue with attractive thick luster.

5977 PCGS 1885-S MS 60. Somewhat baggy but showing attractive orange and green color. A scarcer date with a Trends value of $700 in MS 60.

5978 PCGS 1887-S MS 60. One of the scarcest of the S-mint twenties in the 1880s. Sharply struck with strong original luster.

5979 PCGS 1888 MS 61. A somewhat scarcer P-mint that pales in comparison to the other rare coins of that decade, yet is still a better coin in its own right. Well struck with superb orange-gold luster. Trends $1,250 in MS 60.

5980 PCGS 1888-S MS 63. A relatively clean coin for the grade with rich orange-gold color. Only slightly scarcer than a common date.

5981 PCGS 1889 AU 55. Fully struck with bright yellow-gold color. A popular coin because of its low mintage of only 44,111 pieces.

5982 NGC 1889-CC AU 50. A better date among CC twenties with bright surfaces that are much cleaner than most gold coins from this mint. Trends $1,500 in AU 50.

5983 PCGS 1889-S AU 55. Almost completely lustrous with a few scattered obverse marks. Looks uncirculated.

5984 ANACS 1890 AU 55. Sharply struck.

5985 PCGS 1890 MS 60. A very scarce issue that apparently was not saved in any appreciable numbers in mint condition. This is quite a nice coin for the grade with relatively clean surfaces and excellent luster. There is one small toning spot by star 4, apparently from an excess of copper in that area.

5986 ANACS 1890-CC XF 40. An affordable, entry level CC twenty.

5987 NGC 1890-CC AU 50. Clean surfaces that retain quite a bit of flash for a coin in circulated condition.

5988 ANACS 1890-CC AU 50. Sharply struck with bright yellow-gold surfaces. Trends $1,100.

5989 ANACS 1890-CC AU 50. Good remaining luster with a couple of facial marks.

5990 NGC 1890-CC AU 55. Well struck with clean surfaces.

The October 1991 Long Beach Bullet Auction

5991 ANACS 1890-CC AU 58. Sharply struck with almost complete mint luster remaining. Trends $1,100 in AU 50, $4,850 in MS 60.

5992 PCGS 1890-S MS 60. Scarcer than most of the S-mints from the 1880s. Well struck throughout with deep orange-gold color. Trends $1,400 in MS 60.

5993 PCGS **1890-S MS 62.** A well struck coin with lovely reddish tinged mint luster. One of only 5 pieces to have been so graded; only 1 coin is finer.

5994 PCGS **1891-CC AU 50.** Third rarest CC twenty. With an original mintage of only 5,000 pieces the 1891-CC only trails the 1870-CC and 1871-CC in rarity. Not only is the date rare, but it is a condition rarity as well. This piece is a solid AU with bright surfaces that have retained a good amount of original luster. The strike is sharp and there are a few scattered marks (most on the obverse) as one will normally find on CC gold and silver coins.

5995 PCGS 1891-S MS 61. Lustrous, orange-green surfaces.

5996 PCGS 1891-S MS 61. Fully struck.

5997 ANACS 1892-CC VF 30. A scarce CC with an impressively low mintage of only 27,265 pieces. Showing considerable wear, this coin is nevertheless original and shows no unsightly bruises, nicks or abrasions.

5998 ANACS 1892-CC XF 40. An attractive coin with deep reddish color over both sides and deeper russet around the devices. Trends $720.

5999 NGC 1892-CC AU 53. Sharply struck in the centers (with several weak stars at the edges) with bright prooflike fields. Trends $1,550.

6000 NGC 1894-CC AU 53. Clean surfaces and sharply struck with bright yellow gold color showing none of the usual reddish-coppery tone common to this issue.

6001 NGC **1893-CC AU 58.** Sharply struck with bright flashy fields. A sharp looking coin that looks uncirculated. Trends $1,150 in AU 50, $3,500 in MS 60.

6002 NGC **1893-CC AU 58.** Fully struck with bright yellow-gold color and almost complete mint luster.

6003 PCGS **1893-CC MS 61.** One of the most popular CC twenties, especially for type purposes, the 1893-CC is a hoard coin that was shipped in considerable numbers to Europe. Unlike most coins of this issue, this piece shows only a slight hint of the usually deep reddish-coppery color. The fields are semi prooflike and the devices are completely brought up.

6004 PCGS 1893-S MS 60. Excellent luster for the grade.

6005 NGC 1894-S MS 60. Fully uncirculated with a number of abrasions on the obverse.

6006 PCGS 1894-S MS 62. Fully struck with subtle iridescent colorings.

6007 PCGS 1895 MS 62. Fully struck and a sharp looking coin for the grade.

6008 PCGS 1895-S MS 60. Scarcer date. Trends 08 21 : 8615.

6009 PCGS Five (5) 1895-S MS 60. All the coins are sharply struck with attractive yellow and orange tinted luster. (Total: 5 coins)

6010 ANACS 1895-S MS 63. Excellent mint luster. Trends $1,175.

6011 ANACS 1896-S MS 60. Prooflike.

6012 NGC 1896-S MS 61. The reverse is considerably cleaner than the obverse. Sharply struck.

6013 PCGS 1897 MS 63. According to the August Population Report only 32 coins have been graded MS 63 by PCGS, with only 2 graded higher (both 64s). Creamy surfaces suggestive of a higher grade.

6014 ANACS 1897 MS 63. A scarcer date in this grade. Trends $1,250 as of August 21.

6015 ANACS 1897 MS 63. Second in a run of eight ANACS MS 63 pieces of this date. This is a uniform group of coins, all have excellent luster and are sharply struck. We are proud to be able to handle a group of such scarce coins that are entering the numismatic marketplace for the first time. According to the PCGS Population Report, that certification service has only graded 31 pieces of this date in MS 63 with 2 finer (both MS 64s).

6016 ANACS 1897 MS 63. A few bagmarks are concentrated on the cheek but otherwise this is a lustrous, original coin.

6017 ANACS 1897 MS 63. Fully struck with a touch of steely-blue color in the reverse fields.

6018 ANACS 1897 MS 63. Lustrous with a tinge of pink color in the center of the obverse.

6019 ANACS 1897 MS 63. Sharply struck with deep orange color.

6020 ANACS 1897 MS 63. Fully struck with deep orange-red color in the center of the obverse.

6021 ANACS 1897 MS 63. Superb color and luster.

6022 PCGS 1897-S MS 61. Fully struck with minimal abrasions for the grade.

6023 NGC 1897-S MS 62. Bright pink centers surrounded by a deeper orange at the edges. Full strike.

6024 ANACS 1898-S MS 63. Fully struck and unusually clean for the grade.

6025 ANACS 1899 MS 63. Sparkling mint luster. Fully struck.

6026 PCGS **1899-S MS 63.** A condition rarity among the later dates of Type Three twenties that has only had 17 coins certified in MS 63 with 4 finer. Fully struck and an attractive upper-end coin.

6027 PCGS 1900-S MS 61. Lustrous with nice color.

6028 PCGS 1901-S MS 60. Deep orange tinted mint luster.

6029 PCGS 1902 AU 55. A scarce date with an impressively low mintage of only 31,254 pieces. Rarely seen any finer.

6030 PCGS 1902 MS 60. Fully struck with a few abrasions on the obverse. This coin is quite elusive in mint state. To date (9/91) only 12 pieces have been so graded by PCGS with only 14 finer.

6031 PCGS 1902-S MS 60. Well struck with deep orange-gold color.

6032 PCGS **1905 MS 60.** A scarce, low mintage issue with an original production of only 59,011 business strikes. Well struck and lustrous, this piece shows a few abrasions as would be expected from any coin in this grade. One of only 16 pieces to have been so graded, only 6 are finer. Trends $1,550.

6033 PCGS 1906-S MS 63. Sharply struck with excellent mint luster. One of only 36 pieces to have been so graded, very scarce any finer.

6034 PCGS 1907-S MS 62. Strong strike and good luster with a few scattered small abrasions.

SAINT-GAUDENS DOUBLE EAGLES

6035 PCGS 1907 Arabic Numerals MS 63. Nice coin for the grade.

6036 ANACS 1908 No Motto MS 63. Full strike.

6037 ANACS 1908 No Motto MS 65. Fully struck with superb luster and subtle coloration. A lovely gem example of this popular two year type coin.

6038 PCGS 1908-D Motto MS 62. Sharply struck with a granular texture to the surfaces.

6039 PCGS 1909-S MS 63. Fully struck with the usual excellent luster this issue is known for.

6040 PCGS 1910-S MS 62. Good luster.

6041 PCGS 1911-S MS 62. Scarcer S-mint Saint.

6042 PCGS 1914 MS 61.

6043 NGC 1914 MS 62. Fully struck with bright golden-orange color.

6044 PCGS 1922 MS 63. Sharply struck with good luster.

6045 PCGS **1922-S MS 64.** A very scarce Saint in this condition. Although numerous examples have come to this country over the years from Europe and Central America, very few have surfaced in the better grades of uncirculated. In fact, no gems have been certified yet by either grading service. This is one of only 11 that have graded as high as MS 64 by PCGS. The surfaces are unusually clean with bright coruscating luster. As usual there are a couple of small copper stains on each side, but these do not detract in any significant way from the overall beauty of this condition census coin.

6046 PCGS 1923-D MS 65. A lovely gem Saint with the usual outstanding mint luster that this issue is so well known for.

6047 ANACS **1925-D MS 60.** A very scarce and highly desirable issue that is quite difficult to locate in any condition of mint state. Only 11 pieces have been graded MS 60 by PCGS, 4 by NGC. Lacking just a bit of highpoint detail, this coin has good luster and a few small, scattered abrasions and is actually quite attractive for the grade.

6048 ANACS 1928 MS 64. A clean and fully struck coin with a few speckles of grease (as struck in the planchet) on the left edge of the reverse.

TERRITORIAL GOLD

6049 NGC **1853 Assay Twenty-Dollar AU 53.** K-18, R.2. Sharply struck with above average central definition on the arrows and shield. The remaining luster is strong with rich reddish-orange color and the surfaces are clean with no edge bumps or other unsightly abrasions.

6050 NGC **1853 Assay Office Twenty-Dollar AU 55.** K-18, R.2. Bright yellow-gold color with good remaining luster. The surfaces have a number of small handling marks, but interestingly there are very heavy flow lines in the fields that give the coin a matte-like texture quite unlike any Assay twenty we can remember seeing.

6051 PCGS **1853 Assay Office Twenty-Dollar AU 58.** K-18, R.2. An exceptionally attractive example of this popular and historic Territorial gold coin. The San Francisco Assay Office served as a mint to the people of California in all but name until the mint actually opened in 1854. As such, coins from the Assay Office have a special status unlike other Territorial coins and unlike regular issue pieces--being somewhat of a hybrid of both. This piece has more luster and eye appeal than many technically uncirculated coins we have seen. The devices are fully struck and the fields are bright and nearly mark-free. The only mentionable flaw we can find on this coin is in the center of the reverse. We are uncertain whether there is a planchet flaw or out-of-the-mint damage through the letters RANC in FRANCISCO. Nonetheless, this is a lovely coin and worthy of a premium bid.

6052 NGC **1853 Assay Twenty-Dollar MS 64.** K-18, R.2. An extraordinary example of this historic Western gold coin. It is quite remarkable that such a coin could have survived for 138 years in such pristine condition. These coins were minted to circulate and most saw heavy usage. Once the mint opened in 1854 few people saved the local mint's products, almost all issues in all denominations are rare until 1870 or so. This lovely piece has bright coruscant luster and is very sharply struck with strong definition in the center of the obverse. As the grade implies the surfaces are minimally abraded. This is the only MS 64 graded by NGC and the finest certified by that service. PCGS has certified 4 in MS 64 with 1 finer, a MS 65.

6053 PCGS A. Bechtler One-Dollar XF 45. 27 G, 21 C, K-24, R.3. Augustus Bechtler's dollar struck after the death of his father, Christopher, in 1842. These 27 G, 21 C, dollars are the most widely available of all the Bechtler coinage. This is an attractive, original piece with clean surfaces and considerable deep reddish-orange color in the fields.

6054 PCGS **A. Bechtler One-Dollar AU 50.** 27 G, 21 C, K-24, R.3. Clearly a cut above most of the gold dollars usually seen from the Bechtler family. In addition to the overall lack of abrasions or handling marks, the surfaces also have a significant deep prooflikeness in the fields that is especially noticeable in and around the devices. Outside the prooflike areas the fields have taken on a rich coppery-red, almost russet, hue. This is a very collectible grade for this popular Southern territorial gold coin.

6055 PCGS Undated (1842-1852) A. Bechtler One-Dollar AU 50. 27G, 21C, K-24, R.3. A clean and original example of this popular Territorial gold coin. Bright surfaces with faint traces of reddish patina within the devices.

6056 PCGS **Undated (1842-1852) A. Bechtler Five-Dollars XF 40.** 134 GR, 21 C, K-27, Low R.5. Although rated as R.5 these five-dollar coins are not often seen in public auctions or fixed price lists. No doubt most are in private collections of Southern gold and only enter the market when such a collection is dispersed. This is an original piece with minimally marked surfaces and a faint outline of reddish patina around the devices. This coin shows the die crack through IN in CAROLINA but lacks the one sometimes seen through BECHTLER.

6057 PCGS **(1834-1837) C. Bechtler 5 Dollars XF 40.** 20 Distant, K-19, High R.6. An unusual and certainly one of the most interesting of the Bechtler coinages. These five-dollar coins not only have a date, but they are the only coins in U.S. numismatic history to have a month, day, and year on them; in this case August 1, 1834. This is an original coin with surfaces that are free from post-striking impairments but show numerous adjustment marks on the edge of each side.

6058 NGC **1860 Clark, Gruber Half Eagle MS 60.** K-2, R.4. A lovely piece of Colorado gold that is bright and lustrous with minimal abrasions for the grade. This was the first of only two years that the highly respected firm of Clark, Gruber struck coins. These pieces were widely accepted throughout the territory with an assay value at par or greater than regular U.S. gold coins. This is the only 1860 half eagle NGC has certified, although PCGS has graded 1 also with 8 pieces finer.

6059 ANACS **1855 Kellogg & Co. Twenty-Dollar VF 20.** K-3b, R.5, Short Arrows. A well worn coin that was used

Place Your Bids LIVE BY PHONE! See Instructions in Front of Catalog or Call 1-800-US COINS
Heritage Plaza●Highland Park Village●Dallas, Texas 75205-2788●WATS: 1-800-US COINS (872-6467)● Texas WATS: 1-800-448-6470● Texas Phone: 214-528-3500

many times in the channels of commerce in Gold Rush California. The surfaces show numerous handling marks, yet it appears to be original and uncleaned showing an outline of reddish patina around the devices.

6060 PCGS **1855 Kellogg & Co. Twenty-Dollar XF 45.** K-3b. R.5. Short Arrows. Sharply defined in the centers with bright yellow-gold color and significant portions of original luster remaining on the reverse. This is a minimally marked coin that is really quite pleasing and would be difficult to improve upon (not to mention very expensive)--only 9 AUs have been graded along with a single mint state coin.

6061 NGC **1849 Norris, Gregg, and Norris Five-Dollar AU 50.** Plain Edge. K-2. R.5. The firm of Norris, Gregg, and Norris was apparently the first company to issue private gold coins in California, beginning in May 1849. These historic coins are quite scarce and highly sought after by knowlegable advanced collectors. This coin is especially pleasing with no obvious marks on the surfaces or rim bumps. The unalloyed native gold from which these coins were struck has certainly given this coin an extra dimension of eye appeal above and beyond that found on other Territorial gold coins. The fields have taken on a deep orange and steely-blue patina, most likely a result of copper in the native alloy. This is the only AU graded by NGC. PCGS has only certified 7. This coin is virtually unobtainable in mint state with only a couple of pieces having been so graded.

6062 PCGS **1849 Norris, Gregg, and Norris Five-Dollar AU 53.** Plain Edge. K-2. R.5. Differing from the coin above by its lack of color and also by the flashy prooflike fields on each side. The surfaces overall show the usual small abrasions one would expect to find on a circulated coin, the only one worthy of mention being a small dig in the lower portion of the F in HALF on the reverse. The strike is strong with good detailing on the eagle's talons, upper wing, and shield. This is the only AU 53 graded by PCGS. It is exceeded in grade only by 4 other AU 55 pieces and a single MS 60.

CALIFORNIA GOLD

6063 PCGS 1856 Liberty Head Octagonal Quarter-Dollar MS 63 BG-704. R.4. A clean mint state coin with somewhat granular planchet.

6064 PCGS 1856 Liberty Head Octagonal Quarter-Dollar MS 64 BG-711. R.4. Struck on a lightly polished planchet and showing rich rose color in the fields.

6065 PCGS Undated (1852-54) Liberty Head Round Quarter-Dollar MS 62. BG-221. R.4. Fully struck with mild reflectivity and a few reverse scratches that account for the grade.

6066 PCGS Undated (1852-54) Liberty Head Round Quarter-Dollar MS 64. BG-222. R.4. Excellent color with prooflike fields. Only 1 piece has been graded finer.

6067 PCGS Undated (1852-54) Liberty Head Round Quarter-Dollar MS 62. BG-223. R.4. Prooflike with heavy obverse die striations as made and as noted in the Breen-Gillis text.

6068 PCGS Undated (1852-54) Liberty Head Round Quarter-Dollar MS 62. BG-224. R.4. Sharply struck with heavy die striations on each side.

6069 PCGS 1855 Liberty Head Round Quarter-Dollar AU 55. BG-227. High R.6.

6070 PCGS 1855 Liberty Head Round Quarter-Dollar AU 58. BG-227. High R.6. State I. Attractive yellow-gold color with prooflike fields.

6071 PCGS 1853 Liberty Head Octagonal Half-Dollar VF 20. BG-302. R.5. "Peacock Reverse." Although a misnomer, the name "Peacock Reverse" has stuck to these coins over the years. Often found in lower circulated grades, these coins actually served as change during the Gold Rush.

6072 PCGS 1853 Liberty Head Octagonal Half-Dollar AU 55. BG-302. R.5. "Peacock Reverse." An original coin with evidence of slight wear and deep reddish color on each side.

6073 PCGS 1852 Liberty Head Round Half-Dollar AU 55. BG-407. High R.5. Bright yellow-gold color and just a trace of friction. "D.N." below bust.

6074 PCGS 1853 Liberty Head Round Half-Dollar MS 63. BG-421. High R.5. Clean surfaces, heavily cracked reverse. This and 2 others are the finest graded to date.

6075 PCGS 1853 Liberty Head Round Half-Dollar AU 58. BG-428. R.4. Evidence of light handling.

6076 PCGS **1853 Arms of California MS 63.** BG-435. High R.6. The famous Arms of California design is undoubtedly the most famous of all types, designs, and denominations in the long and interesting series of California Fractional gold coins. While there are certainly rarer individual issues, neither the arms nor the eagle occur on any other die, making this coin of paramount importance to type collectors. Only 12 or so coins are believed to exist. We are uncertain of the pedigree of this piece, but note that the fields are prooflike with a bit of planchet flaking around the date and just to the right of the tip of the eagle's right wing. PCGS has graded 5 other pieces as MS 63, but only 2 others have been graded higher: a MS 64 and a MS 66.

6077 PCGS **Undated (1853) Liberty Head Octagonal One-Dollar AU 58.** BG-501. Low R.6. This is the so-called "King of California Gold." Type 3, an undated Large Head and Eagle variety, struck by Frontier & Devlercy, this is certainly one of the most attractively designed California fractionals with a heraldic eagle on the reverse. This issue usually comes in circulated grades, this piece showing just a trace of friction and retaining all the prooflike flash in the fields.

6078 PCGS 1853 Liberty Head Octagonal One-Dollar AU 58. BG-522. Borderline R.8. Very rare with possibly only four specimens known. Only one has been graded in mint state. Prooflike with the diagnostic obverse die cracks.

6079 PCGS 1853 Liberty Head Octagonal One-Dollar AU 53. BG-530. R.4.

6080 PCGS 1853 Liberty Head Octagonal One-Dollar AU 53. BG-530. R.4. Deep reddish-coppery color.

6081 PCGS 1853 Liberty Head Octagonal One-Dollar AU 55. BG-530. R.4. Light in color with a good portion of luster remaining.

6082 PCGS 1855 Liberty Head Octagonal One-Dollar EF 40. BG-533. R.5. Even wear on the highpoints of the design with a couple of areas of planchet flaking on the reverse.

6083 PCGS 1859 Liberty Head Octagonal Quarter-Dollar MS 64. BG-702. R.4. Deep red patina over both sides.

6084 PCGS 1864 Liberty Head Octagonal Quarter-Dollar MS 63. BG-706. Low R.7. Lustrous with deep steely-blue and coppery-red color with heavy clashing (as always) on each side. One of only 4 pieces to have been so graded by PCGS, none are finer.

6085 PCGS 1870 Liberty Head Octagonal Quarter-Dollar MS 63. BG-713. R.5. Richly colored. One of only 3 to have been so graded with 13 finer.

6086 PCGS 1871 Liberty Head Octagonal Quarter-Dollar MS 64. BG-717. R.4. State II. Rich orange-gold color.

6087 PCGS 1873 Liberty Head Octagonal Quarter-Dollar MS 63. BG-727. Low R.6. Deep orange-gold and steely-blue color.

with moderate reflectivity in the fields. Only 3 others have been so graded with 4 finer.

6088 PCGS 1864 Liberty Head Octagonal Quarter-Dollar MS 61. BG-735. R.5. Struck from heavily lapped dies. None have been certified any finer than a single MS 63.

6089 PCGS 1868 Liberty Head Octagonal Quarter-Dollar AU 55. BG-746. R.6. Deep iridescent patina.

6090 PCGS 1868 Liberty Head Octagonal Quarter-Dollar AU 55. BG-746. R.6. Prooflike with deep orange patina.

6091 PCGS 1869 Liberty Head Octagonal Quarter-Dollar MS 61. BG-749. R.7. Deep prooflike fields. Only 1 other coin has been so graded and these are finest pieces certified by PCGS to date.

6092 PCGS 1870 Liberty Head Octagonal Quarter-Dollar MS 63. BG-759. R.5. Prooflike.

6093 PCGS 1871 Liberty Head Octagonal Quarter-Dollar AU 55. BG-765. R.4. Deep orange-gold color.

6094 PCGS 1871 Liberty Head Octagonal Quarter-Dollar MS 62. BG-765. R.4. Deeply mirrored prooflike fields.

6095 PCGS 1871 Liberty Head Octagonal Quarter-Dollar MS 62. BG-767. R.4. Prooflike with deep orange patina.

6096 PCGS 1871 Liberty Head Octagonal Quarter-Dollar MS 63. BG-769. Low R.6. One of only 3 to have been so graded by PCGS, none are finer.

6097 PCGS 1872 Indian Head Octagonal Quarter-Dollar MS 62. BG-791. R.4. An attractive coin for the grade.

6098 PCGS 1873 Indian Head Octagonal Quarter-Dollar MS 63. BG-793. High R.6. Prooflike with attractive reddish color. Only 4 pieces have been so graded with 4 finer

6099 PCGS 1875 Indian Head Octagonal Quarter-Dollar MS 63. BG-797. R.5. Prooflike and fully struck with deep orange-gold color.

6100 PCGS 1880 Indian Head Octagonal Quarter-Dollar MS 64. BG-799J-R.5. Prooflike.

6101 PCGS 1880 Indian Head Octagonal Quarter-Dollar MS 64. BG-799K. High R.7. Clean features with semi-prooflike fields. Considerably finer than the BG plate coin. One of only 2 pieces to have been so graded with 4 certified in all conditions of mint state. Only 1 piece is finer, a MS 65.

6102 PCGS 1880 Indian Head Octagonal Quarter-Dollar MS 62. BG-799L. High R.7. Deep orange color in the fields. This is the only certified MS 62, only 2 pieces are finer, both MS 65s.

6103 PCGS 1881 Indian Head Octagonal Quarter-Dollar MS 63 BG-799M. R.7. Reflective fields with attractive color

6104 PCGS 1881 Indian Head Octagonal Quarter-Dollar MS 63. BG-799M. R.7. Pronounced color with prooflike fields. One of only 7 pieces to have been so graded with only 1 finer.

6105 PCGS 1881 Indian Head Octagonal Quarter-Dollar MS 64 BG-799O-High R.5. Prooflike with scattered speckles of color on each side.

6106 PCGS 1881 Indian Head Octagonal Quarter-Dollar MS 65. BG-799O-High R.5. Prooflike. One of only 9 to have been so graded with only 1 finer.

6107 PCGS 1852 Indian Head Octagonal Quarter-Dollar MS 63. BG-799U. R.7. A very scarce variety with 3 certified in this grade and only 3 finer.

6108 PCGS 1880 Indian Head Octagonal Quarter-Dollar MS 62. BG-799Y. R.6. One of the so-called "Aztec Heads." Red, blue, and orange iridescence over both sides.

6109 PCGS 1859 Liberty Head Round Quarter-Dollar AU 58. BG-801. R.5. Slight reddish color.

6110 PCGS 1859 Liberty Head Round Quarter-Dollar MS 64. BG-801. R.5. Prooflike, the reverse has a medallic turn.

6111 PCGS 1865 Liberty Head Round Quarter-Dollar MS 62 BG-802. R.7. Heavy die polish with bright yellow-gold color. One of only 4 pieces to have been so g raded with only 2 finer.

6112 PCGS 1868 Liberty Head Round Quarter-Dollar MS 64. BG-806. R.5. Frosty luster.

6113 PCGS 1870 Liberty Head Round Quarter-Dollar AU 55. BG-808. R.4. Also with a medallic turn to the reverse.

6114 PCGS 1870 Liberty Head Round Quarter-Dollar MS 64. BG-808. R.4. Semi-prooflike with attractive color.

6115 PCGS 1871 Liberty Head Round Quarter-Dollar AU 58. BG-812. R.6. Rose and orange-gold color.

6116 PCGS 1872 Washington Head Round Quarter Dollar MS 61. BG-818. High R.5. Scattered deep red color, mostly concentrated on the obverse. A very scarce type coin--this is the only round quarter using the Washington motif.

6117 PCGS 1860 50 Liberty Head Round Quarter-Dollar MS 62. BG-819. R.5. Variegated orange, steely-blue, and rose toning. Only 2 others have been so graded with 1 finer and that one being a MS 64.

6118 PCGS 1864 Liberty Head Round Quarter-Dollar EF 40. BG-821. R.6. Deep red, almost scarlet, color around the devices. Struck on a rough planchet.

6119 PCGS 1871 Liberty Head Round Quarter-Dollar MS 64. BG-838. Low R.4. Deep prooflike fields. None have been graded higher with only 2 certified in this grade.

6120 PCGS 1871 Liberty Head Round Quarter-Dollar AU 58. BG-840. High R.4. Prooflike with slight friction in the fields.

6121 PCGS 1875 Indian Head Round Quarter-Dollar MS 62. BG-847. R.5. Deep prooflike fields.

6122 PCGS 1870 Liberty Head Round Quarter-Dollar MS 61. BG-867. R.5. The so-called "Goofy Head" with deep red and blue color

6123 PCGS 1872 1 Indian Head Round Quarter-Dollar MS 64. BG-869. R.5. Prooflike.

6124 PCGS 1874 Indian Head Round Quarter-Dollar MS 60. BG-875. R.6 Prooflike.

6125 PCGS 1874 Indian Head Round Quarter-Dollar MS 63. BG-875. R.6. Deep red-orange color on the obverse with prooflike fields. One of 3 so graded with only 5 finer.

6126 PCGS 1875 Indian Head Round Quarter-Dollar MS 63. BG-877. High R.6. State II. Very deeply mirrored fields. One of 3 so graded with only 1 finer.

6127 PCGS 1881 Indian Head Round Quarter-Dollar MS 64. BG-886. R.7. Clean surfaces with deeply reflective fields. One of only 3 to have been so graded with a single MS 65 being finer.

6128 PCGS 1869 Liberty Head Octagonal Half-Dollar MS 65. BG-907. R.7. One of only 2 gems that have been so graded of this rare variety, only 1 piece is finer.

6129 PCGS 1871 Liberty Head Octagonal Half-Dollar AU 55. BG-911. High R.5. Bright prooflike fields.

6130 PCGS 1871 Liberty Head Octagonal Half-Dollar AU 55.

BG-925. R.5 Deep orange and steely-blue color.

6131 PCGS 1872 Indian Head Octagonal Half-Dollar MS 63. BG-940. R.5. Even orange-gold color.

6132 PCGS 1875 Indian Head Octagonal Half-Dollar AU 55. BG-948. High R.6. A clean coin with slight reflectivity in the fields.

6133 PCGS 1876 Indian Head Octagonal Octagonal Half Dollar AU 55. BG-949. R.6 Deep lavender color on the highpoints of the design

6134 PCGS 1867 Liberty Head Round Half-Dollar AU 58. BG-1007. R.6. Prooflike

6135 PCGS 1871 Liberty Head Round Half-Dollar MS 63. BG-1011. R.4. Colorful

6136 PCGS 1860 56 Liberty Head Round Half-Dollar MS 61. BG-1014. R.6. Pronounced die crack across the reverse. One of only 2 so graded with none finer.

6137 PCGS 1870 Liberty Head Round Half-Dollar AU 58. BG-1024. R.4 Sharply struck and semi-prooflike with rich orange color.

6138 PCGS 1871 Liberty Head Round Half-Dollar AU 58. BG-1026. R.5 Semi-prooflike with rich color and a couple of thin pin scratches on the obverse

6139 PCGS 1876 Liberty Head Round Half-Dollar AU 53. BG-1040A. High R.6 One of only two varieties of the very rare "Baby Heads," this being the less rare of the two Prooflike with lavender color on the highpoints of the devices.

6140 PCGS 1878 6 Indian Head Round Half-Dollar MS 61 BG-1066 R.7. Wide rims around both sides and attractive orange and steely-blue patina

6141 PCGS 1880 70 Indian Head Round Half Dollar MS 62 BG-1067. R.5 Amazing depth of mirrors in the fields with attractive color. This coin does not show the "ghosting" of the the obverse stars around the edge of the reverse and within the wreath as usually seen

6142 PCGS 1880 70 Indian Head Round Half Dollar MS 63 BG-1067. R.5 As with the coin above deep prooflike fields with no "ghosting." Clean surfaces

6143 PCGS 1880 Indian Head Round Half-Dollar MS 63. BG-1068. High R.6 Rich orange-gold color and prooflike

6144 PCGS 1860 Liberty Head Octagonal One-Dollar MS 60. BG-1102. R.5 Prooflike. Only 2 pieces have been so graded with 4 finer.

6145 PCGS 1871 Liberty Head Octagonal One-Dollar MS 62. BG-1104 High R.6 Slightly prooflike with a faint bit of reddish color

6146 PCGS 1871 Liberty Head Octagonal One-Dollar MS 63. BG-1104 High R.6 Softly struck on the obverse with attractive reddish color. The only MS 63 graded with 3 finer

6147 PCGS 1868 Liberty Head Octagonal One-Dollar MS 63. BG-1105. R.6. Deeply reflective fields and a very attractive example of this scarce gold dollar. Usually only seen in circulated condition, this is the finest coin graded with only one other piece even certified in mint state.

6148 PCGS 1875 Indian Head Octagonal One-Dollar MS 63 BG-1112. High R.6 Prooflike with a light reddish patina over both sides.

6149 PCGS 1873 Indian Head Octagonal One-Dollar MS 64. BG-1123. R.6 State II. Better struck than most with bright reflective fields. This is the only coin to have been so graded with 2 pieces finer

6150 PCGS 1873 Indian Head Octagonal One-Dollar MS 66 BG-1123. R.6 An immaculate coin with virtually perfect surfaces. Bright yellow-gold color with flashy deep mirrors in the fields. This is the finest coin to have been graded by PCGS.

6151 PCGS 1874 Indian Head Octagonal One-Dollar MS 63. BG-1124. High R.5. Sharply struck with deep orange-gold color. One of only 2 pieces to have been so graded with 1 piece finer.

6152 PCGS 1875 Indian Head Octagonal One-Dollar MS 63. BG-1125. High R.6. A noble design with good depth of reflectiveness in the fields and a strong strike. Only 1 other has been so graded with 3 finer, all MS 64s.

6153 PCGS 1875 Indian Head Octagonal One-Dollar XF 40. BG-1127. High R.5 Despite twenty points of wear the fields still show considerable prooflikeness.

6154 PCGS 1875 Indian Head Octagonal One-Dollar MS 64. BG-1127. High R.5. Prooflike with bright yellow-gold color This is the only coin to have been so graded and none are finer.

6155 PCGS 1876 3 Indian Head Octagonal One-Dollar AU 58. BG-1129. R.6. Deep orange, rose, and steely-blue color. Prooflike.

6156 PCGS 1876 3 Indian Head Octagonal One-Dollar MS 61 BG-1130. R.6. Prooflike with rose tinted color on the devices

6157 PCGS 1871 Liberty Head Round One-Dollar AU 58 BG-1204. R.6. Somewhat prooflike with deep orange-gold color. Very scarce type--this is one of only five varieties of Period Three round dollars.

MISCELLANEOUS

6158 PCGS Australia 1931 Florin MS 63, untoned surfaces; and a 1967 Crown MS 62, hazy golden toning. (Total: 2 coins)

6171 PCGS Two (2) 1947 Canada Dot Nickels MS 65. Both are brilliant examples of this scarce variety. (Total: 2 coins)

6172 PCGS 1947 Canada Dot Nickel MS 64. Untoned with a minor abrasion or two on each side. Scarce.

6173 PCGS 1947 Canada Dot Nickel MS 65. Untoned with clean fields. Only 5 other coins had been so graded with none finer according to the July Population Report (the latest information available for world coins).

6174 NGC 1902 Canada 5 Cent Silver AU 55. Nicely toned.

6175 NGC 1902 Canada 5 Cent Silver MS 64. Light peripheral obverse toning.

6176 NGC 1902 Canada 5 Cent Silver MS 64. Deeply toned with a good strike.

6177 NGC 1902 Canada 5 Cent MS 64. Lustrous with even golden-rose toning.

6178 NGC 1902 Canada 5 Cent Silver MS 64. Sharply struck with deep iridescent toning.

6179 NGC 1902 Canada 5 Cent Silver MS 65. A clean coin with excellent luster and a layer of deep, original toning.

6180 NGC 1902-H Canada 5 Cent Silver MS 64. Large H. Mottled brown and blue toning.

6181 NGC 1902-H Canada 5 Cent Silver MS 64. Large H. Deep gray in the centers with light blue at the edges.

6182 NGC 1902-H Canada 5 Cent Silver MS 65. Large H. Bright lustrous surfaces with a light golden-rose overlay of color.

6183 NGC 1908 5 Cent Silver MS 64. Bright golden-rose patina. Scarce date.

6184 NGC 1910 Canada 5 Cent Silver MS 63. Excellent luster with an even layer of golden-rose toning over each side.

6185 NGC 1911 Canada 5 Cent Silver MS 65. A one-year type coin with attractive surfaces and original color.

6186 NGC 1945 Canada 5 Cent Silver MS 64. Scarce, low mintage issue with only 1.17 million struck. Nicely toned.

6187 NGC 1918 Canada 5 Cent Silver MS 62. Mottled toning.

6188 NGC 1918 Canada 5 Cent Silver MS 65. A common date for type purposes with attractive, light toning.

6189 NGC 1942-C Newfoundland 5 Cent Silver MS 63. The original brilliance is interrupted by streaks of deep purple and blue toward the edges.

6190 PCGS 1880-H Canada Ten-Cents AU 53. Fully struck with gray-olive centers and golden-rose edge toning.

6191 NGC 1912 Newfoundland Ten-Cents MS 63. A clean and lustrous example of this short, three-year type coin. Even, light toning over both sides. Catalog $950 in Krause.

6192 NGC 1912 Canada Ten-Cents MS 64. Well struck with scattered light toning.

6193 NGC 1920 Canada Ten-Cents MS 64. Light golden toning with a few small field marks.

6194 NGC 1936 Canada Ten-Cents MS 60. Mostly untoned.

6195 NGC 1938 Canada Ten-Cents MS 64. An original coin with deep russet toning clinging to the devices.

6196 NGC 1938 Canada Ten-Cents MS 63. Lightly toned with a few small marks. Scarcer date.

6197 NGC 1939 Canada Ten-Cents MS 65. Attractively toned with bright, underlying luster. A scarcer issue that is worth a significant premium in higher grades.

6198 NGC 1941 Canada Ten-Cents MS 65. Deep blue and violet toning. A scarce coin in higher grades.

6199 NGC 1945 Newfoundland Ten-Cents MS 64. Lightly toned with strong, underlying luster.

6200 NGC 1936 Canada Ten-Cents MS 64. Prooflike and very flashy.

6201 NGC 1937 Canada Ten-Cents MS 64. Prooflike with scattered light toning over both sides.

6202 PCGS 1947 Canada Ten-Cents SP 63. Brilliant with dazzling mirror like surfaces.

6203 PCGS 1948 Canada Ten-Cents MS 65. Rare, key date issue with an original mintage of only 122,741 pieces. This coin is semi-prooflike with light, even lilac toning over both sides. A desirable modern Canadian item.

6204 PCGS 1948 Canada Ten-Cents MS 66. An originally toned example of this rare, key date. The deep reddish color is interrupted by a spider web of brilliance on the obverse.

6205 PCGS 1910 Canada 25 Cents MS 61. Brilliant.

6206 NGC 1919 Canada 25 Cents MS 64. An original coin with deep gray toning in the centers and royal blue at the edges. Sharply struck.

6207 NGC 1938 Canada 25 Cents MS 64. A lightly toned and highly lustrous coin that is scarce in better grades.

6208 NGC 1939 Canada 25 Cents MS 66. Deeply toned with superb luster and immaculate surfaces.

6209 NGC 1946 Canada 25 Cents MS 64. Bright semi-prooflike fields with light gray toning. Scarcer date.

6210 NGC 1947 Canada 25 Cents MS 63. Prooflike with the faintest blush of color.

6211 PCGS 1948 Canada 25 Cents MS 64. A semi-reflective and lightly toned example of this scarce quarter.

6212 NGC 1948 Canada 25 Cents MS 64. Prooflike and attractively toned. Scarce, key date issue.

6213 NGC 1929 Canada 50 Cents MS 64. Light hazy gray toning with an underlying reddish tint. Scarce issue with a mintage of only 367,470 pieces.

6214 PCGS 1948 Canada 50 Cents MS 64. A very low mintage half dollar with an original output of only 37,784 pieces. Light, even toning with bright luster on the obverse and prooflike fields on the reverse.

6215 PCGS 1951 Canada 50 Cents MS 65. Lilac and golden toning with a prooflike reverse.

6216 PCGS 1948 Canada 50 Cents MS 65. Toned on the obverse.

6217 PCGS Four (4) 1935 Canada One-Dollar MS 63. Two of the coins are brilliant while the other two show light, attractive color. (Total: 4 coins)

6218 PCGS Three (3) 1935 Canada One-Dollar MS 64. Minimally abraded and lustrous, two of the coins are toned while the third is brilliant. (Total: 3 coins)

6219 PCGS Three (3) 1935 Canada One-Dollar MS 64. Two are lightly toned and one is brilliant. All have good luster. (Total: 3 COINS)

The October 1991 Long Beach Bullet Auction

6220 PCGS 1935 Canada One-Dollar MS 65. Brilliant with superb mint frost. A lovely gem example of the first year of the commemorative dollars.

6221 PCGS 1939 Canada One-Dollar SP 63. Untoned in the centers with a bit of light peripheral color and a few minor hairlines in the fields.

6222 PCGS 1919 Straits Cent MS 64 Red. Good color on the obverse with a few abrasions on the reverse.

6223 PCGS 1948 Canada Dollar MS 60. Brilliant and prooflike with a few scattered marks. The key to the Voyageur dollars with a mintage of only 18,780 pieces.

6224 PCGS 1949 Canada One-Dollar MS 66. Brilliant with superb virtually flawless surfaces.

6225 PCGS 1951 Canada One-Dollar MS 65. Attractive peripheral toning.

6226 PCGS 1951 Canada One-Dollar PL 65. Brilliant and very flashy.

6227 PCGS 1953 Canada One-Dollar MS 65. No Strap. Originally toned.

6228 PCGS 1953 Canada One-Dollar MS 65. No Strap. Gray-olive and lilac toning.

6229 PCGS 1954 Canada One-Dollar PL 65. Brilliant with just a hint of edge toning and lightly tarnished devices.

6230 PCGS 1954 Canada One-Dollar PL 66. Flashy and essentially flawless with slight frosting on the devices.

6231 PCGS Five (5) 1936 Canada One-Dollar PL 65. Each coin is brilliant and shows a moderate amount of frosting on the devices. A uniform high grade lot. (Total: 5 coins)

6232 PCGS 1956 Canada One-Dollar PL 65. Brilliant.

6233 PCGS Three (3) 1936 Canada One-Dollar PL 66. Brilliant and essentially flawless coins. (Total: 3 coins)

6234 PCGS 1956 Canada One-Dollar PL 67. Unsurpassable quality.

6235 PCGS 1967 Canada $20 Gold PROOF. As struck--a perfect coin as far as we can tell.

6236 PCGS 1937 Canada Six-Piece Specimen Set With Box. The coins grade as follows: Cent SP 67; Nickel SP 66; Dime SP 67; toned; 25 Cents SP 64, toned; 50 Cents SP 66, deep iridescent toning, and Dollar SP 66 blue, green, and golden toning. A lovely group of coins with the original box that shows a scuff on the upper right corner of the top. (Total: 6 coins)

6237 PCGS 1937 Canada Six-Piece Specimen Set With Box. The coins grade as follows: Cent SP 64 Red and Brown; Nickel SP 66; Dime SP 65, deeply toned; 25 Cents SP 65, light iridescence; 50 Cents SP 65, superb color and surfaces, and the Dollar SP 66, deep blue toning with cracks of brilliance throughout. A uniformly high grade set with a box that shows a corner scuff as does the previous lot. (Total: 6 coins)

6238 NGC 1875 Denmark 1 Krone PR 65. A rare pattern striking of this first year of issue. A similar piece recently was sold by Oslo Mynthandel (10/91) and estimated at $800. Light golden-lilac toning with deeply reflective mirrors.

6239 NGC **1892 Denmark 1 Krone MS 66.** Superb, lustrous surfaces that are essentially flawless. There is a dusting of light olive and golden patina with much of the original brilliance still showing in places.

6240 NGC 1906 Denmark 2 Kroner MS 65. superb mint luster with light edge toning; and another piece that grades MS 66 that is semi-prooflike on the obverse with smooth, virtually unblemished surfaces. (Total: 2 coins)

6241 NGC 1958 Denmark 2 Kroner MS 68. Astonishing unsurpassable quality. Flawless surfaces with bright, semi-reflective fields.

6242 PCGS 1911 El Salvador Cristopher Columbus Peso MS 64, brilliant with a few scattered marks; and an 1897 England Crown MS 62 LXI Edge, light in color with clean surfaces. (Total: 2 coins)

6243 NGC 1850-A France 20 Centimes MS 65. Lightly toned with good luster. Three year type.

6244 NGC 1853-A France 20 Centimes MS 66. Lightly toned with clean, semi-prooflike fields.

6245 NGC 1866-A France 1 Franc MS 64, lustrous and attractively toned; and an 1866-BB France 1 Franc MS 65, mostly brilliant still with outstanding mint frost. (Total: 2 coins)

6246 NGC 1868-A France 1 Franc MS 65. Silvery-gray surfaces with the usual excellent luster.

6247 NGC France, 1919 50 Centimes MS 66, peripheral toning; 1916 1 Franc MS 64; and (2) 1916 1 Franc MS 65, both have just a touch of light golden color around the edge. (Total: 4 coins)

6248 NGC France, (2) 1916 1 Franc MS 66, the obverses are almost untoned but one piece has a nicely toned reverse; and a 1919 1 Franc MS 66, thin bands of concentric iridescence on each side. (Total: 3 coins)

6249 NGC France, (2) 1916 2 Francs MS 65. Lustrous pieces with light color. (Total: 2 coins)

6250 NGC 1917 France 2 Francs MS 67. A stunning coin with beautiful golden, rose, and green iridescence on the obverse, brilliant on the reverse. Flawless surfaces.

6251 NGC 1848-A France 5 Francs MS 66. Scattered olive and golden toning with significant portions of original brilliance still apparent.

6252 NGC 1886 France 20 Francs MS 64. Attractive deep orange-golden color.

6253 NGC 1824 France Essai 5 Centimes MS 65. VG-2561. Designed by Tiolier and struck in bronze. Most of the fiery red color remains with very little browning in evidence. A nice looking essai with clean surfaces.

6254 NGC 1870-E France Essai 1 Franc PR 65. CF.M-2127. Struck in white metal and designed by E.A. Oudine. Mostly brilliant still with pale blue and rose overtones. Unlisted in VG and the first we have seen.

6255 NGC 1797 Great Britain Pattern 1 Pence PR 65. Peck-1083. Struck in copper, this is the first use of Brittania with a helmet, not adopted for currency until the Pistrucci farthing of 1821. Medium brown color with a pale iridescence in the fields.

6256 NGC 1914 Anhalt 5 Marks PR 65. One of 1,000 proofs minted to celebrate the silver wedding anniversary of Friedrich and Marie. This piece has a touch of light golden color on each side and shows deeply reflective fields.

6257 NGC 1914 Bavaria 2 Mark MS 64. A lightly toned example of this one year type.

6258 NGC 1908 Bavaria 3 Marks MS 65. Attractively toned. First year of issue.

6259 NGC **1790 Furstenberg Taler MS 65.** Craig-11. A popular one year type of this interesting design. Although

usually seen XF or better, this coin is almost never found in such superior condition as this piece. Deep gray, lilac, and rose patina that is evenly matched on both sides.

6260 NGC 1908 Bavaria 3 Marks PR 66. A beautiful deep mirror cameo proof with clean devices. 225

6261 PCGS 1909-D Bavaria 3 Marks MS 63, prooflike and toned; 1887-R Italy 2 Lira MS 62, beautifully toned with prooflike fields; and an 1888 Jamaica Halfpenny MS 64, lustrous with even light golden-brown toning. (Total: 3 coins) 50

6262 PCGS 1839 Hesse-Darmstadt Gulden MS 63. Lustrous with just the lightest trace of color around the edges. 90

6263 NGC 1910 Hesse 3 Marks PR 65. Deeply reflective fields with just the lightest touch of golden color on each side. Considerable cameo contrast. 200

6264 NGC 1901 Lubeck 2 Marks MS 65. Superb luster with a lightly toned obverse. One year type coin. 125

6265 NGC 1900 Prussia 2 Marks MS 65. Lovely golden-rose and lilac toning. 75

6266 NGC 1900 Prussia 2 Marks MS 66. Light silvery-gray centers with blue and golden-rose edge toning. 100

6267 NGC 1908 Prussia 3 Mark MS 67. Near flawless surfaces with deep iridescent toning. 150

6268 NGC 1910 Prussia Berlin Univ. 3 Marks MS 66. Thick, coruscating luster with attractive light toning around the devices. 100

6269 PCGS 1913-A Prussia 5 Marks PR 62. Discreetly hairlined with light hazy iridescence in the fields. 50

6270 NGC 1915 Saxe-Meiningen 2 Marks MS 67. Although proofs are unlisted in Krause, this piece is so deeply mirrored and displays such a profound cameo contrast that we have to wonder about the status of this coin. Brilliant with apparently flawless surfaces and very flashy. 200

6271 NGC 1898 Saxe-Weimar 2 Marks MS 66. Originally toned in deep shades of lavender, lilac, and olive. 100

6272 NGC 1902 Saxony 2 Marks MS 64. Light golden-brown toning. 3

6273 NGC 1902 Saxony 2 Marks MS 66. Gray-lilac toning with a touch of olive around the devices. Lustrous with no apparent marks on either side. 100

6274 NGC 1904 Saxony Death of Georg 2 Marks MS 64. Light, even toning and semi-prooflike on the reverse. 50

6275 NGC 1904 Saxony Death of Georg 2 Marks MS 64. Attractive deep golden-rose, green, and blue iridescence--evenly matched on each side. 50

6276 PCGS 1904 Saxony Death of Georg 2 Marks MS 65, highly lustrous with pale yellow-gold color around the devices; and a 1902 Saxony Death of Albert 5 Marks MS 63, pale, even color. (Total: 2 coins) 70

6277 NGC 1908 Saxony 3 Marks PR 66. A stunning cameo proof with heavily frosted devices and very deep mirrors in the fields. Also, there is a subtle oil-slick iridescence in the fields on both sides. Exceptional quality. 250

6278 NGC 1905 Schwarzburg-Sondershausen 2 Marks MS 65. Thin Rim. Deep golden-red toning on each side with strong underlying luster. 100

6279 NGC 1906 Wurttemberg 2 Marks MS 66. Fully struck with attractive light toning and remarkably clean surfaces. 100

6280 NGC 1906 Wurttemberg 2 Marks MS 67. Deeply reflective prooflike fields with a pale trace of golden patina on each side. Essentially flawless and a coin with strong eye appeal. 150

6281 NGC 1909 Wurttemberg 3 Marks MS 67. A common date of the type in uncommonly fine condition. The silvery-gray surfaces are complimented by a bright iridescence around the devices and toward the edges. 150

6282 NGC 1904-A Germany 5 Pfennig PR 65, steely-gray with good reflectivity in the fields; and a 1926-A Germany 2 Marks MS 65, brilliant. (Total: 2 coins) 75

6283 NGC 1934 Germany--Schiller--2 Reichmarks MS 66. Reddish-brown color on the obverse but barely any color on the reverse. Lustrous and clean. 100 75

6284 NGC 1924-E Germany 3 Marks PR 65. Good reflectivity in the fields with a cameoed effect against the devices. Scarce issue limited to only 115 proofs. 150

6285 PCGS 1928-G Germany 5 Marks MS 64, KM-56.5. Brilliant and highly lustrous. 100

6286 NGC **1933-F Germany--Martin Luther--5 Marks PR 67.** A superb, virtually flawless cameo proof with ultra-heavy frost on the devices and deeply mirrored fields. Brilliant. 500

6287 PCGS 1821 Great Britain Secundo Crown MS 62. As lightly toned example of this scarce crown of George IV. 300

6288 PCGS 1883 Hawaii Quarter MS 63. Highly lustrous and almost brilliant with just a touch of golden patina scattered here and there.

6289 PCGS 1883 Hawaii Quarter MS 64. Sharply struck and lustrous with light, scattered toning on the obverse, a bit deeper on the reverse.

6290 PCGS 1883 Hawaii Quarter MS 64. Clean, lustrous surfaces with deep olive toning on the obverse contrasted with a lighter golden-rose on the reverse.

6291 PCGS 1859 Italy--Naples and Sicily--10 Tornesi MS 64 Red. This was the only year the 10 Tornesi was struck in the reign of Francesco II. Although showing a few small marks, the surfaces are fully red with only a couple of small carbon spots on the reverse. An impressive type coin.

6292 PCGS Japan, 1871 (M4) 20 Sen MS 62, untoned; (2) 1905 (M38) 1 Yen MS 62, both are brilliant and highly lustrous; 1912 (M45) 1 Yen MS 63, peripherally toned; and a 1914 (T3) 1 Yen MS 63, brilliant. (Total: 5 coins)

6293 PCGS 1870 (M3) Japan 1 Yen MS 63. Type One. First year of issue and the only year of the type. A brilliant coin with a few small, scattered marks and excellent luster. 150

6294 PCGS 1902 (M35) Japan 1 Yen MS 66. A scarcer, low mintage issue, seen here with light pearl-gray patina over both sides and strong underlying luster. 125

6295 PCGS 1870 Netherlands 2 1/2 Gulden MS 63, lightly toned with striated prooflike fields; and an 1871 Netherlands 2 1/2 Gulden MS 61, deep red and blue toning. (Total: 2 coins) 75

6296 PCGS Philippines, 1936 Commonwealth 50 Centavos MS 62, untoned; 1936 Murphey and Quezon Peso MS 64, light golden toning; and a 1936 Roosevelt and Quezon Peso MS 66, original superb surfaces and virtually mark-free. (Total: 3 coins)

6297 PCGS Philippines, 1936 Commonwealth 50 Centavos MS 63, lightly toned; 1936 Murphey and Quezon Peso MS 65, lilac toning with scattered bits of charcoal gray on each side; and a 1936 Roosevelt and Quezon Peso MS 65, golden-lilac color. (Total: 3 coins)

6298 PCGS (2) Philippines 1936 Roosevelt and Quezon Pesos MS 66. Both are pleasing, original coins with lustrous surfaces. Both are toned, although differently from each other--one a pale lilac, the other a spotty golden. (Total: 2 coins)

The October 1991 Long Beach Bullet Auction

6299 PCGS 1895 Puerto Rico Peso MS 60 Brilliant with only a couple of darker russet colored spots. A desirable one year type that features the portrait of the boy-king Alfonso XIII.

45 6300 PCGS 1851-SP PA Russia 5 Kopeks MS 65. Fully struck and beautifully toned.

30 6301 PCGS 1905-SP AP Russia 5 Kopeks MS 65. Essentially untoned with heavily striated fields.

100 6302 PCGS 1906-SP EB Russia 5 Kopeks PR 65. Deeply mirrored fields with significant mint frost on the devices. Mostly brilliant with light color on each side.

120 6303 PCGS 1912-SP EB Russia 5 Kopeks PR 65. Lightly toned.

80 6304 PCGS 1906-SP EB Russia 10 Kopeks MS 65. Lightly toned on the reverse with superb luster

38 6305 PCGS 1912-SP EB Russia 10 Kopeks MS 65. Lightly toned and fully struck.

1080 6306 PCGS 1924 Russia 10 Kopeks PR 67 Lightly toned.

80 6307 PCGS 1925 Russia 10 Kopeks PR 66 Flashy fields and untoned.

75 6308 PCGS 1873-SP HI Russia 15 Kopeks MS 67 Brilliant with superb mint luster, essentially a perfect coin.

100 6309 PCGS 1915 BC Russia 15 Kopeks PR 67 Untoned with a stark cameo contrast. Sharp looking coin.

75 6310 PCGS 1922 Russia 15 Kopeks PR 66 Brilliant

50 6311 PCGS 1923 Russia 15 Kopeks PR 65 Brilliant and deeply mirrored.

50 75 6312 PCGS 1923 Russia 15 Kopeks PR 66 Brilliant.

150 6313 PCGS Three (3) 1923 Russia 15 Kopeks PR 66. All are brilliant and deeply mirrored. Total: 3 coins

75 6314 PCGS 1924 Russia 15 Kopeks PR 67. Superb quality Unimprovable

50 6315 PCGS 1873-SP HI Russia 20 Kopeks MS 66 Intricately detailed with excellent luster and very little toning.

60 6316 PCGS 1921 Russia 20 Kopeks PR 66 Untoned

60 6317 PCGS 1922 Russia 20 Kopeks PR 66. Brilliant with exceptionally good mirrors in the fields

60 6318 PCGS 1923 Russia 20 Kopeks PR 66. Deeply mirrored with the faintest trace of color on the reverse

100 6319 PCGS 1923 Russia 20 Kopeks PR 67. Brilliant with seemingly perfect surfaces.

60 6320 PCGS 1924 Russia 20 Kopeks PR 67. Light peripheral toning. A lovely, original coin.

60 6321 PCGS 1925 Russia 20 Kopeks PR 66. Deeply mirrored with a faint trace of peripheral toning

6322 PCGS 1847-SP PA Russia 25 Kopeks MS 62. Fully struck with even toning over both sides. Downgraded by a few small abrasions on the reverse.

35 6323 PCGS 1855-SP HI Russia 25 Kopeks MS 65. Attractive gray toning with strong underlying luster. A common date for type purposes.

6324 PCGS 1858-SP FB Russia 25 Kopeks MS 64 An original coin with deep gray toning in the fields and bright golden surrounding the devices.

6325 PCGS 1859-SP FB Russia 25 Kopeks MS 64 Fully struck with deep blue and russet toning.

20 6326 PCGS 1860-SP FB Russia 25 Kopeks MS 63 Prooflike with brilliant centers and lovely peripheral toning.

50 6327 PCGS 1913 BC Russia 50 Kopeks PR 65. Deep violet toning over the flashy proof mirrors. A nice proof type coin

25 6328 NGC 1835 Sweden 1 16 Riksdaler MS 65. Prooflike fields and beautifully toned.

30 6329 NGC 1930 Sweden 25 Ore MS 67. Superb prooflike surfaces that show just the lightest hint of color.

250 6330 NGC 1871 Sweden 1 Riksdaler PR 64. Deeply mirrored with beautiful, original toning.

60 6331 NGC (2) 1897 Sweden Jubilee 2 Kronor MS 65 An impressive pair of coins with bright, glittering mint luster--one piece is toned, the other brilliant. (Total: 2 coins)

45 6332 NGC Sweden. 1897 Jubilee 2 Kronor MS 65, deep attractive toning; and a 1932 2 Kronor Gustaf II Adolf MS 65, light original color with some underlying brilliance. (Total: 2 coins)

35 6333 NGC 1907 Sweden 2 Kronor MS 66, Y-40. Peripherally toned

35 6334 NGC 1907 Sweden 2 Kronor MS 66 Y-40. Identical to the coin above. The obverse is brilliant in the center with peripheral golden-brown toning, the reverse is more evenly colored.

35 6335 NGC 1907 Sweden 2 Kronor MS 66, Y-40. Brilliant with dazzling mint luster.

60 6336 NGC (2) 1921 Sweden Political Liberty 2 Kronor MS 66 Both are originally toned coins with clean, attractive surfaces. (Total: 2 coins)

60 6337 NGC (2) 1921 Sweden Political Liberty 2 Kronor MS 66. An original pair of coins with peripheral toning on each. (Total 2 coins)

60 6338 PCGS Swiss. 1885-B 5 Rappen MS 66; 1898-B 5 Rappen MS 65; and an 1885-B 10 Rappen MS 66. An attractive group of coins that are similarly toned in shades of lilac and golden (Total: 3 coins)

35 6339 NGC 1921 Sweden Political Liberty 2 Kronor MS 67 Superb luster with clean, unblemished surfaces. The ultimate type coin.

6340 PCGS Swiss 1 Francs. 1928-B MS 65, russet toned; 1947-B MS 65, brilliant; 1947-B MS 66, untoned and lustrous; and a 1947-B MS 67, brilliant and a superior type coin. (Total: 4 coins)

6341 PCGS Swiss 5 Francs Commemoratives. (3) 1936-B Armament Fund, one coin grades MS 64 while the other two are MS 65--all are untoned; and (2) 1941-B Confederation, one grades MS 64 the other MS 65--both are lightly toned. (Total: 5 coins)

6342 NGC 1926 Swiss 20 Francs MS 64. The key date issue to the 20 Francs series with only 50,000 pieces struck. This coin has rich orange-gold color with minimal abrasions
